INTRODUCTORY SECTION

Douglas A. Ducey Governor

Craig C. Brown
Director

ARIZONA DEPARTMENT OF ADMINISTRATION

OFFICE OF THE DIRECTOR

100 NORTH FIFTEENTH AVENUE • SUITE 401 PHOENIX, ARIZONA 85007 (602) 542-1500

June 6, 2016

The Honorable Douglas A. Ducey, Governor of the State of Arizona; Members of the Legislature; Scott Bales, Chief Justice of the Supreme Court; and Citizens and Taxpayers of the State of Arizona

Ladies and Gentlemen:

It is our pleasure to transmit to you the Comprehensive Annual Financial Report (CAFR) of the State of Arizona for the fiscal year ended June 30, 2015. Responsibility for the accuracy of data, as well as the completeness and fairness of presentation, including all disclosures, rests with the State's management. The data presented in this report, to the best of our knowledge and belief, is accurate in all material respects and is reported in a manner which fairly presents the financial position and results of operations of the major and non-major funds of the State. All disclosures needed for the reader to gain a reasonable understanding of the State's financial activities have been included.

U.S. generally accepted accounting principles (GAAP) require that management provides a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of the Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The State's MD&A can be found immediately following the Independent Auditors' Report.

INTERNAL CONTROLS

The State is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the State are protected from loss, theft, or misuse and to ensure that adequate accounting data is compiled to allow for the preparation of financial statements in conformity with U.S. GAAP. Internal accounting controls are designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived and (2) the valuation of costs and benefits requires estimates and judgments by management. In the opinion of management, the State's internal controls are adequate to provide reasonable assurance that these objectives are met.

INDEPENDENT AUDIT

In compliance with State statute, an annual financial audit of the financial reporting entity of the State is completed each year by the State of Arizona, Office of the Auditor General in conjunction with other audit firms. Their audit was conducted in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Their report on the basic financial statements has been included in the financial section of this report. In addition, A.R.S. § 41-1279.03 requires at least a biennial single audit by the Office of the Auditor General. The Single Audit will be issued as a separate report at a later date.

FINANCIAL REPORTING ENTITY OF THE STATE

The accompanying CAFR includes all funds of the State (primary government), as well as its component units. Blended component units, although legally separate entities, are in substance part of a government's operations. Therefore, data from these units is combined with data of the primary government. Discretely presented component units are shown separately to emphasize that they are legally separate from the primary government and to differentiate their financial position and results of operations from those of the primary government. Discretely presented component units prepared in accordance with the Governmental Accounting Standards Board (GASB) are reported in a separate column in the government-wide financial statements. Discretely presented component units prepared in accordance with the Financial Accounting Standards Board are presented as separate financial statements immediately following the government-wide financial statements to emphasize that they are prepared in accordance with accounting standards other than those promulgated by the GASB.

The criteria for inclusion in the financial reporting entity and presentation are defined by the <u>Codification of Governmental Accounting and Financial Reporting Standards</u>, issued by the GASB, (Section 2100). Note 1 of the Notes to the Financial Statements explains which component units are included in the financial reporting entity of the State.

ARIZONA

The State of Arizona was admitted to the Union as the 48th state in 1912. Arizona is the sixth largest state by area, with 113,909 square miles. Arizona is known for the Grand Canyon, one of the Seven Wonders of the World, and its cacti and other desert landscape. A number of national forests, four national parks, eighteen national monuments, and over 20 million acres of Native American reservations and tribal communities are located in Arizona.

PROFILE OF THE GOVERNMENT

The State has three branches of government: Executive, Legislative, and Judicial. The Executive branch is headed by a Governor elected for a four-year term. Arizona's Legislative branch is bicameral, consisting of a thirty-member Senate and a sixty-member House of Representatives. Legislators are elected for two-year terms. The Judicial branch consists of the Arizona Supreme Court, Court of Appeals (with two divisions), Superior Court, justice of the peace courts, and municipal courts. The Superior Court, justice of the peace courts, and municipal courts are excluded from the financial reporting entity of the State as these entities do not meet GASB criteria for inclusion. The Supreme Court is the highest court in the State and is comprised of five justices. Article 6, Section 5 of the Arizona State Constitution describes the types of cases and matters handled by the Supreme Court.

The services provided by the State are administered through various agencies, departments, boards, commissions, councils, administrations, offices, and institutions of higher learning. These services include: (1) General Government, (2) Health and Welfare, (3) Inspection and Regulation, (4) Education, (5) Protection and Safety, (6) Transportation, and (7) Natural Resources.

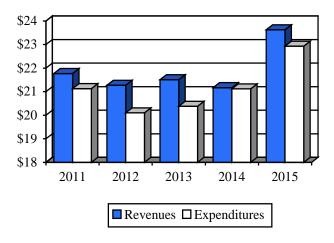

BUDGETARY CONTROLS

Budgetary control is maintained through Legislative appropriation and the Executive branch allotment process. The Governor is required to submit an annual budget to the Legislature. The budget is legally required to be adopted through the passage of appropriation bills by the Legislature and approved by the Governor. The appropriated funds are controlled by the Executive branch through an allotment process. This process generally allocates the appropriation into quarterly allotments by legal appropriation level. The State also maintains an encumbrance accounting system to further enhance budgetary control. Encumbered amounts generally lapse as of the end of the fiscal year, with the exception of capital outlay and other continuing appropriations that continue from year to year. The State's budgetary policies are explained in detail in the Required Supplementary Information.

GENERAL FUND BALANCE

Graph 1 summarizes the General Fund revenues and expenditures for the last five fiscal years. This graph does not include transfer amounts relating to other fund types and other financing sources (uses), which affect the ending fund balance.

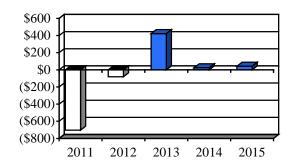

Graph 1
General Fund Revenues and Expenditures
for last 5 fiscal years
(Dollars in billions)

The General Fund ended the June 30, 2015 fiscal year with a total fund balance of \$43.5 million. This compares to the previous year's total fund balance of \$24.6 million.

Graph 2 summarizes the General Fund Balance (Deficit) for the last five fiscal years:

Graph 2
General Fund Balance (Deficit) for last 5 fiscal years
(Dollars in millions)

ECONOMIC CONDITION AND OUTLOOK

The following economic summary is based on the Industry Employment Projections Presentation released on March 24, 2016, by the Office of Employment and Population Statistics within the Arizona Department of Administration.

The employment projections are organized as described below:

- Two-year employment projection period: (2015 Quarter 3 to 2017 Quarter 2)
- Projections are created from Quarterly Census of Employment and Wages (QCEW) data produced by the US Bureau of Labor Statistics
 - QCEW uses North American Industry Classification System (NAICS) codes
 - Industry (describes what the business does)
 - Six digit industry code
 - The more digits, the more detail (hierarchical)
- QCEW program is a near census of all employers and jobs covered by Unemployment Insurance Program (97% of total nonagricultural employment)
 - Remaining 3% of employment is obtained from the County Business Patterns program
- QCEW program categorizes government employees differently than the Current Employment Statistics (CES) program
 - QCEW organizes Government employees within the NAICS industry they work (Government includes Government Public Admin. workers only)
 - CES organizes Government employees within the government NAICS code regardless of industry (Government includes all Government workers)

Economic trends influencing Arizona's economy are as follows:

- Growth in real Gross Domestic Product, real personal income, employment, retail sales
- Continued drop in U.S. and Arizona's unemployment rate
 - Labor force participation rates increased while unemployment levels have declined
- Residential and commercial real estate markets in Arizona and Phoenix metropolitan area have shown improvement
- Arizona outpaced U.S. in population, nonfarm employment and real personal income growth in 2015
- Aerospace and defense sector represents a large share of Arizona's manufacturing sector
- Arizona's mining sector has seen sharp declines due to a slowdown in world commodities markets
- Arizona export markets slow down as the U.S. dollar strengthens vs foreign currencies
- Arizona economy historically dependent on population growth

The following are highlights of Arizona's industry employment forecast:

- Arizona is projected to gain 156,535 jobs over the two-year period (2.84% annual growth)
- Eleven of the twelve sectors are forecast to add jobs over the two-year period
- Professional and Business Services (PBS) sector is expected to add the largest number of jobs (34,902) over the two-year period or 4.36%
- Construction is expected to have the largest annualized percentage gain at 6.6% (17,732 jobs)
- Sectors with the largest expected gains are: Professional and Business Services (34,902 jobs), Educational and Health Services (31,428 jobs), Trade, Transportation and Utilities (23,414 jobs), Leisure and Hospitality (22,594 jobs), and Construction (17,732 jobs)

The following tables summarize Arizona's sector employment growth rates and industry shares information:

MAJOR INITIATIVES

The Major Initiatives for the year ended June 30, 2015, were as follows:

- The fiscal year 2015 budget included \$20 million for performance-based, Student Success Funding.
- Arizona State University and Northern Arizona University received \$27.5 million towards completing the parity funding initiative designed to bring them on par with per-pupil funding at the University of Arizona.
- \$80 million was appropriated to the Arizona Health Care Cost Containment System to restore Medicaid coverage to the childless adult population.
- The Department of Child Safety was created and received a one-time appropriation of \$25 million to cover transition costs and the replacement of the Department of Economic Security Data Center facility. Additionally, the Department received an increase of \$120.2 million to hire new staff and meet newly established expectations of increased performance and outcomes.
- \$70 million was appropriated for large-scale statewide automation and technology projects. Of this amount, \$26.5 million was for the third year of the four year project to replace the State's antiquated financial and accounting system, which had its last day of active use on June 30, 2015.
- Fiscal year 2015 saw a \$15 million appropriation for capital projects.

AWARDS AND ACKNOWLEDGMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Arizona for its CAFR for the fiscal year ended June 30, 2014. This was the eleventh consecutive year that the State has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. This report must satisfy both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

We wish to express our sincere appreciation to the many individuals whose dedicated efforts have made this report possible. The preparation of this report could not have been accomplished without the professionalism and dedication demonstrated by the financial and management personnel of each State agency, board, commission, council, administration, office, institution of higher education, and all other organizations within the reporting entity.

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, business-type activities, aggregate discretely presented component units, each major fund, and aggregate remaining fund information of the State of Arizona as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain departments, the State's retirement plans, and the aggregate discretely presented component units, which account for the following percentages of the assets and deferred outflows of resources and revenues, additions, and other financing sources, as applicable, of the opinion units affected:

Opinion Unit/Department	Assets/Deferred Outflows of Resources	Revenues/Additions/ Other Financing Sources
Government-wide Statements		
Governmental Activities		
Arizona Department of Transportation	62.30%	11.03%
Arizona Health Care Cost Containment System	2.84%	20.94%
Early Childhood Development and Health Board	1.07%	0.45%
Business-type Activities		
Arizona Correctional Industries	0.25%	0.72%
Arizona Department of Transportation	0.91%	0.10%
Arizona State Lottery	0.75%	12.81%
Aggregate Discretely Presented Component Units	100.00%	100.00%
Fund Statements Major Governmental Funds: General Fund		
Arizona Department of Transportation	0.14%	0.01%
Arizona Health Care Cost Containment System	26.59%	23.71%
Transportation and Aviation Planning, Highway Maintenance and Safety Fund		
Arizona Department of Transportation	100.00%	100.00%
Aggregate Remaining Fund Information		
Arizona Correctional Industries	0.04%	0.41%
Arizona Department of Transportation	0.67%	12.06%
Arizona Health Care Cost Containment System	0.13%	4.43%
Arizona State Lottery	0.13%	7.22%
Arizona State Retirement System	65.30%	29.37%
Corrections Officer Retirement Plan	3.15%	1.94%
Early Childhood Development and Health Board	0.69%	1.23%
Elected Officials' Retirement Plan	0.63%	0.48%
Public Safety Personnel Retirement System	12.14%	8.28%

Those statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for those departments, retirement plans, and component units, are based solely on the reports of the other auditors. We conducted our audit in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Arizona Power Authority and the Universities—Affiliated Component Units, except for those of the ASU Preparatory Academy, Inc., which were reported as discretely presented component units, were not audited by the other auditors in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the State's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, business-type activities, aggregate discretely presented component units, each major fund, and aggregate remaining fund information of the State of Arizona as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As discussed in Note 1.Q. and Note 9 to the financial statements, for the year ended June 30, 2015, the State adopted new accounting guidance, Governmental Accounting Standards Board (GASB) Statement No. 68, Accounting and Financial Reporting for Pensions, as amended by GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date. Our opinions are not modified with respect to this matter.

As discussed in Note 9 to the financial statements, for the year ended June 30, 2015, the State restated beginning net position of the other enterprise funds and business-type activities as a result of the reclassification of the Insurance Department Guaranty Funds, previously reported as agency funds. Our opinions are not modified with respect to this matter.

As discussed in Note 16.I. to the financial statements, for the year ended June 30, 2015, the State restated beginning net position for the discretely presented component units as a result of the University of Arizona Health Network no longer meeting the requirements for inclusion in the State's financial reporting entity. Our opinions are not modified with respect to this matter.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the Management's Discussion and Analysis on pages 21 through 34, the Budgetary Comparison Schedules on pages 141 through 155, Infrastructure Assets information on pages 156 through 159, Schedules of the State's Proportionate Share of the Net Pension Liability—Cost-Sharing Pension Plans on pages 160 and 161, Schedule of Changes in the State's Net Pension Liability and Related Ratios—Agent Pension Plans on pages 162 and 163, Schedules of State Pension Contributions on pages 164 through 166, related notes on page 167, and the Schedule of Single Employer OPEB Plan Funding Progress on page 168, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with U.S. generally accepted auditing standards, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The combining and individual fund statements and schedules and the introductory and statistical sections listed in the table of contents are presented for purposes of additional analysis and are not required parts of the basic financial statements.

The combining and individual fund statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards by us and the other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the combining and individual fund statements and schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we will issue our report on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters at a future date. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

Debbie Davenport Auditor General

June 6, 2016

MANAGEMENT'S DISCUSSION AND ANALYSIS

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following is a discussion and analysis of the State of Arizona's (the State's) financial performance, providing an overview of the activities for the fiscal year ended June 30, 2015. Please read it in conjunction with the transmittal letter at the front of this report and with the State's financial statements, which follow this section. The completeness and fairness of the following information is the responsibility of the State's officials and management.

FINANCIAL HIGHLIGHTS

Government-wide:

- The assets and deferred outflows of resources of the State exceeded liabilities and deferred inflows of resources at the close of the fiscal year by \$23.0 billion (reported as net position). Of this amount, a deficit of \$5.5 billion exists for unrestricted net position, \$8.0 billion is restricted for specific purposes (restricted net position), and \$20.5 billion is net investment in capital assets.
- As a result of implementing GASB Statement No. 68, Accounting and Financial Reporting for Pensions, as amended by GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date, the State recorded \$841.7 million deferred outflows of resources, \$4.9 billion net pension liability, and \$623.0 million deferred inflows of resources for the primary government. This was the primary reason for a \$4.4 billion adjustment to unrestricted beginning net position for fiscal year 2015. After adjustments, the State's total net position increased in fiscal year 2015 by \$1.7 billion. Net position of governmental activities increased by \$1.2 billion, while net position of the business-type activities increased by \$442.4 million.

Fund Level:

- As of the close of the fiscal year, the State's governmental funds reported combined ending fund balances of \$7.6 billion, an increase of \$244.6 million from the beginning of the year. After accounting for non-spendable, restricted, and committed fund balances of \$5.2 billion, \$1.8 billion, and \$924.9 million, respectively, the State's unassigned fund balance had a deficit of \$336.7 million, or (4%) of combined fund balances.
- As of the close of the fiscal year, unassigned fund balance for the General Fund had a deficit of \$306.8 million, which is approximately (1%) of total General Fund expenditures.
- The Land Endowments Fund reported fund balance at fiscal year-end of \$5.1 billion, an increase of \$303.1 million during the year. The Land Endowments Fund is used to help finance public education within the State as required by the federal government and the State's Constitution.
- The enterprise funds reported net position at fiscal year-end of \$2.6 billion, an increase of \$423.6 million during the year. In addition, beginning net position was restated (reduced) by \$1.2 billion primarily due to the implementation of GASB 68.

Long-term Debt:

• The State's total long-term primary government debt decreased during the fiscal year to \$10.0 billion, a decrease of \$35.2 million or (0.35%). Changes during the year included the addition of revenue bonds and certificates of participation (COPs) of \$1.5 billion and \$206.7 million, respectively. Also, the State retired \$1.4 billion of revenue bonds and \$415.0 million of certificates of participation. Included in the change in long-term primary government debt are increases and decreases in net issuance premiums of \$268.5 million and \$103.5 million, respectively.

More detailed information regarding the government-wide financial statements, fund level financial statements, and long-term debt activity can be found beginning on **page 38**.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is an introduction to the State's basic financial statements, which are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. Required Supplementary Information and other supplementary information are included in addition to the basic financial statements.

Government-wide Statements (Reporting the State as a Whole)

The government-wide financial statements provide a broad overview of the State of Arizona's finances in a manner similar to private sector business. The financial statements report information about the State, as a whole, and about its activities that should help answer this question: Is the State, as a whole, better or worse off as a result of this year's activities? These statements include all non-fiduciary assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting. The current year's revenues and expenses are taken into account regardless of when cash is received or paid. The government-wide financial statements include the following:

The Statement of Net Position (pages 38-39) presents the State's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position. The total of assets and deferred outflows of resources, minus the total of liabilities and deferred inflows of resources, is reported as net position. Over time, increases and decreases in net position measure whether the State's financial position is improving or deteriorating.

The Statement of Financial Position (page 40) presents the State's Universities-affiliated component units' assets and liabilities, with the difference between the two reported as net assets.

The Statements of Activities (pages 42-44) present information showing how the State's net position/net assets changed during the most recent fiscal year. All changes in net position/net assets are reported as soon as the underlying events giving rise to the change occur, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned, but unused vacation leave).

Government-wide statements report three activities:

- Governmental Activities Most of the State's basic services are reported under this category. Taxes and intergovernmental revenues generally fund these services. The Legislature, the Judiciary, and the general operations of the Executive departments fall within the governmental activities.
- Business-type Activities The State charges fees to customers to help it cover all or most of the cost of certain services it provides. The State's three universities are examples of business-type activities.
- Discretely Presented Component Units Component units are legally separate entities for which the State is considered to be financially accountable, or organizations that raise and hold economic resources for the direct benefit of the State. The Water Infrastructure Finance Authority, the Arizona Power Authority, the Rio Nuevo Multipurpose Facilities District, the Greater Arizona Development Authority, and the Arizona Commerce Authority are discretely presented component units reported by the State. The State has included component units affiliated with the Universities whose financial statements are prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP), as adopted by the Financial Accounting Standards Board. These organizations include the Arizona State University Foundation, the University of Arizona Foundation, the Arizona Capital Facilities Finance Corporation, and other non-major component units affiliated with the Universities. Financial statements for these organizations are presented immediately following the government-wide statements to emphasize that they are prepared in accordance with accounting standards other than those promulgated by the Governmental Accounting Standards Board (GASB), and include a statement of financial position (page 40) and a statement of activities (page 44). See pages 65-69 and 129-137 for more information on discretely presented component units.

Fund Financial Statements (Reporting the State's Major Funds)

The fund financial statements begin on **page 45** and provide detailed information about the major individual funds. A fund is a fiscal and accounting entity with a self-balancing set of accounts that the State uses to keep track of specific sources of funding and spending for a particular purpose. In addition to the major funds, **page 172** begins the individual fund data for the non-major funds. The State's funds are divided into three categories – governmental, proprietary, and fiduciary – each category uses different accounting approaches.

• Governmental funds – Most of the State's basic services are reported in the governmental funds, which focus on how money flows into and out of those funds and the balances left at year end that are available for future spending. The governmental fund financial statements provide a detailed short-term view of the State's general government operations and the basic services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the State's programs. These funds are reported using modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. Governmental funds include the general, special revenue, capital projects, debt service, and permanent funds. Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. This report includes two schedules (pages 46 and 48-49) that reconcile the amounts reported on the governmental fund financial statements (modified accrual accounting) with governmental activities (accrual accounting) reported on the appropriate government-wide statement.

Governmental fund financial statements can be found on pages 45 and 47 of this report.

• Proprietary funds — When the State charges customers for the services it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize accrual accounting; the same method used by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public — such as the State's Universities. Internal service funds report activities that provide supplies and services for the State's other programs and activities — such as the State's Risk Management Fund. Internal service fund operations primarily benefit governmental funds and are reported as governmental activities on the government-wide statements. The reconciliation between the government-wide financial statements for business-type activities and the proprietary fund financial statements is presented at the end of the propriety fund financial statements on pages 51-52.

Proprietary fund financial statements can be found on pages 50-55 of this report.

• Fiduciary funds – The State acts as a trustee or fiduciary for its employee pension plans. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State's fiduciary activities are reported in separate Statements of Fiduciary Net Position and Changes in Fiduciary Net Position beginning on page 56. These funds are reported using accrual accounting and include pension and other employee benefit trust, investment trust, and agency funds. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

Fiduciary fund financial statements can be found on pages 56-57 of this report.

Notes to the Financial Statements

The Notes to the Financial Statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes can be found beginning on page 65 of this report.

Required Supplementary Information

Following the basic financial statements is additional Required Supplementary Information (RSI) that further explains and supports the information in the financial statements. The RSI includes budgetary expenditure comparison schedules for the General Fund and each major special revenue fund and a reconciliation of the schedules of statutory and U.S. GAAP expenditures for the fiscal year. The RSI also includes up to ten years of information on the State's pension plans, including schedules on the State's proportionate share of the net pension liability, changes in the net pension liability and related ratios, and State pension contributions. The RSI also includes schedules of condition and maintenance data regarding certain portions of the State's infrastructure and the single-employer benefit plan funding progress schedule.

Required supplementary information begins on page 141 of this report.

Other Supplementary Information

Other supplementary information includes combining financial statements for non-major governmental, non-major enterprise, all internal service funds, all fiduciary funds, non-major component units, and non-major universities – affiliated component units. These funds are added together, by fund type, and presented in single columns in the basic financial statements, but are not reported individually, as are major funds on the governmental funds and proprietary funds financial statements. Budgetary expenditure comparison schedules for the non-major special revenue funds and the Land Endowment Fund are also included.

Other supplementary information begins on page 172 of this report.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

The State's overall financial position and operations for the past year for the primary government are summarized, as follows, based on the information included in the government-wide financial statements. In order to compare fiscal year 2015 and fiscal year 2014 financial results, the State has presented fiscal year 2014 information restated to the extent possible for GASB 68, as indicated previously on **page 21**, and for other accounting changes.

Restricted	7,170,289	6,829,299	895,616	723,590	8,065,905	7,552,889	
Unrestricted	(5,686,304)	(5,841,106)	138,712	(51,586)	(5,547,592)	(5,892,692)	
Total Net Position	\$ 20,274,856	\$ 19,041,733	\$ 2,695,794	\$ 2,253,440	\$ 22,970,650	\$ 21,295,173	

For the year ended June 30, 2015, the State's combined net position totaled \$23.0 billion, reflecting an increase of \$1.7 billion during the current fiscal year.

The largest portion of the State's net position (89%) represents net investment in capital assets of \$20.5 billion. Additions to roads and bridges provided the majority of the governmental activities increase in net investment in capital assets of \$737.3 million. The State uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although the State's investment in its capital assets is reported net of accumulated depreciation and related debt, it should be noted that the resources needed to repay this debt are planned to be provided from other sources, since the capital assets themselves are not typically used to liquidate these liabilities.

The State's net position also included \$8.1 billion (35%) of resources that are subject to external restrictions on how they may be used. The governmental activities increase in restricted net position of \$341.0 million is primarily the result of an increase of \$294.9 million in the amount restricted by the State's Constitution for basic education funded by the Land Endowments Fund. The business-type activities increase in restricted net position of \$172.0 million is primarily due to an increase of \$140.1 million in the amount restricted for the Unemployment Compensation Fund, which will be used to pay future unemployment claims.

After accounting for the above net position restrictions, the State has a remaining deficit of \$5.5 billion (24%) reported as unrestricted net position.

More detailed information regarding beginning net position restatements is on page 122.

Change in Net Position

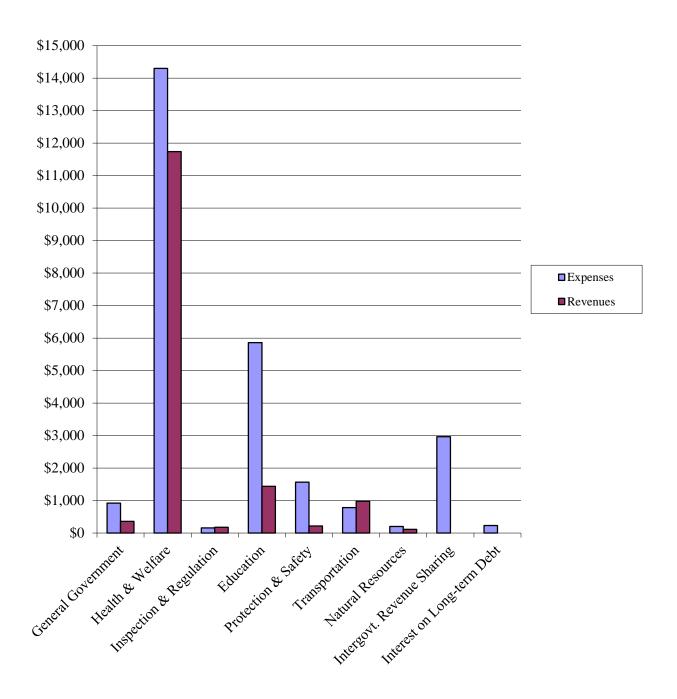

Governmental Activities - Net Position increased by \$1.2 billion from fiscal year 2014, or a 6% increase from fiscal year 2014. Reported sales and income tax revenues increased by \$342.9 million, or 6%, and \$467.4 million, or 12%, from fiscal year 2014, respectively. The increase in tax collections generally reflects increased economic activity in the State during fiscal year 2015. Net taxable sales increased by 4% from fiscal year 2014 resulting in the increased reported sales tax revenue. The largest increases in net taxable sales during fiscal year 2015 were in retail sales, restaurants and bars, and use tax. The increase in income tax revenue for the State during fiscal year 2015 reflects increases in withholding, individual, and corporate tax collections as well as decreases in refunds. During fiscal year 2015, operating grants and contributions increased by \$1.0 billion (8%) over fiscal year 2014. This increase primarily results from enhanced federal financial participation matching rates for increased enrollment in Arizona Health Care Cost Containment System (AHCCCS) programs due to implementation of the Patient Protection and Affordable Care Act of 2010 (ACA) beginning January 1, 2014. AHCCCS experienced an increase of 200,860 members (13.3%) over fiscal year 2014 primarily as a result of ACA expansion and the simultaneous ending of the Childless Adult program enrollment freeze beginning January 1, 2014. The increase in operating grants and contributions discussed above was offset by a decrease of \$346.9 million in the fair value of the Permanent Fund investment portfolio from fiscal year 2014. The increase in health and welfare expenses of \$1.5 billion resulted primarily from the increased enrollment in the AHCCCS programs, as discussed above.

A comparison of the net cost (income) of services by function for the State's governmental activities is shown below for fiscal years 2014 and 2015. Net cost (income) is the total cost less revenues generated by the activities and shows the financial burden placed upon the State's taxpayers by each of these functions.

Governmental Activities (expressed in thousands)

	Total Cost	of Services	Net Cost (Incor	ne) of Services

Expenses and Program Revenues Governmental Activities for Fiscal Year 2015 (in millions of dollars)

Business-type Activities – Net Position increased by \$442.4 million from fiscal year 2014, or 20%. This increase is primarily due to increases in net position for the Universities and the Unemployment Compensation Fund of \$285.9 million and \$140.1 million, respectively. Non-operating revenues and transfers from the General Fund more than offset the Universities' operating loss of \$1.2 billion. The Universities' operating revenues increased by \$321.3 million over fiscal year 2014 primarily due to approved student tuition and fee increases, increased enrollment, and increased

nongovernmental grant and contract revenue. The increase in nongovernmental grant and contract revenue was mainly attributed to the U of A's affiliation agreement with Banner Health. Also, State appropriation transfers to the Universities from the General Fund increased by \$37.6 million over fiscal year 2014. This increase resulted primarily from increased parity funding to the Arizona State University and additional appropriations for the University of Arizona College of Agriculture extension program. These increases were offset by increases in expenses for instruction, academic support, and scholarships and fellowships. Expense increases resulted from continued enrollment growth, as well as U of A's affiliation agreement with Banner Health and other research support. Also, although the Unemployment Compensation Fund's unemployment assessment revenue remained stable, cost of sales and benefits decreased \$132.7 million as compared to the prior fiscal year due to the decline in unemployment levels.

A comparison of the net cost (income) of services by function for the State's business-type activities is shown below for fiscal years 2014 and 2015. Net cost (income) is the total cost less revenues generated by the activities and shows the financial burden placed upon the State's taxpayers by each of these functions.

Business-type Activities (expressed in thousands)

	Total Cost of	of Services	Net Cost (Incor	ne) of Services
	2015	2014	2015	2014
Functions/Programs:

Total Business-type Activities	\$ 5,419,742	\$ 5,245,247	\$ 406,452	\$ 478,722

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

The State uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds – The general government functions are contained in the general, special revenue, debt service, capital projects, and permanent funds. The focus of the State's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the State's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

General Fund

The General Fund is the chief operating fund of the State. At June 30, 2015, unassigned fund balance of the General Fund had a deficit of \$306.8 million, while total fund balance closed the year at \$43.5 million. As a measure of the General Fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures and other financing uses. Unassigned fund balance represents a negative 1% of total expenditures and other financing uses, while total fund balance is less than 1% of the same amount.

The fund balance of the State's General Fund increased \$18.9 million during the fiscal year. Revenues exceeded expenditures by \$703.1 million, before other financing sources and uses. However, other financing sources and uses mostly offset this excess by \$684.2 million, which consist primarily of transfers to the Universities in support of higher education, offset by legislative transfers from other funds to the General Fund. Overall revenues increased by \$2.5 billion (12%) and expenditures increased by \$1.8 billion (9%) from fiscal year 2014. Primary reasons for increases in fund balance during the fiscal year are increased collections of sales and income taxes and increased intergovernmental revenue, including federal funding received as a result of the AHCCCS implementation of the ACA. A primary reason for decreases in fund balance during the fiscal year is increased health and welfare expenditures. These increases and decreases were discussed in the government-wide financial analysis beginning on page 25.

Transportation and Aviation Planning, Highway Maintenance and Safety Fund

The Transportation and Aviation Planning, Highway Maintenance and Safety Fund is responsible for the repair and maintenance of existing roads, paying the debt service for roads that are built from the issuance of revenue bonds and grant anticipation notes, and providing technical assistance with road construction provided by contractors hired by the Arizona Department of Transportation (ADOT). Total fund balance increased \$57.4 million during fiscal year 2015. Although revenues exceeded expenditures by \$361.8 million, transfers to non-major governmental funds of \$305.4 million, to primarily pay debt service, largely offset this excess. Overall revenue increased by \$258.1 million (10%), however, expenditures also increased by \$250.3 million (11%), as compared to the prior fiscal year.

Land Endowments Fund

The Land Endowments Fund was established when the federal government granted Arizona statehood. Both the State's Constitution and the federal government require that the land grants given to the State be maintained indefinitely, and the earnings from the land grants should be used for public education, primarily K-12. The Land Endowments Fund total fund balance increased \$303.1 million during fiscal year 2015. Endowment investments increased \$296.8 million, at fiscal year-end, primarily due to receipts from land sales of \$123.5 million and a net increase in the fair value of investments of \$251.7 million.

Proprietary funds

The business-type activities discussion for the fund level financial statements of the State's enterprise funds provide the same type of information found in the government-wide financial analysis beginning on **page 25**.

GENERAL FUND BUDGETARY HIGHLIGHTS

During the fiscal year, the original budget was amended by various supplemental appropriations and appropriation revisions. Differences between the original budget and the final amended budget resulted in a \$2.1 billion net increase in appropriations for the General Fund, before adjustments. Some of the significant changes in the General Fund appropriations were:

- 1. \$492.2 million increase due to prior fiscal year obligations that were paid in the current fiscal year per A.R.S. \$ 35-191.
- 2. \$957.2 million increase to the Department of Education's original budget is primarily due to the basic state aid deferred payment from fiscal year 2014 which was appropriated as a supplemental appropriation in the fiscal year 2015 budget.
- 3. \$274.8 million increase to the AHCCCS' original budget is primarily due to supplemental appropriation increases for Proposition 204 services, due to enrollment in excess of budgetary projections, and for safety net care pool payments to assist Phoenix Children's Hospital.
- 4. \$229.0 million increase to the Universities' original budget is primarily due to payment deferrals from fiscal year 2014, which were budgeted in fiscal year 2015, and for lease-purchase capital financing for research infrastructure facilities.
- 5. \$91.4 million increase to the Department of Economic Security's original budget is primarily due to payment deferrals from fiscal year 2014, which were appropriated as a supplemental appropriation in the fiscal year 2015 budget, as well as supplemental appropriations for certain Title XIX programs.
- 6. \$41.4 million increase to the Department of Administration's original budget is primarily due to supplemental appropriation increases for the replacement of the State's financial and accounting system.

The actual expenditures were less than the final budget by \$1.1 billion, after adjustments. Of this amount, \$119.1 million will continue as legislative multiple fiscal year spending authority for fiscal years 2016 and beyond, depending upon the budgetary guidelines of the Legislature. The remaining \$1.0 billion represents the unused portion of the State's legislatively authorized annual operating budget.

Additional budgetary information can be found on pages 141-151 of this report.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital assets:

The State's investment in capital assets for its governmental and business-type activities as of June 30, 2015 totaled \$27.1 billion, net of accumulated depreciation. The total primary government increase in capital assets for the current period was 4%, with a 3% increase in capital assets used for governmental activities and an 8% increase for business-type activities. Depreciation charges of the governmental and business-type activities for the fiscal year totaled \$412.0 million.

Major capital asset activity during the current fiscal year included the following:

- The Universities' additions to capital assets totaled \$639.7 million and included increased investments in buildings to support instruction, research, and public service missions, as well as building renewal and other capital projects.
- The ADOT started or completed roads and bridges totaling \$2.6 billion during the fiscal year.

For the government-wide financial statement presentation, all depreciable assets were depreciated from the acquisition date to the end of the current fiscal year. Capital asset purchases of the governmental funds are reported in the fund-level financial statements as expenditures.

Capital assets for the governmental and business-type activities as of June 30, 2015 are presented below (expressed in thousands):

	Government	al Activities	Business-typ	e Activities	Total		
	2015	2014	2015	2014	2015	2014

^{*} The fiscal year 2014 amounts have been reclassified for comparison with fiscal year 2015 amounts.

As provided by GASB Statement No. 34, the State has elected to record its infrastructure assets, which the ADOT is responsible for maintaining, using the modified approach as described in Note 1.G. Assets accounted for under the modified approach include 6,800 center lane miles of roads (21,390 travel lane miles) and 4,798 bridges.

The State manages its roads using the Present Serviceability Rating (PSR), which measures the condition of the pavement and its ability to serve the traveling public. The PSR uses a five-point scale (5 excellent, 0 impassable) to characterize the condition of the roadway. The State's serviceability rating goal is 3.23 for the overall system. The most recent assessment indicated that an overall rating of 3.68 was achieved for fiscal year 2015.

The State manages its bridges using the Arizona Bridge Information and Storage System. The State determines the condition rating based on standards developed by the Federal Highway Administration and additional internal criteria. It is the policy of the State to maintain a Condition Rating Index (CRI) of 92.5% or better. In fiscal year 2015, a CRI of 93.5% was achieved.

In addition to many smaller projects, each of the following major highway construction projects in excess of \$10.0 million were started during fiscal year 2015 (expressed in thousands):

	Contract	Contract	Current Year
Description	Start Date	Amount	Expenditures
Capacity additions/reconstruction/emergency reconstruction on US 89	7/11/2014	\$ 22,252	\$ 24,979
Addition of general purpose lanes on State Route 202, State Route 101 to			
Broadway Road	9/12/2014	109,177	99,412
Traffic interchange at State Route 303 and US 60	11/14/2014	46,062	20,049

Colorado River	10/11/2013	15,614

More detailed information regarding capital assets is on pages 90 and 91.

Long-term debt:

The State issues no general obligation debt instruments. The Arizona Constitution, under Article 9, Section 5, provides that the State may contract debts not to exceed \$350 thousand. This provision has been interpreted to restrict the State from pledging its credit as a sole payment for debts incurred for the operation of the State government. As a result, the State pledges either dedicated revenue streams or the constructed building or equipment acquired as security for the repayment of long-term debt instruments.

Major long-term debt activity during the current fiscal year included the following:

- The ADOT issued revenue refunding bonds totaling \$754.3 million to refinance existing debt to obtain debt service savings by taking advantage of lower market interest rates.
- The Universities issued revenue bonds for \$705.8 million to fund the acquisition, construction, or renovation of capital facilities and infrastructure, and to refinance existing debt to obtain debt service savings by taking advantage of lower market interest rates. Additionally, the Universities issued \$206.7 million refunding certificates of participation to obtain debt service savings by taking advantage of lower market interest rates.

State of Arizona-Primary Government Outstanding Major Long-Term Debt as of June 30, 2015 (expressed in thousands)

More detailed information regarding long-term debt begins on page 107.

ECONOMIC CONDITION AND OUTLOOK

The Office of Employment and Population Statistics within the Department of Administration is forecasting the State to gain a projected 156,535 nonfarm jobs, representing annual growth rate of 2.8%, over the two-year projected employment period of 2015 (quarter 3) to the 2017 (quarter 2).

The State's fiscal year 2016 General Fund budget reflects projected growth in base revenues of 3.8%. The net ongoing revenues are projected to decrease from \$9.4 billion in fiscal year 2015 to \$9.1 billion in fiscal year 2016. General Fund spending is projected to decrease from \$9.3 billion in fiscal year 2015 to \$9.1 billion in fiscal year 2016. The budget includes decreased spending by the Universities for lump sum reductions by campus, reductions to local jurisdictions by shifting the Department of Revenue costs to counties and cities, and shifting the Department of Juvenile Corrections costs to counties, and reductions of net administrative adjustment spending and revertments. The General Fund fiscal year 2016 ending balance is projected to be a \$35 million shortfall. However, General Fund revenue collections have been stronger than forecast. These gains have the potential to at least offset the \$35 million shortfall.

Legislative discussions on the fiscal year 2016 General Fund budget also included analyzing the impact of budget decisions on estimated fiscal year 2017 and 2018 spending.

The fiscal year 2017 General Fund budget is forecasted to have revenues of \$9.3 billion and expenditures of \$9.3 billion, with a \$23 million shortfall. After accounting for legislation enacted separately from the budget and technical adjustments, fiscal year 2017 revenues are projected to be \$9.2 billion compared to the same spending of \$9.3 billion. The fiscal year 2017 shortfall is estimated to be \$50 million, assuming the \$35 million fiscal year 2016 shortfall is separately resolved. The structural shortfall for fiscal year 2017 is estimated to be \$150 million. The fiscal year 2017 spending includes statutory formula caseload growth and annualization of new policy changes. Fiscal year 2017 ongoing revenues are primarily based on a 4-sector consensus growth rate of 4.4%, but also incorporate separately enacted tax law changes.

The fiscal year 2018 General Fund budget is forecasted to have revenues of \$9.6 billion and expenditures of \$9.5 billion, with a \$27 million surplus. After accounting for legislation enacted separately from the budget and technical adjustments, fiscal year 2018 revenues are projected to be \$9.5 billion compared to the same spending of \$9.5 billion. The fiscal year 2018 shortfall is estimated to be \$8 million, assuming the \$50 million fiscal year 2017 shortfall is separately resolved. The structural shortfall for fiscal year 2018 is also estimated to be \$8 million. The fiscal year 2018 spending includes statutory formula caseload growth. There are no new policy issues with incremental fiscal year 2018 costs or savings. Fiscal year 2018 ongoing revenues reflect the 4-sector consensus growth rate of 5.1%, further adjusted for previously enacted tax law changes.

The Budget Stabilization Fund is expected to have a balance of \$460 million at the end of fiscal year 2016, which could be used to offset any shortfall in fiscal year 2017 or 2018.

CONTACTING THE STATE COMPTROLLER'S OFFICE

This financial report is designed to provide citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Department of Administration, General Accounting Office, Financial Reporting Section at (602) 542-5405. You may also access and print this report at http://www.gao.az.gov/financials/.

The State's component units issue their own separately issued audited financial statements. These statements may be obtained by directly contacting the component unit. Contact information regarding the component units begins on **page 65**.

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET TO THE STATEMENT OF NET POSITION

JUNE 30, 2015

(Expressed in Thousands)

Total fund balances - governmental funds	\$	7,594,269
Amounts reported for governmental activities in the Statement of Net Position are different because:		
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the governmental funds.		22,154,653
Certain revenues collected after year-end are not available soon enough to pay for current period expenditures and, therefore, are reported as unavailable deferred inflows of resources in the governmental funds.		850,909
Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Position.		(247,730)
The allocation of the internal service fund accumulated net gain results in an amount due to business-type activities, which is not reported in the governmental funds.		(79,709)
Deferred outflows of resources are applicable to future reporting periods and, therefore, are not reported in the governmental funds. These amounts consist of:		
Loss on refunding of debt	89,322	
Related to pensions	642,376	731,698
Certain liabilities and related accrued interest are not due and payable from current financial resources and, therefore, are not reported in the governmental funds. These amounts consist of:		
Net OPEB	(17,809)	
Net pension	(3,563,991)	
Revenue bonds	(3,141,190)	
Grant anticipation notes	(194,670)	
Certificates of participation	(2,030,805)	
Accrued interest on certificates of participation	(26,992)	
Capital leases	(402,841)	
Installment purchase contracts	(349)	
Notes payable Premium on debt	(22,179)	
Compensated absences	(492,048) (169,022)	
Pollution remediation obligations	(19,713)	(10,081,609)
Tonution remediation obligations	(17,713)	(10,001,00))
Accrued liabilities for AHCCCS programmatic costs and reimbursements are not due		
and payable from current financial resources and, therefore, are not reported in the		
governmental funds.		(249,581)
Deferred inflows of resources related to pensions are applicable to future reporting		
periods and, therefore, are not reported in the governmental funds.	_	(398,044)
Net position of governmental activities	\$	20,274,856

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

FOR THE YEAR ENDED JUNE 30, 2015

(Expressed in Thousands)

Net change in fund balances - total governmental funds	\$ 244,622

Amounts reported for governmental activities in the Statement of Activities are different because:

Capital outlays are reported as expenditures in governmental funds. However, in the Statement of Activities, the cost of assets is allocated over their estimated useful lives and reported as depreciation expense. Also, infrastructure was adjusted to primarily reflect reduction in construction in progress resulting from certain infrastructure projects being reclassified from capital outlay to non-capital. This is the amount by which capital outlays exceeded depreciation and infrastructure adjustments in the current period.

Conital outlas

Capital outlay	163,920	
Infrastructure adjustment	(51,430)	
Depreciation expense	(119,086)	613,410

792 026

The net expense of the internal service funds allocable to governmental activities is included in the Statement of Activities. (34,054)

Net change in certain revenues reported in the Statement of Activities do not provide current financial resources and, therefore, are reported as unavailable deferred inflows of resources in the governmental funds.

Sales taxes	9,664	
Income taxes	31,674	
Operating grants	(89,593)	
Other revenue	138	(48,117)

Trust land sales are financed with long-term mortgages. In the Statement of Activities, the gain on sale of trust land is reported, whereas in the governmental funds, the proceeds from the collection of mortgage payments are reported. In fiscal year 2015, mortgage payments received exceeded gains resulting from current year land sales. In addition, accrued interest on land sales contracts is reported as revenues in the Statement of Activities but are not reported as revenues in the governmental funds.

Excess of mortgage receipts over gain on sale of land	(26,252)	
Accrued interest on land sales' contracts	9,486	(16,766)

Pension contributions are reported as expenditures in the governmental funds in the fiscal year contributed. However, current year contributions are reported as deferred outflows of resources in the Statement of Net Position because the reported net pension liability is measured a year before the State's current fiscal year-end financial statements. Pension expense, which is the change in the net pension liability adjusted for changes in deferred outflows and inflows of resources related to pensions, is reported in the Statement of Activities.

Pension contributions made during fiscal year 2015	230,075	
Pension expense and pension-related grant expense	(414,141)	(184,066)

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

FOR THE YEAR ENDED JUNE 30, 2015

(Expressed in Thousands)

Certain expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds.

	AHCCCS accrued programmatic costs	106,400	
	Compensated absences	(4,116)	
	Pollution remediation obligations	808	
	Interest on long-term obligations	1,397	
	OPEB obligations	(17,809)	
	Other expenses	(12,655)	74,025
Bond proceeds provide curr	ent financial resources to the governmental funds; however,		
issuing debt increases long	e-term liabilities in the Statement of Net Position. In the current		
period, proceeds were rece	ived from:		
	Refunding bonds issued	(754,285)	
	Proceeds from notes and loans	(783)	
	Premium on debt issued	(149,554)	(904,622)
Repayment of long-term del	bt is reported as an expenditure in the governmental funds, but		
	g-term liabilities and deferred outflows of resources in the		
• •	Governmental funds report the effect of premiums,		
	ns when debt is issued, whereas these amounts are amortized		
	ies. In the current year, these amounts consist of:		
	Debt service principal	560,497	
	Payment to refunded bond escrow agent	900,813	
	Debt premium/discount amortization	49,226	
	Amortization of deferred losses on refundings	(10,621)	1,499,915
Some capital asset additions	s were financed through capital leases and installment purchase

STATE OF ARIZONA NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2015

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Arizona (the State) conform to U.S. Generally Accepted Accounting Principles (U.S. GAAP) applicable to governmental units adopted by the Governmental Accounting Standards Board (GASB).

A. REPORTING ENTITY

The State is a general purpose government. The accompanying financial statements present the activities of the State (the primary government) and its component units. Component Units' footnote disclosures are presented in Note 16 – *Discretely Presented Component Unit Disclosures*.

Component Units

Component units are legally separate entities for which the State is considered to be financially accountable, or organizations that raise and hold economic resources for the direct benefit of the State. Blended component units, although legally separate entities, are in substance, part of a government's operations. Therefore, data from these units is combined with data of the primary government. Discretely presented component units of the State, except for component units affiliated with the State's Universities, are reported in a separate column in the government-wide financial statements to emphasize they are legally separate from the State. Because the component units affiliated with the Universities follow Financial Accounting Standards Board (FASB) statements, these financial statements have been reported on separate pages following the respective counterpart financial statements of the State. For financial reporting purposes, only the statement of financial position and the statement of activities for component units affiliated with the Universities are included in the State's financial statements, as required by the GASB.

GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. Where the State does not appoint a voting majority of an organization's governing body, GASB requires inclusion in the reporting entity if it is fiscally dependent on the State and there is a potential for the organization to either provide specific financial benefits to, or to impose specific financial burdens on, the State. Further, component units can be other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial statements to be misleading.

In addition, GASB requires that legally separate, tax-exempt entities that meet *all* of the following criteria should be discretely presented as component units: (1) The economic resources received or held by the separate organization are entirely or almost entirely for the direct benefit of the primary government, its component units, or its constituents, (2) The primary government, or its component units, is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization, and (3) The economic resources received or held by an *individual organization* that the specific primary government, or its component units, is entitled to, or has the ability to otherwise access, are significant to that primary government.

The Northern Arizona Capital Facilities Finance Corporation (NACFFC) is blended with the Universities financial statements. The NACFFC was established for the purpose of acquiring, developing, constructing, and operating student housing and other capital facilities and equipment for the use and benefit of Northern Arizona University's (NAU) students. The NACFFC's debt outstanding is expected to be repaid entirely or almost entirely with resources from the NAU.

The State reports the following component units as fiduciary funds:

The Arizona State Retirement System (ASRS) is a cost-sharing, multiple-employer, pension plan that benefits employees of the State and participating political subdivisions and school districts. The ASRS is administered in accordance with provisions of Arizona Revised Statutes (A.R.S.) Title 38, Chapter 5, Articles 2 and 2.1. The ASRS is governed by a nine-member board that is appointed by the Governor and approved by the Senate to serve three-year terms. The State has the ability to impose its will on the ASRS as the State Legislature can modify the plan design and benefits. Additionally, per A.R.S. § 38-721, the State Legislature appropriates monies to pay for the administrative expenses of the ASRS. Complete financial statements may be obtained from the ASRS's administrative office at P.O. Box 33910, Phoenix, AZ 85067-3910, (602) 240-2000, or its website at www.azasrs.gov.

The Public Safety Personnel Retirement System (PSPRS) is an agent, multiple-employer public employee retirement system that benefits public safety employees of certain State, county, and local governments. The PSPRS is jointly administered by the Board of Trustees and 237 local boards according to the provisions of A.R.S. Title 38, Chapter 5, Article 4. The Board of Trustees is a seven-member board appointed by the Governor and approved by the Senate to serve a fixed five-year term. The State has the ability to impose its will on the PSPRS as the State Legislature can modify the plan design and benefits. Each eligible group participating in the system has a five-member local board. In general, all members serve a fixed four-year term. Complete financial statements may be obtained from the PSPRS's administrative office at 3010 East Camelback Road, Suite 200, Phoenix, AZ 85016-4416, (602) 255-5575, or its website at www.psprs.com.

The Elected Officials' Retirement Plan (EORP) is a cost-sharing, multiple-employer public employee retirement plan that benefits elected officials and judges of certain State, county, and local governments who were members of the plan on December 31, 2013. As part of the 2013 Fifty-first Legislature, House Bill 2608 effectively closed the EORP to new members and created the Elected Officials' Defined Contribution Retirement System, with an effective date of January 1, 2014. The Board of Trustees of the PSPRS administers the EORP plan according to the provisions of A.R.S. Title 38, Chapter 5, Article 3. The State has the ability to impose its will on the EORP as the State Legislature can modify the plan design and benefits. Complete financial statements may be obtained from the PSPRS's administrative office at 3010 East Camelback Road, Suite 200, Phoenix, AZ 85016-4416, (602) 255-5575, or its website at www.psprs.com.

The Corrections Officer Retirement Plan (CORP) is a multiple-employer public employee retirement plan that benefits prison and jail employees of certain state, county, and local governments. CORP includes a cost-sharing multiple-employer plan for Administrative Office of the Courts (AOC) probation officers and an agent multiple-employer plan for all other members. The Board of Trustees of the PSPRS, 26 local boards of the CORP, and 15 local boards of the AOC administer the plans according to the provisions of A.R.S. Title 38, Chapter 5, Article 6. The State has the ability to impose its will on the CORP and AOC as the State Legislature can modify the plans design and benefits. Complete financial statements may be obtained from the PSPRS's administrative office at 3010 East Camelback Road, Suite 200, Phoenix, AZ 85016-4416, (602) 255-5575, or its website at www.psprs.com.

The State reports the following discretely presented component units:

Major Component Unit:

Water Infrastructure Finance Authority (WIFA) – The WIFA is authorized to administer the Clean Water Revolving Fund. The Clean Water Revolving Fund was created pursuant to the Federal Water Pollution Control Act, which required the State to establish the Clean Water Revolving Fund to accept federal capitalization grants for publicly owned wastewater treatment projects. The WIFA has also entered into an agreement with the U.S. Environmental Protection Agency to administer the Drinking Water Revolving Fund pursuant to the Safe Drinking Water Act. The WIFA is governed by a twelve-member board of directors. The seven Governor appointed directors serve staggered terms of five years and serve at the pleasure of the Governor; thus, the State has the ability to impose its will on WIFA. Complete financial statements may be obtained from the WIFA's administrative office at 1110 West Washington Street, Suite 290, Phoenix, AZ 85007, (602) 364-1324.

Non-major Component Units:

Greater Arizona Development Authority (GADA) – The purpose of the GADA is to provide cost-effective access to capital for local communities, certain special districts, and tribal governments for public infrastructure projects. The GADA is governed by a nine-member Board of Directors consisting of four State of Arizona agency heads and five members, one of which shall be a representative of a tribal nation in Arizona, appointed by the Governor of the State. Members appointed by the Governor serve staggered five-year terms. A financial benefit/burden relationship exists between the State and GADA as its fund was originally capitalized with General Fund appropriations and the State Legislature has swept monies from its fund over the years to balance the State's budget. Complete financial statements may be obtained from the GADA's administrative office at 1110 West Washington Street, Suite 290, Phoenix, AZ 85007, (602) 364-1324.

Rio Nuevo Multipurpose Facilities District (Rio Nuevo) – The Rio Nuevo was established in 1999 with the passage of Proposition 400 by the voters in the Cities of Tucson and South Tucson. Under applicable A.R.S., the District can utilize tax incremental financing to help develop multipurpose facilities in the downtown Tucson area. The Rio Nuevo is governed by a nine-member board of directors, with five members appointed by the Governor, two members appointed by the President of the Senate, and the remaining two members appointed by the Speaker of the House of Representatives. All board of directors can be removed at will; thus, the State has the ability to impose its will on Rio Nuevo. Complete financial statements may be obtained

from Rio Nuevo's administrative office at 400 West Congress, Suite 152, Tucson, AZ 85701, (520) 623-7336, or its website at www.rionuevo.org.

Arizona Power Authority (APA) – The APA purchases the State's allocation of power produced at the federally owned Boulder Canyon Project hydropower plant and resells it to Arizona entities that are eligible purchasers under federal and state laws. The APA is governed by a commission of five members appointed by the Governor and approved by the Senate. The term of office of each member is six years and the members select a chairman and vice-chairman from among their membership for a term of two years. The APA is required to follow specific State policies; thus, the State has the ability to impose its will on APA. Complete financial statements may be obtained from the APA's administrative office at 1810 West Adams Street, Phoenix, AZ 85007-2679, (602) 368-4265.

Arizona Commerce Authority (ACA) – The ACA is charged with the following responsibilities: job creation and expansion of capital investment through business attraction, expansion and retention, including business incubation and entrepreneurship; creation, monitoring, and execution of a comprehensive economic and workforce strategy; management and administration of economic development and workforce programs; providing statewide marketing leadership; utilization of all means necessary, prudent and practical to integrate private sector-based innovation, flexibility, focus and responsiveness; and advancement of public policy to meet the State's economic development objectives. The ACA is governed by a nineteen member board of directors consisting of the Governor serving as Chairperson, a Chief Executive Officer, and seventeen members consisting of private sector business leaders serving staggered three-year terms, of which, nine are appointed by the Governor, four are appointed by the President of the Senate, and the other four are appointed by the Speaker of the House of Representatives. A financial benefit/burden relationship exists between the State and ACA as its primary funding source is the allocated State General Fund withholding tax revenues received in each fiscal year according to A.R.S. § 43-409. Complete financial statements may be obtained from the ACA's administrative office at 333 North Central Avenue, Suite 1900, Phoenix, AZ 85004, (602) 845-1200.

Component units of the State affiliated with the Universities are legally separate, tax-exempt organizations controlled by separate boards of directors that meet the criteria established in GASB, with the exception of Downtown Phoenix Student Housing, LLC, the ASU Preparatory Academy, Inc. (ASU Prep), and Campus Research Corporation (CRC). The Downtown Phoenix Student Housing, LLC is included due to the nature and significance of the financial arrangement that it has with the State and that the State believes would be misleading to exclude. The ASU Prep is included because of its close affiliation to the State and that the State believes it would be misleading to exclude. The CRC is included because the U of A approves the budget and can access its resources.

The following discretely presented component units of the State affiliated with the Universities are reported as *major* component units:

Arizona State University Foundation for a New American University (ASU Foundation) – The ASU Foundation's resources are disbursed at the discretion of the ASU Foundation's independent board of directors, in accordance with donor directions and the ASU Foundation policy. The directors of the ASU Foundation make all decisions regarding the ASU Foundation's business affairs, including distributions made to the ASU. The economic resources held by the ASU Foundation are significant to the ASU and are entirely for the benefit of the ASU.

Arizona Capital Facilities Finance Corporation (ACFFC) – The ACFFC provides facilities for use by students of ASU or ASU itself. A fiscal dependency and financial benefit/burden relationship exists between the ACFFC and the ASU.

University of Arizona Foundation (U of A Foundation) – The U of A Foundation supports the U of A through various fundraising activities and contributes funds to the U of A in support of various programs. The restricted resources held by the U of A Foundation are significant to the U of A and can only be used by, or for the benefit of, the U of A or its constituents.

The following discretely presented component units of the State affiliated with the Universities are reported as *non-major* component units:

Arizona State University Alumni Association, Sun Angel Foundation, and Sun Angel Endowment – These three component units of the State affiliated with the Universities receive funds primarily through donations, dues, and/or affinity partners and contribute funds to ASU for support of various programs. The economic resources held by these three component units are significant to the ASU and are entirely for the benefit of the ASU.

Arizona State University Research Park, Inc. (ASU Research Park) – The ASU Research Park manages a research park to promote and support research activities in coordination with ASU. In developing the research park, bonds were issued that are guaranteed by the ASU. A fiscal dependency and financial benefit/burden relationship exists between the ASU Research Park and the ASU.

Thunderbird School of Global Management (Thunderbird) – Thunderbird offers non-degree programs focused on global business across cultural, ethical, and multi-lingual curriculum. A fiscal dependency and financial benefit/burden relationship exists between the Thunderbird and the ASU.

Downtown Phoenix Student Housing, LLC – This component unit of the State affiliated with the Universities provides housing facilities for use by students of the ASU.

ASU Prep – The ASU Prep prepares Arizona K-12 students for success with a university-embedded academic program that empowers them to complete college, compete globally, and contribute to their communities.

University of Arizona Alumni Association (U of A Alumni Association) – The U of A Alumni Association was established to serve the U of A and its graduates, former students, and friends by attracting, organizing, and encouraging them to advance the U of A's missions - teaching, research, and public service. The economic resources held by the U of A Alumni Association are significant to the U of A and are entirely or almost entirely for the benefit of the U of A.

University of Arizona Law College Association (Law Association) – The Law Association was established to provide support and financial assistance to the College of Law at the U of A. The Law Association funds provide support to the College on many levels, from endowed student scholarships to named faculty professorships. The economic resources held by the Law Association are significant to the U of A and are entirely or almost entirely for the benefit of the U of A.

University of Arizona Campus Research Corporation (CRC) – The CRC was established to assist the U of A in the acquisition, improvement, and operation of the U of A Science and Technology Park (Tech Park) and related properties. The CRC currently leases from the U of A the remaining 67% of building space of the Tech Park not leased to the Arizona Research Park Authority. The CRC is responsible for assisting in the development of the presently undeveloped portions of the Tech Park and for subleasing unoccupied space, newly developed space, and space now occupied by IBM or its subtenants once the current subleases expire. The U of A is responsible for payment of operational expenses associated with the space occupied by the U of A departments, offices, and programs.

University of Arizona Eller Executive Education (EEE) – The EEE was established to advance the missions of the Eller College of Management and the U of A through noncredit, non-degree programs for business, government, and nonprofit leaders. The U of A president appoints all EEE board members and can remove any member at will; thus, the U of A can impose its will on the EEE.

Northern Arizona University Foundation, Inc. (NAU Foundation) – The NAU Foundation receives gifts and bequests, administers and invests in securities and property, and disburses payments to and on behalf of NAU for advancement of its mission. The restricted resources of the NAU Foundation can only be used by, or for the benefit of NAU or its constituents.

Northern Arizona Real Estate Holdings, LLC, (NAREH) – The NAREH is a wholly owned subsidiary of the NAU Foundation and was established to construct, develop, equip, operate, maintain, lease, and hold real estate investments on behalf of the NAU Foundation.

NAU Ventures, LLC (NAUV) – The NAUV is a wholly owned subsidiary of the NAU Foundation and was established to license, or otherwise commercialize the intellectual property owned or controlled by the Arizona Board of Regents, the NAU, or the NAU Foundation.

Complete financial statements for each of the aforementioned component units, except for the U of A Foundation, may be obtained as follows:

ASU Foundation, ACFFC, ASU Alumni Association, Sun Angel Foundation, Sun Angel Endowment, ASU Research Park, Thunderbird, Downtown Phoenix Student Housing, LLC, and the ASU Prep – contact ASU Financial Services at (480) 965-3601

U of A Alumni Association - Alumni Association, The University of Arizona, P.O. Box 210109, Tucson, AZ 85721-0109

Law Association – Law College Association, James E. Rogers College of Law at the University of Arizona, 1201 E. Speedway Blvd., Tucson, AZ 85721-0176

CRC - The University of Arizona Science and Technology Park, 9070 South Rita Road, Suite 1750, Tucson, AZ 85747

EEE - Eller Executive Education, P.O. Box 210108, Tucson, AZ 85721-0108

NAU Foundation, NAREH, NAUV, and NACFFC - Northern Arizona University, Comptroller's Office, P.O. Box 4069, Flagstaff, AZ 86011

The financial statements of the U of A Foundation are not publicly available. For information regarding the U of A Foundation's financial statements, contact the U of A Comptroller at the following address: University of Arizona, Financial Services, 1303 E. University Blvd., Box 4, Tucson, AZ 85719-0521.

Related Organizations

Related organizations are legally separate entities for which the State is not considered to be financially accountable, and that do not meet the criteria established by GASB for inclusion. The State's accountability for these organizations does not extend beyond making the appointments, nor are the economic resources accessible to the State. As a result, financial activity for the organizations described below is not included in the State's financial statements.

Arizona Health Facilities Authority (the Authority) – A.R.S. § 36-482 established the Authority to issue tax-exempt bonds and loans for the purpose of improving health care for Arizona residents by providing less expensive financing for health care facilities. Proceeds from bond issues are loaned to various qualifying health care organizations. The health care organizations reimburse the Authority for expenses for issuance of the bonds, pay fees of the Authority, and make payments under the loans for the benefit of the holders of the bonds. The Authority is governed by a seven-member board of directors that is appointed by the Governor and approved by the Senate. The directors serve staggered terms of seven years, and can be removed for cause or at will by the Governor with the consent of the Senate. The State cannot abrogate the rights of the Authority until all bonds, together with the interest thereon, are fully paid and discharged and all agreements are fully performed.

Arizona International Development Authority (the Authority) – A.R.S. § 41-4502 established the Authority to facilitate the development of international trade or commerce between Arizona and other countries. The Authority is governed by a seven-member board of directors appointed by the Governor and approved by the Senate for five-year terms, and can be removed only for cause.

Arizona Sports and Tourism Authority (the Authority) – A.R.S. § 5-802 established the Authority to construct, finance, furnish, maintain, improve, operate, market, and promote the use of a multipurpose facility and do all things necessary or convenient to accomplish those purposes. The Authority may issue revenue bonds in such principal amounts to accomplish the above stated purposes. The Authority is governed by a nine-member board of directors of which five are appointed by the Governor and approved by the Senate and two members each by the President of the Senate and the Speaker of the House. The directors serve terms of five years, may be re-appointed for one full subsequent term, and can be removed only for cause.

Arizona Housing Finance Authority (the Authority) – A.R.S. § 41-3902 established the Authority to issue bonds for residential dwelling units and multifamily residential rental projects in rural areas. The Authority may also establish mortgage credit certificate programs to finance residential dwelling units in rural areas. The Authority shall notify a city, town, county, tribal government, or existing corporation (as defined in A.R.S. § 35-701) that a multifamily residential rental project is planned for its jurisdiction and, before proceeding, shall obtain written consent from the governing body of the city, town, county, or tribal government. The Authority is governed by a seven-member board of directors that is appointed by the Governor and approved by the Senate. The directors serve terms of seven years, and can be removed only for cause.

Joint Ventures

As described in Note 12, the U of A participates in joint ventures. In accordance with U.S. GAAP, the financial activities of these joint ventures are not included in the State's financial statements.

B. BASIS OF PRESENTATION

The basic financial statements include both government-wide statements and fund financial statements. The government-wide statements focus on the State as a whole, while the fund financial statements focus on major funds. Each presentation provides valuable information that can be analyzed and compared between years and between governments to enhance the usefulness of the information.

Government-wide statements provide information about the primary government and its component units. The statements include a statement of net position and a statement of activities. These statements report the financial activities of the overall government, except for fiduciary activities. They also distinguish between the governmental and business-type activities of the State and between the State and its discretely presented component units. Governmental activities generally are financed through taxes and intergovernmental revenues. Business-type activities are financed in whole or in part by fees charged to external parties.

The **Statement of Net Position** presents the State's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position. The total of assets and deferred outflows of resources, minus the total of liabilities and deferred inflows of resources, is reported as net position. Both the governmental and business-type activities are presented on a consolidated basis by column.

The **Statement of Activities** presents a comparison between direct expenses and program revenues for each function of the State's governmental activities, and its different business-type activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular program or function. The State does not allocate indirect expenses to programs or functions.

Program revenues include:

- charges to customers or applicants for goods, services, privileges provided, and fines or forfeitures
- operating grants and contributions
- capital grants and contributions, including special assessments

Revenues that are not classified as program revenues, including internally dedicated resources and all taxes, are reported as general revenues.

Interfund balances have been eliminated from the government-wide financial statements to the extent that they occur within either the governmental or business-type activities. Balances between governmental and business-type activities are presented as internal balances and are eliminated in the total column. Revenues and expenses associated with reciprocal transactions within governmental or within business-type activities have not been eliminated.

Fund financial statements provide information about the State's funds, including fiduciary funds. Separate statements are presented for the governmental, proprietary, and fiduciary fund categories. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as non-major funds. Fiduciary funds are aggregated and reported by fund type.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The State reports the following major governmental funds:

The General Fund – is the State's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The Transportation and Aviation Planning, Highway Maintenance and Safety Fund – accounts for all financial transactions applicable to the general operations of the Arizona Department of Transportation (ADOT). The ADOT builds and maintains the

State's highway system and the Grand Canyon Airport. The fund primarily receives revenues from motor vehicle and fuel taxes and federal grants.

The Land Endowments Fund – holds lands granted to the State by the Federal government for the benefit of public schools and other public institutions. Principal is maintained intact and investment earnings and lease revenues are distributed to beneficiaries in accordance with State statute.

The State reports the following major enterprise fund:

The Universities – account for transactions of the State's three universities, which comprise the State's university system.

Additionally, the State reports the following fund types:

Internal Service Funds – account for insurance coverage, employee benefits, automotive maintenance and operation, highway equipment rentals, and data processing and telecommunication services provided to State agencies on a cost-reimbursement basis. It is the policy of the State to classify immaterial proprietary fund activities in governmental funds. This policy helps to reduce the number of funds reported in the financial statements to the minimum amount needed. These funds allocate a fixed rate payroll processing charge among all agencies, allocate postage and mailing costs among all agencies, or arrange for the sale of the State's office equipment and motorized vehicles at public auctions.

Pension and Other Employee Benefit Trust Funds – account for the activities of the ASRS, the PSPRS, the EORP, and the CORP, for which the State acts as a trustee. These retirement and other post-employment benefit plans accumulate resources to pay pension, health insurance premium subsidies, and long-term disability benefits of State employees and employees of other governmental entities participating in the plans.

Investment Trust Funds – account for transactions by local governments and political subdivisions that elect to participate in the State Treasurer's investment pools. The Treasurer acts as trustee for the original deposits made into the investment pools.

Agency Funds – account for the receipt and disbursement of various taxes, deposits, deductions, and property collected by the State.

C. MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

The government-wide, proprietary fund, and fiduciary fund financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. However, the agency funds are custodial in nature and do not have a measurement focus. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Grants and donations are recognized as revenues as soon as all eligibility requirements the provider imposed have been met.

Governmental funds in the fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The State considers all revenues reported in the governmental funds to be available if the revenues are collected within 60 days after year-end. Those revenues susceptible to accrual are federal reimbursements, highway user revenue tax, and state sales tax. Expenditures are recorded when the related fund liability is incurred, except for net pension liability, principal and interest on long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they are due and payable. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of long-term debt and acquisitions under capital leases are reported as other financing sources.

When an expense is incurred for purposes for which restricted and unrestricted net position are available, the State considers restricted and unrestricted amounts to have been spent in that order.

D. DEPOSITS AND INVESTMENTS

1. Cash and Cash Equivalents

On the Statement of Cash Flows, the amount reported as "Cash and Cash Equivalents" is equal to the total of the amounts on the Statement of Net Position (unrestricted/restricted) "Cash", "Cash with U.S. Treasury", "Cash and pooled investments with State Treasurer", "Cash held by trustee" and "Collateral investment pool". For purposes of the Statement of Cash Flows, the State considers only those highly liquid debt instruments with an original maturity of ninety days or less to be cash equivalents.

- Cash (not with State Treasurer) includes un-deposited receipts, petty cash, bank accounts, non-negotiable certificates of deposit, and demand deposits with banking institutions other than the State Treasurer.
- Cash with U.S. Treasury consists of unemployment compensation contributions from Arizona employers that are deposited in a trust fund maintained by the United States Treasury.
- Cash and pooled investments with State Treasurer consists of a centralized management of most State cash resources maintained by the State Treasurer. From the perspective of the various State funds, the pool functions as both a cash management pool and a demand deposit account. The operations and investments of the State Treasurer's pooled investments are described in Note 2.
- Cash held by trustee consists of capital projects and bond debt service funds invested by the trustee in accordance with the applicable financing indenture, generally limited to United States Treasury securities and other Federal agency securities, certificates of deposit, commercial paper, and money market funds.
- Collateral investment pool consists of cash received as collateral on securities lending transactions and investments made with that cash. The State records the collateral received as an asset. A corresponding liability is also recorded for such securities lending transactions.

2. Investment Valuation

Investments maintained by the State Treasurer are reported at fair value using State Street prices, as determined by independent, industry recognized data vendors who provide values that are either exchange based or matrix based. Equities are priced utilizing the primary exchange closing price. All bonds are priced using an evaluated bid, except securities with a remaining maturity of 90 days or less are priced at amortized cost (amortizing premium/accreting discount on a straight-line to maturity method). The evaluated bid is based on a compilation of primary observable market information or a broker quote in a non-active market.

The ASRS' publicly traded investments are reported at fair value determined by the custodial agents. The agents' determination of fair values includes, among other things, using pricing services or prices quoted by independent brokers at current exchange rates. ASRS' derivative instruments, which consist of futures, forward contracts, options, swaps, rights, and warrants, are measured at fair value. Changes in fair values of derivative instruments are reported as net increase (decrease) in fair value of investments. The fair value of limited partnership investments are based on estimated current values and accepted industry practice. Fair value is based on estimates and assumptions from information and representations provided by the respective general partners, in the absence of readily ascertainable fair values. Short-term investments are reported at cost plus accrued interest, which approximates fair value. For investments where no readily ascertainable fair value exists, the ASRS, in consultation with its investment advisors, has determined the fair values for the individual investments based on anticipated maturity dates and current interest rates commensurate with the investment's degree of risk. Interest income is recorded on the accrual basis and dividends are recorded on the ex-dividend date. Security transactions and any resulting gains or losses are accounted for on a trade date basis.

For the PSPRS, the EORP, and the CORP, investments are reported at fair value. Short term investments are reported at cost plus accrued interest. Equity securities are valued at the last reported sales price. Fixed income securities are valued using the last reported sales price or the estimated fair value as determined by the fixed income broker/dealers plus accrued interest. Investments in hedge funds are valued monthly at the last reported valuations. Limited partnership investments in credit opportunities, private equity, real assets, and real estate are valued on a quarterly or monthly basis at last reported valuations adjusted by any subsequent cash flows.

E. TAXES RECEIVABLE

Taxes receivable include amounts owed by taxpayers for prior periods including assessments for underpayments, penalties, and interest. In the government-wide financial statements, a corresponding amount is recorded as revenue using the accrual basis of accounting. In the governmental fund financial statements, revenue is recorded using the modified accrual basis of accounting. The remainder is recorded as deferred inflows of resources.

The income tax receivable is composed of individual and corporate estimated payments, withholding payments, and payments with final returns and assessments that relate to income earned through June 30, 2015. Sales and motor vehicle and fuel tax receivables represent amounts that are earned by the State in the fiscal period ended June 30, 2015, but not collected until the following month.

F. INVENTORIES

Inventories consist of expendable supplies held for consumption in all funds and merchandise intended for sale to customers in the proprietary funds. Inventories are stated at cost using the first-in, first-out method, weighted average, or lower of cost or market. In the governmental funds, inventories are accounted for using the consumption method. Under this method, inventories are recorded as expenditures as they are used.

G. CAPITAL ASSETS

Capital assets are stated at cost at the date of acquisition or, if donated, at the appraised or estimated fair value at the date received. Interest incurred during the construction of capital assets, net of interest earned on the invested proceeds over the same period, is only capitalized in the proprietary funds.

Most capital assets are depreciated over their estimated useful lives. However, the State reports most infrastructure assets using the modified approach, as provided by the GASB. Under this approach, rather than being depreciated, costs to maintain and preserve these assets are expensed. This approach is discussed further in the Required Supplementary Information portion of this report. The State has adopted a general policy for capitalization thresholds, depreciation, and estimated useful lives of capital assets. In addition, the State has approved alternative policies for some State agencies.

Depreciable capital assets are depreciated on a straight-line basis. Capitalization thresholds (the dollar values at which asset acquisitions are added to the capital asset accounts) and estimated useful lives of capital assets being depreciated in the government-wide financial statements and the proprietary funds are as follows:

	General S	tate Policy	Other Authorized A	Agency Policies
	Capitalization	Estimated Useful	Capitalization	Estimated Useful
Asset Category	Threshold	Life (years)	Threshold	Life (years)
Land	All capitalized	Not depreciated	All capitalized	Not depreciated
Buildings	All capitalized	25-40	\$0-\$100,000	10-50
Improvements other than buildings	\$5,000	15	-	-
Equipment	\$5,000	3-15	\$0-\$5,000	3-25
Infrastructure	All capitalized	Not depreciated	\$0-\$100,000	10-100
Software	\$1,000,000	5-10	\$1,000,000-\$5,000,000	5-10
Other intangibles	\$100,000	Varied	\$100,000	Varied

Other intangibles include non-software licenses and permits, patents, copyrights and trademarks, rights-of-way and easements, and natural resource extraction rights. These are amortized over the shorter of the legal or estimated useful life if the useful life is definite or limited. If the life is indefinite or unlimited, they are not amortized. In addition, rights-of-way and easements are amortized only if the value is separable from the underlying land and natural resource extraction rights are not amortized unless the value of the underlying asset is identifiable.

The State is trustee for approximately 9.2 million acres of land acquired through U.S. Government land grants in the early 1900's. The State acquired a substantial portion of this land at no cost and its fair value at acquisition has not been reliably estimated. Accordingly, this land is not reported in the accompanying financial statements.

The State has interest in and maintains significant special collections, works of art, and historical treasures. Except for ASU, all special collections, works of art, and historical treasures which are held for financial gain are capitalized at fair value at the date of acquisition or donation. Those special collections, works of art, and historical treasures which are held for educational, research, or public exhibition purposes are not capitalized, as they are not subject to disposal for financial gain or encumbrance. Such items are inventoried for property control purposes. ASU capitalizes all works of art and historical treasures with a unit cost of \$5,000 or more.

Additional disclosures related to capital assets and assets acquired through capital leases are provided in Notes 4 and 7, respectively.

H. DEFERRED OUTFLOWS OF RESOURCES

Deferred outflows of resources represent a consumption of net position by the government that applies to a future period and so will not be recognized as an outflow of resources (expense) until then. Deferred outflows of resources increase net position, similar to assets.

I. INVESTMENT EARNINGS

Investment earnings are composed of interest, dividends, and net changes in fair value of applicable investments.

J. SCHOLARSHIP ALLOWANCES

Student tuition and fee revenues, and certain other revenues earned by the three State Universities are reported net of scholarship discounts and allowances in the Statement of Revenues, Expenses and Changes in Fund Net Position. A scholarship discount and allowance is the difference between the stated charge for goods and services provided and the amount that is paid by the student or third party making payment on behalf of the student. Accordingly, some types of student financial aid such as fee waivers, Pell grants, and scholarships awarded by the Universities are considered to be scholarship allowances. These allowances are netted against applicable revenues in the Statement of Revenues, Expenses and Changes in Fund Net Position.

K. UNEARNED REVENUE

In the government-wide, governmental fund, and proprietary fund financial statements, unearned revenue is recorded when cash, receivables, or other assets are received prior to their being earned.

L. PENSIONS

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the pension plan's fiduciary net position and additions to/deductions from the plan's fiduciary net position have been determined on the same basis as they are reported by the plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

M. COMPENSATED ABSENCES

In the government-wide and proprietary fund financial statements, the State accrues liabilities for compensated absences as required by the GASB. In the governmental fund financial statements, liabilities for compensated absences are not accrued, because they are not considered due and payable.

In general, State employees accrue vested annual leave at a variable rate based on years of service. Except for uncovered State employees and University employees, an employee generally forfeits accumulated annual leave in excess of 240 hours as of the last day of the last pay period for a calendar year, unless the Director of the Department of Administration authorizes an exception. Uncovered State employees shall forfeit accumulated annual leave in excess of 320 hours as of the end of each calendar year, unless an exception is authorized. University employees may accumulate up to 264 hours of vacation, and any vacation hours in excess of the maximum amount that are unused at December 31 are forfeited. Except for University employees, an employee who separates from State employment is paid for all unused and unforfeited annual leave at the employee's rate of

pay at the time of separation. University employees, upon termination of employment, are paid all unused vacation benefits not exceeding 176 hours (annual accrual amount), depending on years of service and full-time equivalent employment status.

Some employees accumulate compensatory leave for time worked over 40 hours per week. An employee may accumulate up to 240 hours of compensatory leave (480 hours if working in a public safety activity or an emergency response activity). An employee who separates from State employment is paid for all unused compensatory leave at a rate of compensation not less than the higher of: (1) the average regular rate received by such employee during the last three years of employment or (2) the final regular rate received by such employee.

For sick leave policy, see Note 13.C.

N. LONG-TERM OBLIGATIONS

In the government-wide and proprietary fund financial statements, long-term debt and long-term liabilities are reported as liabilities. Amounts due within one year are reported as current liabilities, and amounts due thereafter are reported as non-current liabilities. Premiums and discounts on revenue bonds and COPs are deferred and amortized over the life of the debt instrument using the straight-line method or the effective interest method. Bonds and COPs are reported net of the applicable premium or discount.

In the fund financial statements, governmental fund types recognize proceeds from revenue bonds, COPs, other issuances, and premiums and discounts on debt as other financing sources and uses in the current period. Long-term liabilities are more fully described in Note 7.

O. DEFERRED INFLOWS OF RESOURCES

Deferred inflows of resources represent an acquisition of net position or fund balance that applies to a future period, and so will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources decrease net position or fund balance, similar to liabilities.

P. NET POSITION/FUND BALANCES

The difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources is "Net Position" on the government-wide, proprietary fund, and fiduciary fund financial statements and "Fund Balance" on the governmental fund financial statements.

Net position is reported in three categories:

Net investment in capital assets consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.

Restricted net position results when constraints placed on net position use are either externally imposed by creditors, grantors, contributors, or imposed by law through constitutional provisions, voter initiatives, or court orders.

Unrestricted net position consists of net position which does not meet the definition of the two preceding categories. Unrestricted net position often has constraints on resources, which are imposed by management, but can be removed or modified.

In the governmental fund financial statements, fund balances are reported in classifications that comprise a hierarchy based primarily on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. Five classifications are available for reporting fund balances:

Nonspendable fund balance includes items that cannot be spent. This includes activity that is not in a spendable form (inventories, prepaid amounts, long-term portion of loans/notes receivable, or property held for resale unless the proceeds are restricted or committed) and activity that is legally or contractually required to remain intact, such as a principal balance in a permanent fund.

Restricted fund balances have constraints placed upon the use of the resources that are either externally imposed by creditors, grantors, and contributors, or imposed by law through constitutional provisions, voter initiatives, or court orders.

Committed fund balances can be used only for specific purposes pursuant to constraints imposed by a formal action of the Arizona State Legislature, the State's highest level of decision-making authority. This formal action is the passage of law by the Legislature, creating, modifying, or rescinding fund balance commitments.

Assigned fund balance includes amounts that are constrained by the State's intent to be used for a specific purpose, but are neither restricted nor committed. The State does not have policies or procedures comparable to the policies that underlie this classification and, accordingly, does not report assigned fund balances.

Unassigned fund balance is the residual amount of the General Fund not included in the four categories described above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

When an expenditure is incurred for purposes for which restricted, committed, and unassigned fund balance is available, the State considers restricted, committed, and unassigned amounts to have been spent in that order.

Budget Stabilization Fund

The State's Budget Stabilization Fund (BSF) was enacted in 1990 by A.R.S. § 35-144. The BSF is administered by the State Treasurer, who is responsible for transferring General Fund money into and out of the BSF as required by law. The BSF is designed to set revenue aside during times of above-trend economic growth and to utilize this revenue during times of below-trend growth. The BSF is also known as the "Rainy Day Fund."

There is a statutory formula to calculate the amount to be appropriated to (deposit) or transferred out (withdrawal) of the BSF. The amount is based on calculations from the Arizona Economic Estimates Commission (EEC). The EEC compares the annual growth rate of real adjusted Arizona personal income (AZPI) for the calendar year ending in the fiscal year to the trend growth rate of real adjusted AZPI for the most recent 7 years. AZPI in the BSF formula is defined as total AZPI less transfer payments, adjusted by the gross domestic product price deflator index. If the annual growth rate exceeds the trend growth rate, the "excess" percent multiplied by General Fund revenue of the prior fiscal year would equal the amount to be deposited into the BSF. If the annual growth rate of AZPI is both less than 2% and less than the trend growth rate, the deficiency when multiplied by the General Fund revenue of the prior year would equal the amount to be withdrawn from the BSF. The BSF's total fund balance cannot be larger than 7% of the current year's General Fund revenues, excluding the beginning balance.

The budgets developed by the Governor and the Joint Legislative Budget Committee and submitted to the State Legislature at the start of each regular session include estimates of the amount to be appropriated to or transferred from the BSF for the upcoming budget year. The final determination of the amount is done by the EEC on June 1 of the budget year. The EEC calculations, however, do not result in any automatic deposits or withdrawals, as they must be authorized by legislative action. Additionally, by a two-thirds majority, the State Legislature, with the concurrence of the Governor, can decrease a deposit or increase a withdrawal.

The BSF's fund balance, including earnings on investments, as of June 30, 2015, was \$457.3 million.

Q. NEW ACCOUNTING PRONOUNCEMENTS AND MAJOR FUND CHANGE

GASB Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27. This Statement replaces the requirements of Statements No. 27 and No. 50 as they relate to pensions that are provided through pension plans administered as trusts or equivalent arrangements that meet certain criteria. This Statement establishes standards for measuring and recognizing liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures for pensions. In addition, note disclosure and required supplementary information requirements about pensions are addressed. This Statement is effective for financial statements for fiscal years beginning after June 15, 2014. The State has implemented the requirements of this standard.

GASB Statement No. 69, Government Combinations and Disposals of Government Operations. This Statement provides specific accounting and financial reporting guidance for combinations in the governmental environment. This Statement is effective for

financial statements for fiscal years beginning after December 15, 2013. The State has implemented the requirements of this standard but they had no effect on the financial statements.

GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68. This Statement amends Statement No. 68 to require that, at transition, a government recognize a beginning deferred outflow of resources for its pension contributions, if any, made subsequent to the measurement date of the beginning net pension liability. The provisions of this Statement are required to be applied simultaneously with the provisions of Statement No. 68. The State has implemented the requirements of this standard.

The Industrial Commission Special Fund reported as a major enterprise fund in fiscal year 2014 did not meet the GASB major fund criteria in fiscal year 2015 and, as a result, is reported as a non-major enterprise fund.

NOTE 2. DEPOSITS AND INVESTMENTS

A. DEPOSITS AND INVESTMENT POLICIES

The State's deposits and investments are primarily under the control of the State Treasurer, the Retirement Systems, the Universities, the Industrial Commission (the Commission), and the Insurance Department Guaranty Funds (IDGF). These entities maintain the majority of the deposits and investments of the primary government. The investment policies of these organizations are defined according to State statutes, or a governing board, or both, and are described below.

A.R.S. § 35-312, § 35-313, and § 35-314 authorize the State Treasurer to invest operating, trust, and permanent endowment fund monies. Monies deposited with the State Treasurer by State agencies are invested by the State Treasurer in a pooled fund. Any interest earned is allocated monthly into each respective fund based on average daily cash balances. There is no income from investments associated with one fund that is assigned to another fund.

The State statutes and the State Treasurer's investment policies designed to administer these statutes restrict investments to obligations of the U.S. Government and its agencies, obligations or other evidence of indebtedness of the State and certain local government subdivisions, negotiable certificates of deposit, bonds, debentures and notes issued by entities which are U.S. dollar denominated, commercial paper issued by entities which are U.S. dollar denominated, bankers acceptances, collateralized repurchase agreements, money market mutual funds, exchange traded funds, equities, and other securities. The State Treasurer is not allowed to invest in foreign investments unless the investment is denominated in U.S. dollars.

The State Treasurer maintains external investment pools [the Local Government Investment Pool (LGIP), Local Government Investment Pool - FF&C, Local Government Investment Pool - Medium Term, and Local Government Investment Pool - Medium Term FF&C]. The pools are not required to register (and are not registered) with the Securities and Exchange Commission under the 1940 Investment Advisors Act. The activity and performance of the pools are reviewed monthly by the State Board of Investment in accordance with A.R.S. § 35-311.

In September 2008, the State agencies' and an external investment pool's share of the Lehman Brothers bond value of \$39.4 million was transferred to the Lehman Brothers Pool due to Lehman Brothers filing for Chapter 11 bankruptcy protection on September 15, 2008. The transfer was made to provide for the decline in fair value of the Lehman Brothers securities.

In December 2011, the United States Bankruptcy Court for the Southern District of New York entered an order confirming the Modified Third Amended Lehman Brothers Joint Plan of Liquidation. During the current year, approximately \$3.1 million was received as payout of funds being held by the Indenture Trustee for Lehman Brothers securities. The payout received was allocated to participants based on the participant's share balance and then transferred to the LGIP, reducing the carry or cost basis in the Lehman Brothers Pool. As of June 30, 2015, the carry or cost basis and the fair value for the Lehman Brothers Pool were \$25.7 million and \$2.7 million, respectively. There was a distribution in October 2015, and future distributions are generally expected every six months thereafter. The remaining amount to be recovered is unknown.

The fair value of investments is measured on a monthly basis. Participant shares are purchased and sold based on the Net Position Value (NPV) of the shares. The NPV is determined by dividing the fair value of the portfolio by the total shares outstanding. The State Treasurer does not contract with an outside insurer in order to guarantee the value of the portfolio or the price of shares redeemed.

The Central Arizona Water Conservation District is an individual investment account.

The State Treasurer's deposits and investments disclosures include the amounts reported by the State's component units as (unrestricted/restricted) "Cash and pooled investments with State Treasurer" in the accompanying financial statements, as applicable.

State statutes authorize the retirement systems to make investments in accordance with the "Prudent Person" rule. As such, investment management shall discharge the duties of their position with the care, skill, prudence, and diligence, under the circumstances then prevailing, that a "prudent person" acting in a like capacity and familiar with the same matters would use in the conduct of an enterprise of a like character and with like aims as that of the system.

The ASRS invests in short-term securities, obligations of the U.S. government or agencies of the U.S. government, corporate bonds, common and preferred stocks (domestic and foreign), mortgages, derivatives, commodities, real estate, private equity, and opportunistic debt and equity investments. Per A.R.S. § 38-718, no more than 80% of the ASRS' assets may be invested at any given time in equities, measured at fair value. No more than 40% of the ASRS' assets may be in non-U.S. public investments, measured at fair value. No more than 60% of the ASRS' assets may be invested internally, measured at fair value. No more than 10% of the ASRS' assets may be invested in bonds or other evidences of indebtedness of those multinational development banks in which the U.S. is a member nation, including the International Bank for Reconstruction and Development, the African Development Bank, the Asian Development Bank, and the Inter-American Development Bank, measured at fair value. Subject to the limitations noted above, the ASRS Board may authorize the ASRS Director to make investments that are designated by the ASRS Board and that do not exceed 60% of the assets of the investment account measured at cost. The ASRS Board has not formally adopted more restrictive policies for the various types of risks.

Per A.R.S. § 38-848D, § 38-803A(4), and § 38-883A(4), the PSPRS, the EORP, and the CORP, respectively, may not invest at any given time more than 80% of the combined assets of the system or other plans that the Board of Trustees manages in corporate stocks, based on cost value of such stocks irrespective of capital appreciation. In addition, the PSPRS, the EORP, and the CORP investments shall be restricted to stocks and exchange traded funds that, except for bank and insurance stocks and membership interests in limited liability companies, are either: 1) listed or approved on issuance for listing on an exchange registered under the Securities Exchange Act of 1934, as amended, 2) designated or approved on notice of issuance for designation on the national market system of a national securities association registered under the Securities Exchange Act of 1934, as amended, 3) listed or approved on issuance for listing on an exchange registered under the laws of this State or any other State, 4) listed or approved on issuance for listing on an exchange registered of a foreign country with which the U.S. is maintaining diplomatic relations at the time of purchase, except that no more than 20% of the combined assets of the system or other plans that the board manages shall be invested in foreign securities, based on the cost value of the stocks irrespective of capital appreciation, or 5) an exchange traded fund that is recommended by the chief investment officer of the system, that is registered under the Investment Company Act of 1940, and that is both traded on a public exchange and based on a publicly recognized index. Not more than 5% of the combined assets of the system or other plans that the board manages shall be invested in corporate stock issued by any one corporation, other than corporate stock issued by corporations chartered by the U.S. government or corporate stock issued by a bank or insurance company. Not more than 5% of the voting stock of any one corporation shall be owned by the system and other plans that the board administers, except that this limitation does not apply to membership interests in limited liability companies.

The Arizona Board of Regents (ABOR) governs the investment policies of the Universities. The Universities are generally limited to investing their pooled operating funds in collateralized certificates of deposit and repurchase agreements, U.S. Treasury securities, Federal agency securities, investment grade corporate bonds, or in the LGIP administered by the State Treasurer. Investment of capital project funds is also governed by the financing indenture agreements. For endowment investments, ABOR policy dictates that these funds are to be invested under the direction of an investment committee designated by the president of each university. The investment committee is responsible for advising on the definition, development, and implementation of investment objectives, policies, and restrictions. However, if donors restrict the investments, ABOR policy requires the University to invest those funds separately as directed by the donor, and the individual endowments bear all changes in value.

Per A.R.S. § 23-1065, the Commission's investment committee is responsible for prescribing investment policies and supervising the investment activities of the Commission. The Commission requires that their investment policy be responsive to the unpredictable nature of the incidence and severity of claims, the long periods over which losses may be paid, and the effect on

both claims and losses of increases in treatment and rehabilitation costs. The investment committee may invest in any legal investment authorized under A.R.S. § 38-718.

Per A.R.S. § 20-665 and § 20-687, the IDGF's board of directors shall submit to the director the fund's plan of operations. Investment policies adopted pursuant to the plans of operation authorize the IDGF to invest monies in obligations issued or guaranteed by the United States or any of its senior debt of its agencies, sponsored agencies, corporations, sponsored corporations, or instrumentalities; specified state and local government bonds; interest earning investments such as share, checking, savings accounts, or certificate of deposits.

B. CUSTODIAL CREDIT RISK – DEPOSITS AND INVESTMENTS

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the deposits or collateral securities may not be recovered from an outside party. The State Treasurer's, the Retirement Systems', and the Universities' deposits of State treasury monies with financial institutions are required by State statutes to be entirely covered by the Federal Depository Insurance Corporation (FDIC) or, alternatively, collateralized for amounts in excess of the amount insured. Surety collateral for the Universities and the ASRS must be equal to at least 100% of the bank balance required to be collateralized (102% for the State Treasurer, the PSPRS, the EORP, and the CORP). Beyond this requirement, these organizations do not have a formal policy specifically addressing custodial credit risk on deposits, except for the State Treasurer. The State statutes require surety collateral for the State Treasurer to consist of either: 1) U.S. Government obligations, State obligations, or obligations of counties or municipalities within the State, 2) State Treasurer's warrant notes, or 3) the safekeeping receipt of the financial institution accepting the deposit.

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the value of the investment or collateral securities that are in the possession of an outside party may not be recovered. The State does not have a formal policy in regards to custodial credit risk for investments. As of June 30, 2015, the State had \$80.7 million in securities that were uninsured, not registered in the State's name, and held by either the counterparty or counterparty's trust department or agent, but not in the State's name.

C. INTEREST RATE RISK

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The State manages interest rate risk using the segmented time distribution, weighted average maturity, and effective duration methods.

The State Treasurer manages interest rate risk by incorporating A.R.S. limitations into their investment policy and setting forth various thresholds or parameters relating to interest rate risk in accordance with each investment pool's portfolio structure. The State Treasurer's policy provides either maturity or duration limitations for the various investment pools. The interest rate risk inherent in the portfolio is monitored monthly by measuring the weighted average maturity and/or duration.

The ASU's policies do not limit the overall maturity of the investments held by the operating and endowment funds; however, the operating fund investment policy includes guidelines addressing diversification and liquidity. The capital projects fund's portfolio is not limited as to the overall maturity of its investments, with the funds invested per the financing indentures to coincide with capital spending needs and debt service requirements, which are typically less than three years, with the additional limitation that certificates of deposit and commercial paper have maximum maturities of 360 days and 270 days, respectively.

The Commission approves and contracts with different investment managers of fixed income securities in order to manage the exposure to interest rate risk with each different manager focusing on different goals of yield periods or duration of maturities of their particular portion of the investment pool.

The IDGF's investment policy requires that the maximum final maturity on an individual investment is 4 years or less.

The following table presents the State Treasurer's, the ASU's, the Commission's, and the IDGF's weighted average maturity in years by investment type as of June 30, 2015 (expressed in thousands):

		Weighted Average
Investment Type	Fair Value	Maturity (in years)
Asset backed securities	\$ 751,887	1.66
Certificates of deposit (negotiable)	242,115	0.12
Commercial mortgage backed securities	124,408	28.68
Commercial paper	1,170,699	0.10
Corporate notes & bonds	1,886,095	2.89
FDIC certificates of deposit	179,752	0.16
Government bonds	337,711	2.98
Money market mutual funds	255,910	0.04
Repurchase agreements	1,471,699	0.00
U.S. agency mortgage backed securities	1,166,700	19.54
U.S. agency mortgage backed securities - full faith	400,030	20.14
U.S. agency securities	1,527,531	1.59
U.S. agency securities – full faith	98,751	1.37
U.S. Treasury securities	1,772,687	1.68
Other	2,019	1.45
Total	\$ 11,387,994	4.20

The ASRS has not adopted a specific formal policy for interest rate risk, but does set more restrictive requirements in its contracts with money managers. The ASRS utilizes effective duration to identify and manage its interest rate risk. Effective duration measures the expected change in value of a fixed income security for a given change in interest rate. This method takes into account the likely timing and amounts of variable cash flows for bonds with call options and prepayment provisions.

The following table presents ASRS' effective duration by investment type as of June 30, 2015 (expressed in thousands):

			Effective Duration
Investment Type	Fa	air Value	(in years)
Asset backed securities	\$	5,143	6.90
Commercial mortgage backed securities		50,686	3.50
Corporate bonds		1,737,914	4.80
Fixed income mutual funds		1,976,526	*
Government agency CMOs		506,612	2.60
Government bonds		735,984	6.90
Government mortgage backed securities		7,337	2.90
Government related bonds		37,555	5.70
Opportunistic debt		1,087,081	*
Private debt		1,671,528	*
U.S. Treasury securities		502,993	0.30
Total	\$	8,319,359	4.28

^{*} Duration calculations for some securities are not available.

The PSPRS, the EORP, the CORP, and the U of A do not have a formal policy in regards to interest rate risk. The NAU's investment policy for its operating funds limits the maximum maturity of any fixed-rate or variable-rate security to five years from the settlement date of purchase. The NAU's endowment funds have no such limitation.

The following table presents the interest rate risk for the PSPRS, the EORP, the CORP, the NAU, the U of A, and other State agencies utilizing the segmented time distribution as of June 30, 2015 (expressed in thousands):

				Investment Ma	<u>iturities (in ye</u>	years)						
Investment Type	Fair Value	Less than 1	1-5	6-10	11-15	16-20	More than 20					
Certificates of deposit (negotiable)	\$ 29,044	\$ 3,927	\$ 25,117	\$ -	\$ -	\$ -	\$ -					
Corporate notes & bonds	924,056	52,024	275,608	15,773	12,713	2,974	564,964					
Fixed income mutual funds	11,595	8,116	751	2,728	-	-	-					
Government bonds	2,821	250	2,571	-	-	-	-					
Money market mutual funds	153,922	153,922	-	-	-	-	-					
U.S. agency securities	263,316	156,777	90,664	8,154	-	-	7,721

Total	\$ 1,449,246	\$ 395,273	\$ 438,873	\$ 26,728	\$ 12,713	\$ 2,974	\$ 572,685					

The following table presents the State's investments at fair value that are considered to be highly sensitive to interest rate changes as of June 30, 2015 (expressed in thousands):

	Corporate					
	Notes &	U.S	S. Agency			
Interest Rate Terms	Securities	S	ecurities	(Other	Total
Investments (including full faith) with coupon tied to the London Interbank						
Offered Rate (LIBOR) plus/minus a fixed basis point which resets						
monthly, quarterly, or semi-annually.	\$ 560,668	\$	135,056	\$	97,115	\$ 792,839
Asset backed securities with coupon tied to the LIBOR plus/minus a fixed						
basis point which resets from monthly to quarterly.	191,628		-		-	191,628
Mortgage backed securities (including full faith) - when interest rates fall,						
mortgages are refinanced and paid off early and the reduced stream of						
future interest payments diminishes fair value of the investment.	120,382		1,566,730		-	1,687,112
U.S. Treasury securities with coupon tied to the U.S. Treasury 3 month bill						
money market yield plus/minus a fixed basis point which resets weekly.	-		-		205,018	205,018
Other investments (including full faith) with high sensitivity to rate changes.	9,971		135,261		-	145,232
Total	\$ 882,649	\$	1,837,047	\$	302,133	\$ 3,021,829

D. CREDIT RISK

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the holder of the investment.

State statutes and the State Treasurer's investment policy require that commercial paper must be rated by at least two nationally recognized statistical rating organizations (NRSROs) and that the ratings assigned by at least two of the NRSROs be of the two highest rating categories for short-term obligations. Corporate bonds, debentures, notes, negotiable certificates of deposit, and municipal bonds must carry a minimum Baa or better rating from Moody's Investor Service (Moody's) or a BBB or better rating from Standard and Poor's Rating Service (S & P) or their successors. For securities of, or any other interests in, any open-end management type investment company or investment trust, including exchange traded funds, the underlying investments must be securities which are allowable under State statutes. For investments not rated by Moody's, Fitch rating information is used. There is no statute or investment policy on ratings or credit quality for obligations issued by the U.S. Government or its agencies or repurchase agreements. The underlying securities for repurchase agreements are implicitly guaranteed by the U.S. Government, as some are collateralized with U.S. agency securities.

The ASRS has not adopted a formal policy with respect to credit risk.

The PSPRS', the EORP's, and the CORP's investment policies are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and the average credit quality of the overall portfolios. The fixed income portfolio must have a minimum weighted average quality rating of A3 by Moody's and A- by S & P. Fixed income securities must have a

minimum quality rating of Baa3 by Moody's and BBB- by S & P at the time of purchase. The portion of the bond portfolio in securities rated Baa3 through Baa1 by Moody's and BBB- through BBB+ by S & P must be 20% or less of the fair value of the fixed income portfolio. Commercial paper must have a minimum quality rating of P-1 by Moody's and A-1 by S & P at the time of purchase.

The Universities' policies mirror that of the ABOR, which requires that negotiable certificates of deposit, corporate bonds, debentures and notes, bankers acceptances, and State of Arizona bonds carry a minimum BBB or better rating by S & P or Baa or better rating by Moody's; and that commercial paper be rated by at least two NRSROs and be of the two highest rating categories for short-term obligations of at least two of the NRSROs. In addition, the Universities do not have formal policies that specifically address credit risk over endowment funds. The Universities' endowment funds are primarily invested in their Foundations' endowment pools, which are not rated. The Foundations' investment committees manage the credit risk of the pools' investments. Also, the ASU's capital projects and bond debt service funds are invested by the bond trustee in accordance with the applicable financing indenture.

The Commission's investment policy requires that purchases of fixed income securities will consist of U.S. Treasury or Federal agency obligations or those bonds rated not less than Baa3 by Moody's or BBB- by S & P, except for fixed income managers who have been hired to manage funds in a specialized manner (high yield).

The IDGF's investment policy requires that investments shall be limited to those securities or other investments with a rating no lower than A- from S&P.

The following table presents the State's investments which were rated by S & P and/or an equivalent national rating organization as of June 30, 2015. The ratings are presented using S & P's rating scale (expressed in thousands):

								CCC		
Investment Type	Fair Value	AAA	AA	A	BBB	BB	В	Thru D	A-1/A-2	Not Rated
Asset backed securities	\$ 713,929	\$ 485,384	\$ 13,997	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 208,074	\$ 6,474

Total	\$17,096,788	\$2,598,600	\$4,092,154	\$1,432,432	\$708,191	\$425,235	\$619,748	\$224,448	\$1,609,106	\$5,386,874

E. CONCENTRATION OF CREDIT RISK

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The State Treasurer's, the ASRS', the Universities', and the Commission's investment policies provide that no more than 5% of their investments shall be invested in securities issued by a single corporation and its subsidiaries/affiliates. However, securities issued

by the U.S. government or its agencies, sponsored agencies, corporations, sponsored corporations or instrumentalities are exempt. The State Treasurer also exempts from this policy the purchase of Treasurer Warrant Notes for the State Agencies Diversified pool, provided the maximum amount of the notes purchased shall not exceed 50% of the fair value of the pool, bonds issued by an agency of the State, and pre-refunded municipal bonds issued by any entity that are invested in obligations issued or guaranteed by the U.S. government or any of its agencies, sponsored agencies, corporations, sponsored corporations or instrumentalities. The PSPRS', the EORP's, and the CORP's investment policies state that no more than 5% of the Fund or its fixed income portfolio at fair value shall be invested in bonds issued by any one institution, agency, or corporation other than bonds issued as direct obligations of, and fully guaranteed by, the U.S. Government. The IDGF's investment policies state that no more than 5% of its investment portfolio or \$5 million, whichever is less, shall be invested with any one issuer, with the exception of the U.S. government, its agencies, or instrumentalities. At June 30, 2015, more than 5% of the primary government's total investments are in Federal National Mortgage Association (fair value of \$811.4 million or 6.1%).

F. FOREIGN CURRENCY RISK

Foreign currency risk is the risk that changes in the foreign exchange rate will adversely impact the fair value of an investment or deposit. The State does not have a formal policy regarding foreign currency risk. The ASRS, the PSPRS, the EORP, and the CORP are the primary State agencies that have foreign currency risk. Per A.R.S. § 38-718, no more than 40% of the ASRS' assets may be invested in foreign securities and those investments shall be made only by investment managers with expertise in those investments. The ASRS has not adopted a formal policy that is more restrictive. According to State statutes, the PSPRS, the EORP, and the CORP shall not invest more than 20% of the combined assets of the system or other plans that the Board of Trustees manages in foreign securities. The following table summarizes the State's foreign currency risk as of June 30, 2015 (expressed in thousands):

	Foreign Curr	ency Risk by Inv	estment Type at Fai	r Value
			Other	
Currency	Short Term	Equities	Investments	Total
Australian Dollar	\$ 204	\$ 71,203	\$ - \$	71,407
Brazilian Real	62	16,422	-	16,484
British Pound Sterling	11,235	638,434	50,674	700,343
Canadian Dollar	320	69,217	-	69,537
Chilean Peso	-	1,933	-	1,933
Columbian Peso	28	913	-	941

Thailand Baht	-	9,616	-	9,616
Turkish Lira	40	2,522		2,562
Total	\$ 22,050	\$ 2,882,783	\$ 357,853 \$	3,262,686

G. SECURITIES LENDING

Cash received as collateral on securities lending transactions and investments made with that cash are reported as assets. A corresponding liability is also recorded for such securities lending transactions.

1. Industrial Commission

State statutes and the Commission's policies permit the Commission to enter into securities lending transactions with its custodial bank. There were no significant violations of legal or contractual provisions, and there were no borrower or lending agent default losses to the securities lending agent. The custodial bank, The Northern Trust Company, manages the securities lending operations through a contractual agreement with the Commission and splits the fees received with the Commission. There was no credit risk (i.e., lender's exposure to the borrowers of its securities) related to the securities lending transactions at June 30, 2015. The Northern Trust Company's indemnification responsibilities include performing appropriate borrower and collateral investment credit analysis, demanding adequate types and levels of collateral, and complying with applicable Department of Labor and Federal Financial Institutions Examinations Council regulations concerning securities lending. Securities are loaned for collateral that may include cash, U.S. Government securities, and irrevocable letters of credit. U.S. securities are loaned for collateral valued at 102% of the fair value of securities plus any accrued interest. International securities are loaned for collateral valued at 105% of the fair value of securities plus any accrued interest. The fair value at June 30, 2015 for loaned securities collateralized by cash and non-cash collateral was \$23.8 million and \$2.0 million, respectively. As part of the securities lending transactions, The Northern Trust Company received cash and non-cash collateral valued at \$24.3 million and \$2.0 million, respectively, at June 30, 2015. Non-cash collateral cannot be pledged or sold unless the borrower defaults.

All securities loans can be terminated on demand by either the lender or the borrower although the average term of the Commission's loans was approximately 73 days, as of June 30, 2015. Cash open collateral is invested in a short-term investment pool, the Core USA Collateral Section, which had an interest sensitivity of 26 days, as of June 30, 2015. There are no dividends or coupon payments owing on securities lent. Securities lending earnings are credited to the Commission on approximately the fifteenth day of the following month. Investments made with cash collateral received are classified as an asset on the Statement of Net Position. A corresponding liability is recorded as the Commission must return the cash collateral to the borrower upon expiration of the loan. At June 30, 2015, the Commission had \$24.3 million outstanding as payable for securities lending. A maximum restriction on the amount of securities that can be lent out at any one-time of \$43.976 million was set by the Commission on September 29, 2008. This restriction was revised by the Commission on September 15, 2014, and the new maximum restriction on the amount of securities that can be lent out at any one-time was set at 13% of the total investment portfolio.

2. Arizona State Retirement System

The ASRS is permitted by A.R.S. § 38-718(G) to enter into securities lending transactions. The ASRS' custodial bank enters into agreements with borrowers to loan securities and have the same securities redelivered at a later date. Securities eligible for loan include U.S. fixed income securities, U.S. equities, and international equities. The ASRS currently receives as collateral at least 102% of the fair value of the loaned securities and maintains collateral at no less than 100% for the duration of the loan. At yearend, the ASRS had limited counter party risk to borrowers because the collateral held by the ASRS for each loan exceeded the fair value owed to the ASRS. Securities loaned are initially fully collateralized by cash (USD), U.S. Government or agency securities, sovereign debt, corporate bonds and/or equities. Cash collateral may be reinvested (under certain constraints) in: a) instruments issued or fully guaranteed by the U.S. Government, Federal agencies, or sponsored agencies or sponsored corporations, b) repurchase agreements, and c) money market mutual funds. The ASRS records the collateral received as an asset and the same amount as an obligation for securities on loan. The maturities of the investments are closely matched to those of the security loans to avoid interest rate exposure. The ASRS receives a spread for its lending activities. Investments made with cash collateral are classified as an asset on the Statement of Fiduciary Net Position. A corresponding liability is recorded as the ASRS must return the cash collateral to the borrower upon expiration of the loan. At June 30, 2015, the fair value of securities on loan was \$2.8 billion; of which \$305.6 million were cash collateralized loans. Cash of \$314.7 million received as collateral for securities loaned was reinvested and had a net position value of \$314.8 million, as of June 30, 2015. The securities lending payable at June 30, 2015 was \$314.7 million. The ASRS does not have the ability to pledge or sell the collateral unless there is a borrower default. There is a restriction of \$3.5 billion on the dollar amount of security loans that may be made by the ASRS. The ASRS is indemnified against gross negligence and borrower default by the lending agents, but is not indemnified against cash collateral reinvestment risk.

3. Public Safety Personnel Retirement System, Elected Officials' Retirement Plan, and Corrections Officer Retirement Plan

The PSPRS, the EORP, and the CORP are permitted by A.R.S. Title 38, Chapter 5, Articles 4, 3, and 6, respectively, to enter into securities lending transactions. The PSPRS, the EORP, and the CORP are parties to securities lending agreements with a bank. The bank, on behalf of the PSPRS, the EORP, and the CORP, enters into agreements with brokers to loan securities and have the same securities returned at a later date. The loans are fully collateralized, primarily by cash. Collateral is marked-to-market on a daily basis. Non-cash collateral can be sold only upon borrower default. The PSPRS, the EORP, and the CORP require collateral of at least 102% of the fair value of the loaned U.S. Government or corporate security. Securities on loan are carried at fair value. As of June 30, 2015, the fair values of securities on loan for the PSPRS, the EORP, and the CORP were \$253.0 million, \$13.1 million, and \$65.9 million, respectively. At June 30, 2015, the fair value of the associated collateral for the PSPRS, the EORP, and the CORP were \$260.7 million, \$13.5 million, and \$67.8 million, respectively. The PSPRS, the EORP, and the CORP are indemnified for broker default by the securities lending agent. The PSPRS, the EORP, and the CORP have no credit risk because the amounts owed to the borrowers exceed the amounts the borrowers owe to the retirement system or plan.

4. State Treasurer

The State Treasurer is permitted under A.R.S. § 35-313 and § 35-324 to enter into securities lending transactions. The State Treasurer's custodial bank manages the securities lending program through a contractual agreement. At fiscal year-end, the State Treasurer had no credit risk exposure to borrowers because the amount the State Treasurer owes to the borrowers exceeds the amount the borrowers owe the State Treasurer. All securities are eligible for loan, but equities and U.S. Treasuries comprise a majority of securities that are on loan. There are no restrictions on the dollar amount of security loans that may be made by the State Treasurer. Securities are loaned for collateral that may include cash (U.S. currency), U.S. and international equities, and other assets permissible under Rule 15c3-3 under the Securities Exchange Act of 1934. Securities are loaned for collateral valued at not less than 102% of the fair value of the securities loaned at the close of trading on the preceding business day. Investments made with cash collateral are done on an individual investment pool basis and are restricted to the limitations for that investment pool set forth in the State Treasurer's investment policy, except for investments made for certain endowment equity pools. Permitted investments for these equity pools include those investments authorized in section IV of the State Treasurer's investment policy. Cash collateral investments include: a) obligations issued or guaranteed by the United States or any of its agencies, sponsored agencies, corporations, sponsored corporations, or instrumentalities including repurchase and tri-party repurchase agreements collateralized at no less than 102% by securities, 100% by cash, and 102% by mortgage-backed securities and b) U.S. 2a-7 money market mutual funds which are regulated by the Securities and Exchange Commission and rated in the highest category by at least one NRSRO.

The State Treasurer records the cash collateral received as an asset and the same amount as obligations under securities loan agreements. As of June 30, 2015, the cost and fair value of securities on loan were \$740.6 million and \$896.9 million, respectively. The associated fair value of the invested collateral was \$932.3 million, of which \$529.3 million was invested cash collateral. All securities loans can be terminated on demand by either the State Treasurer or the borrower. For the cash collateral investments, the weighted average maturity was one day. The State Treasurer does not have the ability to pledge or sell the non-cash collateral unless there is a borrower default. The State Treasurer is indemnified against gross negligence, bad faith, or willful misconduct and borrower default by the lending agent. There were no borrower defaults during the current fiscal year. At June 30, 2015, the State Treasurer had \$529.3 million outstanding as payable for securities lending, and the following securities on loan were uninsured and held by the bank trust department not in the Treasurer's name:

Corporate notes	\$ 23,444,672
U.S. Treasury securities	21,798,979
Equities	334,153,817
Total Fair Value	\$ 379,397,468

H. DERIVATIVES

A derivative instrument is a financial instrument or other contract with all three of the following characteristics:

Settlement factors: It has one or more reference rates and one or more notional amounts or payment provisions or both.
Those terms determine the amount of the settlement or settlements, and in some cases, whether or not a settlement is required.

- Leverage: It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- Net Settlement: Its terms require or permit net settlement, it can readily be settled net by means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

The ASRS is the primary State agency that has investment derivatives. The ASRS's derivatives are considered "Investment Derivative Instruments" as defined in GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. All funds are considered fiduciary funds.

The ASRS's derivative instruments, which consist of futures contracts, forward contracts, options, swaps, rights, and warrants, are measured at fair value and reported on the Statement of Fiduciary Net Position. Changes in fair values of derivative instruments are reported as net increase (decrease) in fair value of investments on the Statement of Changes in Fiduciary Net Position.

The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2015, classified by type, and the changes in fair value of derivative instruments for the year then ended as reported in the June 30, 2015 financial statements are as follows (expressed in thousands):

Investment Derivatives by Type

	Investmen	t Derivatives by	y Type				
	Changes in Fair V	Value (1)	Fair Valu	e at Ju	ne 30, 20	15	
Investment Derivatives	Classification	Amount (2)	Classification	Am	ount	Notional (3)	
Commodity futures long	Net increase (decrease) in fair value of investments	\$ (253,719)	Not applicable	\$	-	\$	217,612
Commodity futures short	Net increase (decrease) in fair value of investments	20,742	Not applicable		-		(39)
Fixed income futures long	Net increase (decrease) in fair value of investments	2,802	Not applicable		-		63,200
Fixed income futures short	Net increase (decrease) in fair value of investments	(312)	Not applicable		-		(19,000)
Foreign currency futures long	Net increase (decrease) in fair value of investments	(113,112)	Not applicable		_		-
Foreign currency options written	Net increase (decrease) in fair value of investments	106	Fixed income securities		-		-
Foreign currency forwards	Net increase (decrease) in fair value of investments	(37,321)	Forward contracts receivable		3		1,427
Index futures long	Net increase (decrease) in fair value of investments	101,020	Not applicable		_		199
Receive fixed interest rate swaps	Net increase (decrease) in fair value of investments	236	Fixed income securities		_		-
Rights	Net increase (decrease) in fair value of investments	152	Equity securities		506		1,294
Warrants	Net increase (decrease) in fair value of investments	391	Equity securities		70		210
Total		\$ (279,015)	=	\$	579	\$	264,903

- (1) Excludes futures margin payments.
- (2) Negative values refer to losses.
- (3) Notional denotes the number of units held of each particular derivative instrument. A dollar sign indicates currency units. Negative values refer to short positions.

The fair value of derivative instruments reported by the ASRS is based on quoted market prices off national exchanges. The fair value of foreign currency forward contracts is based on mathematical models and is valued using a pricing service, which uses published Reuter's foreign currency rates as the primary source for the calculation.

The credit quality ratings of counterparties as described by NRSROs and the counterparties' related risk concentration, as of June 30, 2015, are as follows (expressed in thousands):

Counterparty Risk and Ratings									
	T	otal	Risk	Ratings					
Counterparty Name	Net E	Net Exposure		S&P	Fitch	Moody's			
Goldman Sachs	\$	3	100.00%	A-	A	A3			
Total	\$	3	100.00%						

The maximum amount of loss due to credit risk that the ASRS would incur if the counterparties to the derivative instrument failed to perform according to the terms of the contract, without respect to any collateral or other security or netting arrangement, is the total unrealized gain of derivatives at the end of the reporting period.

The ASRS has no general investment policy requiring collateral or other security to support derivative instruments. Each investment manager hired has discretion with respect to derivative investments and risk control. Each investment manager is governed by its Investment Manager Agreement.

The ASRS has no general investment policy with respect to netting arrangements. The ASRS's investment managers have master netting arrangements to allow net settlement with the same counterparty in the event the counterparty defaults on its obligations.

The aggregate fair value of investment derivative instruments in asset positions at June 30, 2015 was \$3 thousand. This represents the maximum amount of loss in case of default of all counterparties of over-the-counter positions as of June 30, 2015. There was no collateral received or netting arrangements in place as of June 30, 2015 with counterparties that would reduce this exposure.

The ASRS has exposure to interest rate risk due to the investment in fixed income futures. The required risk disclosures are included in the Interest Rate Risk schedule in Note 2.C. The fair value balance and notional amount of the fixed income futures outstanding at June 30, 2015, for the year then ended, as reported in the June 30, 2015 financial statements are as follows (expressed in thousands):

	Derivative Instruments Highly Sensi	<u>tive to Interest Rate Cl</u>	nanges			
Asset ID	Asset Description	Interest Rate	Fair '	Value	Noti	onal (1)
FIXED INCOM	E FUTURES LONG		_			
ADI09X7N4	US 2YR NOTE (CBT) SEP 15	0.00%	\$	-	\$	24,200
ADI0BHMD1	US 10YR NOTE (CBT) SEP 15	0.00%		-		10,900
ADI0BJ3D8	US 5YR NOTE (CBT) SEP 15	0.00%		-		20,500
ADI0BJHW1	US LONG BOND (CBT) SEP 15	0.00%		-		3,300
ADI0CFVN2	US ULTRA BOND (CBT) SEP 15	0.00%		-		4,300
Total Fixed Inco	me Futures Long		\$	-	\$	63,200
FIXED INCOMI	E FUTURES SHORT					
ADI0BHMD1	US 10YR NOTE (CBT) SEP 15	0.00%	\$	-	\$	(19,000)
Total Fixed Inco	me Futures Short		\$	-	\$	(19,000)

⁽¹⁾ Notional denotes the number of units held of each particular derivative instrument. Negative values refer to short positions.

The ASRS is exposed to foreign currency risk on its foreign currency forward contracts and futures contracts. The required risk disclosures are included in the Foreign Currency Risk schedule in Note 2.F.

Refer to Note 7.A.4.c. for information on debt derivatives utilized by the ASU.

I. STATE TREASURER'S SEPARATELY ISSUED FINANCIAL STATEMENTS

The State Treasurer issues separately published Annual Audited Financial Statements. These financial statements provide additional information relating to the State Treasurer's total investing activities, including the investment trust funds. A copy of the State Treasurer's Office Annual Audited Financial Statements can be obtained from their office at: Office of the Arizona State Treasurer, 1700 W. Washington Street, Phoenix, AZ 85007, (602) 542-7800, or their website at www.aztreasury.gov.

NOTE 3. RECEIVABLES/UNAVAILABLE REVENUE/UNEARNED REVENUE

A. TAXES RECEIVABLE

The following table summarizes taxes receivable at June 30, 2015 (expressed in thousands):

Type of Tax	-	General Fund	Aviatio Hi Mai	oortation & n Planning, ighway ntenance fety Fund	Gove	n-major ernmental Funds	Er	on-major nterprise Funds	Gove	rnment-wide Total
Sales	\$	525,125	\$	-	\$	53,874	\$	-	\$	578,999
Income – individual and corporate		148,622		-		-		-		148,622

Allowance for uncollectible taxes		(335,533)		-		-		-		(335,533)
Net Taxes Receivable	\$	345,093	\$	80,335	\$	78,159	\$	95,805	\$	599,392

B. UNAVAILABLE REVENUE

At June 30, 2015, the components of unavailable revenue for governmental funds were as follows (expressed in thousands):

	General Fund		& Av Plan Higl Maint	Transportation & Aviation Planning, Highway Maintenance & Safety Fund Transportation Land Endowments Fund		Other Governmental Funds		Total Governmental Funds		
Unavailable Revenue for Governmental Funds:										
Delinquent sales and income tax	\$	71,118	\$	-	\$	-	\$	-	\$	71,118
Tobacco settlement		50,000		-		-		-		50,000
Child support administrative reimbursements		4,375		-		-		-		4,375
Federal grants		95,204		-		-		-		95,204
Drug Rebates		153,758		-		-		-		153,758
Land sales receivable		-		-		470,786		-		470,786
Land leases receivable		-		-		2,703		-		2,703
Other		1,332		819				814		2,965
Total Unavailable Revenue for Governmental Funds	\$	375,787	\$	819	\$	473,489	\$	814	\$	850,909

C. UNEARNED REVENUE

At June 30, 2015, the components of unearned revenue were as follows (expressed in thousands):

Unearned Revenue for Governmental Funds:	Current	Noncurrent	Total Unearned Revenue
General Fund:			
Advance insurance premium taxes	\$ 47,253	\$ -	\$ 47,253
Advance land lease payments	291	3,389	3,680
Advance county acute and long term care payments	23,235	-	23,235
Vaccine and commodity food supplement	747	-	747
Land Endowments Fund:			
Advance land lease payments	25,584	84,588	110,172
Non-Major Funds:			
Advance payments for Hawaii/Arizona PMMIS Alliance	1,301	-	1,301
Total Unearned Revenue for Governmental Funds	\$ 98,411	\$ 87,977	\$ 186,388
Unearned Revenue for Proprietary Funds:	Current		
Universities:			
Unexpended cash advances received	\$ 66,833		
Auxiliary sales and services	8,334		
Student tuition and fees	84,306		
Deposits	1,211		
Other	3,927		
Non-Major Funds:			
Magazine subscriptions	1,964		
Other	229		
Internal Service Funds:			
Other	32		
Total Unearned Revenue for Proprietary Funds	\$ 166,836		

NOTE 4. CAPITAL ASSETS

Capital asset activities for the fiscal year ended June 30, 2015 were as follows (expressed in thousands):

	Primary Government						
	Beginning			Adjustments &	Ending		
	Balance	Additions	Retirements	Reclassifications	Balance		
Governmental Activities:							
Non-depreciable capital assets:							
Land	\$ 3,046,110	\$ 74,450	\$ (6,405)	\$ 1,769	\$ 3,115,924		
Construction in progress	2,916,383	521,188	(1,978,483)	644	1,459,732

NOTE 5. PENSION BENEFITS

The State contributes to eighteen plans. The ASRS, PSPRS – Department of Public Safety (PSA), CORP – Department of Corrections (DCA), and EORP are described below. Benefits are established by State statutes and provide retirement, disability, and survivor benefits to State employees. The PSRPS' Attorney General Investigators, Department of Liquor License and Control Investigators, the ASU Campus Police, the NAU Campus Police, the U of A Campus Police, State Park Rangers, Department of Emergency and Military Affairs, and Game and Fish Department agent multiple-employer defined benefit pension plans are not further disclosed because of their relative insignificance to the State's financial statements. The CORP's Department of Juvenile Corrections, Department of Public Safety Dispatchers, and Department of Public Safety Detention agent multiple-employer defined benefit pension plans are not further disclosed because of their relative insignificance to the State's financial statements. Also, the Elected Officials' Defined Contribution Retirement System, the Teachers Insurance Annuity Association/College Retirement Equities Fund, and Fidelity Investments Tax-Exempt Services Company defined contribution plans are not further disclosed because of their relative insignificance to the State's financial statements.

Changes in the State's net pension liability during the fiscal year ended June 30, 2015, were as follows (expressed in thousands):

	Governmental	Business-type
	Activities	Activities
Beginning balance	\$ 3,394,933	\$ 1,386,829
Increases	834,491	134,081
Decreases	(622,410)	(221,266)
Ending balance	\$ 3,607,014	\$ 1,299,644

For the year ended June 30, 2015, the State recognized pension expense for all plans to which it contributes of \$539.9 million and \$38.2 million of grant expense for EORP. Also, the State reported \$226.0 million of pension contributions as expenditures in the governmental funds related to all pension plans to which it contributes and \$4.1 million of grant expenditures related to EORP.

A. ARIZONA STATE RETIREMENT SYSTEM

Benefits Provided—Retirement benefits are calculated on the basis of age, average monthly compensation, and service credit as follows:

	Retirement Initial Membership Date:			
	Before July 1, 2011	On or after July 1, 2011		
Years of service	Sum of years and age equals 80	30 years age 55		
and age required	10 years age 62	25 years age 60		
to receive benefit	5 years age 50*	10 years age 62		
	Any years age 65	5 years age 50*		
		Any years age 65		
Final average salary is based on	Highest 36 consecutive months of last 120 months	Highest 60 consecutive months of last 120 months		
Benefit percent per year of service	2.1% to 2.3%	2.1% to 2.3%		

^{*} With actuarially reduced benefits.

Retirement benefits for members who joined the ASRS prior to September 13, 2013, are subject to automatic cost-of-living adjustments based on excess investment earning. Members with a membership date on or after September 13, 2013, are not eligible for cost-of-living adjustments. Survivor benefits are payable upon a member's death. For retired members, the survivor benefit is determined by the retirement benefit option chosen. For all other members, the beneficiary is entitled to the member's account balance that includes the member's contributions and employer's contributions, plus interest earned.

Contributions—In accordance with State statutes, annual actuarial valuations determine active member and employer contribution requirements. The combined active member and employer contribution rates are expected to finance the costs of benefits employees earn during the year, with an additional amount to finance any unfunded accrued liability. For the year ended June 30, 2015, active ASRS members were required by statute to contribute at the actuarially determined rate of 11.48 percent of the members' annual covered payroll, and the State was required by statute to contribute at the actuarially determined rate of 10.89 percent of the active members' annual covered payroll. In addition, the State was required by statute to contribute at the actuarially determined rate 9.31 percent of annual covered payroll of retired members who worked for the State in positions that would typically be filled by an employee who contributes to the ASRS. The State's contributions to the pension plan for the year ended June 30, 2015, were \$217.4 million.

During fiscal year 2015, the State paid for ASRS pension contributions as follows: 69.02 percent from the General Fund, 16.05 percent from major funds, and 14.93 percent from other funds.

Pension Liability—At June 30, 2015, the State reported a liability of \$3.2 billion for its proportionate share of the ASRS' net pension liability. The net pension liability was measured as of June 30, 2014. The total pension liability used to calculate the net pension liability was determined using update procedures to roll forward the total pension liability from an actuarial valuation as of June 30, 2013, to the measurement date of June 30, 2014.

The State's proportion of the net pension liability was based on the State's actual contributions to the plan relative to the total of all participating employers' contributions for the year ended June 30, 2014. The State's proportion measured as of June 30, 2014, was 21.36 percent, which was an increase of .57 percent from its proportion measured as of June 30, 2013.

Pension Expense and Deferred Outflows/Inflows of Resources—For the year ended June 30, 2015, the State recognized pension expense for ASRS of \$236.4 million. At June 30, 2015, the State reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (expressed in thousands):

	Deferred		Deferred Inflows	
		Outflows of Resources		esources
Differences between expected and actual experience	\$	160,642	\$	_
Net difference between projected and actual earnings on pension plan				
investments Changes in proportion and differences		-		552,728
between State contributions and proportionate share of contributions		72,107		6,820
State contributions subsequent to the measurement date		217,388		-
Total	\$	450,137	\$	559,548

The \$217.4 million reported as deferred outflows of resources related to ASRS pensions resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to ASRS pensions will be recognized in pension expense as follows (expressed in thousands):

Year ending	
June 30	
2016	\$ (39,952)
2017	(39,952)
2018	(108,713)
2019	(138,182)

Actuarial Assumptions—The significant actuarial assumptions used to measure the total pension liability are as follows:

Actuarial valuation date	June 30, 2013
Actuarial roll forward date	June 30, 2014
Actuarial cost method	Entry age normal
Investment rate of return	8%
Projected salary increases	3–6.75%
Inflation	3%
Permanent benefit increase	Included
Mortality rates	1994 GAM Scale BB

Actuarial assumptions used in the June 30, 2013 valuation were based on the results of an actuarial experience study for the 5 year period ended June 30, 2012.

The long-term expected rate of return on ASRS pension plan investments was determined to be 8.79 percent using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

		Long-Term
	Target	Expected Real
Asset Class	Allocation	Rate of Return
Equity	63%	7.03%
Fixed Income	25%	3.20%
Real Estate	8%	4.75%
Commodities	4%	4.50%
Total	100%	

Discount Rate—The discount rate used to measure the ASRS total pension liability was 8 percent, which is less than the long-term expected rate of return of 8.79 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the ASRS Board's funding policy, which establishes the contractually required rate under Arizona statute. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the State's Proportionate Share of the ASRS Net Pension Liability to Changes in the Discount Rate—The following table presents the State's proportionate share of the net pension liability calculated using the discount rate of 8 percent, as well as what the State's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (7 percent) or 1 percentage point higher (9 percent) than the current rate (expressed in thousands):

	Current					
	1%	Decrease	Dis	scount Rate	19	% Increase
		(7%)		(8%)		(9%)
State's proportionate share of the						
net pension liability	\$	3,995,100	\$	3,160,809	\$	2,708,164

Pension Plan Fiduciary Net Position—Detailed information about the pension plan's fiduciary net position is available in the separately issued ASRS financial report.

B. PUBLIC SAFETY PERSONNEL RETIREMENT SYSTEM AND CORRECTIONS OFFICER RETIREMENT PLAN

Benefits Provided—PSPRS and CORP Retirement, disability, and survivor benefits are calculated on the basis of age, average monthly compensation, and service credit as follows:

	Initial Membership Date:		
	Before January 1, 2012	On or after January 1, 2012	
PSPRS Retirement and Disability Years of service and age required to receive benefit	20 years any age 15 years age 62	25 years and age 52.5	
Final average salary is based on	Highest 36 consecutive months of last 20 years	Highest 60 consecutive months of last 20 years	
Benefit percent: Normal retirement	50% less 2.0% for each year of credited service less than 20 years OR plus 2.0% to 2.5% for each year of credited service over 20 years, not to exceed 80%	2.5 % per year of credited service, not to exceed 80%	
Accidental disability retirement	50% or normal retirement, whichever is greater		
Catastrophic disability retirement	90% for the first 60 months then reduced to either 62.5% or normal retirement, whichever is greater		
Ordinary disability retirement	Normal retirement calculated with actual years of credited service or 20 years of credited service, whichever is greater, multiplied by years of credited service (not to exceed 20 years) divided by 20		
Survivor Benefit			
Retired members	80% to 100% of retired member's pension benefit		
Active members	80% to 100% of accidental disability retirement benefit or 100% of average monthly compensation if death was the result of injuries received on the job		

JUNE 30, 2015

	Initial Membership Date:		
	Before January 1, 2012	On or after January 1, 2012	
CORP Retirement and Disability			
Years of service	Sum of years and age equals 80	25 years and age 52.5	
and age required to receive benefit	20 years any age 10 years age 62	10 years age 62	
Final average	Highest 36 consecutive months	Highest 60 consecutive months	
salary is based on	of last 10 years	of last 10 years	
Benefit percent: Normal retirement	2.0% to 2.5% for each year of	credited service, not to exceed 80%	
Accidental disability retirement	50% or normal retirement if more than 20 years of credited service	50% or normal retirement if more than 25 years of credited service	
Total and permanent disability retirement	50% or normal retirement if more than 25 years of credited service		
Ordinary disability retirement	2.5% per year of credited service		
Survivor Benefit			
Retired members	80% of retired member's pension benefit		
Active members	40% of average monthly compensation or 100% of average monthly compensation if death was the result of injuries received on the job. If there is no surviving spouse or eligible children, the beneficiary is entitled to 2 times the member's contributions.		

Retirement and survivor benefits are subject to automatic cost-of-living adjustments based on excess investment earning. PSPRS also provides temporary disability benefits of 50 percent of the member's compensation for up to 12 months.

Employees Covered by Benefit Terms—At June 30, 2015, the following employees were covered by the agent pension plans' benefit terms:

	PSPRS	CORP
	PSA	DCA
Retirees or beneficiaries		
currently receiving benefits	1,211	2,642
Inactive employees entitled to but		
not yet receiving benefits	169	709
Active employees	981	8,139
Total	2,361	11,490

Contributions—State statutes establish the pension contribution requirements for active PSPRS and CORP employees. In accordance with State statutes, annual actuarial valuations determine employer contribution requirements for PSPRS and CORP pension benefits. The combined active member and employer contribution rates are expected to finance the costs of benefits

employees earn during the year, with an additional amount to finance any unfunded accrued liability. Contributions rates for the year ended June 30, 2015, are indicated below. Rates are a percentage of active members' annual covered payroll.

	PSPRS	CORP
	PSA	DCA
Active members - Pension	6.05%*	8.41%
State - Pension	60.30%*	13.15%

^{*} Per A.R.S. § 38-843B, for the PSPRS, the State has the option of increasing its contributions in order to reduce the contributions required from its members. The PSPRS – PSA rates have been adjusted to reflect that the State pays 5% of the members' share.

In addition, the State was required by statute to contribute at the actuarially determined rate of 19.65 percent for the PSPRS and 7.34 percent for the CORP of annual covered payroll of retired members who worked for the State in positions that would typically be filled by an employee who contributes to the PSPRS or CORP.

The State's contributions to the pension plan for the year ended June 30, 2015, were (expressed in thousands):

	PSPRS	CORP
	PSA	DCA
Pension contributions made	\$ 40,328	\$ 43,105

During fiscal year 2015, the State paid for PSPRS and CORP pension contributions as follows: 57.41 percent from the General Fund and 42.59 percent from other funds.

Pension Liability—At June 30, 2015, the State reported the following net pension liabilities (expressed in thousands):

	Net Pension	
	Liability	
PSPRS - PSA	\$ 653,668	
CORP - DCA	620,092	

The net pension liabilities were measured as of June 30, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liabilities as of June 30, 2014, reflect the following changes of benefit terms and actuarial assumptions.

- In February 2014, the Arizona Supreme Court affirmed a Superior Court ruling that a 2011 law that changed the mechanism for funding permanent benefit increases was unconstitutional. As a result, the plans changed benefit terms to reflect the prior mechanism for funding permanent benefit increases and revised actuarial assumptions to explicitly value future permanent benefit increases.
- The wage growth actuarial assumption was decreased from 4.5 percent to 4.0 percent.

Actuarial Assumptions—The significant actuarial assumptions used to measure the total pension liability are as follows:

PSPRS and **CORP** - Pension

Actuarial valuation date June 30, 2014 Actuarial cost method Entry age normal

Investment rate of return 7.85%

Projected salary increases 4.0%-8.0% for PSPRS and 4.0%-7.25% for CORP

Inflation 4.0%
Permanent benefit increase Included

Mortality rates RP-2000 mortality table (adjusted by 105% for males

and females)

Actuarial assumptions used in the June 30, 2014 valuation were based on the results of an actuarial experience study for the five year period ended June 30, 2011.

The long-term expected rate of return on PSPRS and CORP pension plan investments was determined to be 7.85 percent using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expenses and inflation) are developed for each major asset class. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

		Long-Term
	Target	Expected Real
Asset Class	Allocation	Rate of Return
Short term investments	2%	3.25%
Absolute return	4%	6.75%
Risk parity	4%	6.04%
Fixed income	7%	4.75%
Real assets	8%	5.96%
GTAA	10%	5.73%
Private equity	11%	9.50%
Real estate	11%	6.50%
Credit opportunities	13%	8.00%
Non-U.S. equity	14%	8.63%
U.S. equity	16%	7.60%
Total	100%	

Discount Rates—The following discount rates were used to measure the total pension liabilities:

	PSPRS	CORP
	PSA	DCA
Discount rates	7.85%	7.85%

The projection of cash flows used to determine the PSPRS and CORP discount rates assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Changes in the Net Pension Liability (expressed in thousands)

	Increase (Decrease)		
PSPRS - PSA	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) -(b)

2020	_	16,661

C. ELECTED OFFICIALS' RETIREMENT PLAN

Benefits Provided—Retirement, disability, and survivor benefits are calculated on the basis of age, average yearly compensation, and service credit as follows:

	Initial Membership Date:			
-	Before January 1, 2012	On or after January 1, 2012		
Retirement and Disability				
Years of service	20 years any age	10 years age 62		
and age required	10 years age 62	5 years and age 65		
to receive benefit	5 years and age 65	any years and age if disabled		
	5 years any age*			
	any years and age if disabled			
Final average salary is based on	Highest 36 consecutive months of last 10 years	Highest 60 consecutive months of last 10 years		
sarary is based on	or last to years	of last to years		
Benefit percent:	4% per year of service,	3% per year of service,		
retirement	not to exceed 80%	not to exceed 75%		
remement	not to exceed 80%	not to exceed 75%		
Disability	80% with 10 or more years of service	75% with 10 or more years of service		
retirement	40% with 5 to 10 years of service	37.5% with 5 to 10 years of service		
	20% with less than 5 years of service	18.75% with less than 5 years of service		
Survivor Benefit				
Retired members	75% of retired member's benefit	50% of retired member's benefit		
Active members and other inactive members	75% of disability retirement benefit	50% of disability retirement benefit		

^{*} With reduced benefits of .25% for each month early retirement precedes the member's normal retirement age, with a maximum reduction of 30%.

Retirement and survivor benefits are subject to automatic cost-of-living adjustments based on excess investment earning.

Contributions—State statutes establish active member and employer contribution requirements. Statute also appropriates \$5 million annually through fiscal year 2043 for the EORP from the State to supplement the normal cost plus an amount to amortize the unfunded accrued liability and designates a portion of certain court fees for the EORP. For the year ended June 30, 2015, active EORP members were required by statute to contribute 13 percent of the members' annual covered payroll, and the State was required to contribute 23.50 percent of active EORP members' annual covered payroll. In addition, the State was required by statute to contribute 23.50 percent of annual covered payroll of retired members who worked for the State in positions that would typically be filled by an employee who contributes to the EORP. The State's contributions to the pension plan for the year ended June 30, 2015, were \$8.0 million, including \$4.1 million related to State support, as a nonemployer contributing entity.

During fiscal year 2015, the State paid for EORP pension contributions as follows: 97.69 percent from the General Fund and 2.31 percent from other funds. In addition, during fiscal year 2015, the State, as a nonemployer contributing entity, paid for EORP pension contributions as follows: 100.00 percent from the General Fund.

Pension Liability—At June 30, 2015, the amount the State recognized as its proportionate share of the net pension liability, the related State support, as a nonemployer contributing entity, and the total portion of the net pension liability that was associated with the State were as follows (expressed in thousands):

State's proportionate share of the	
EORP net pension liability	\$ 121,797
State's proportionate share of the	
EORP net pension liability, as a	
nonemployer contributing entity	128,776
Total	\$ 250,573

The net pension liability was measured as of June 30, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. In February 2014, the Arizona Supreme Court affirmed a Superior Court ruling that a 2011 law that changed the mechanism for funding permanent benefit increases was unconstitutional. As a result, for the June 30, 2014, actuarial valuation, the plan changed benefit terms to reflect the prior mechanism for funding permanent benefit increases and revised actuarial assumptions to explicitly value future permanent benefit increases.

The State's proportion of the net pension liability, as of June 30, 2013 and 2014, was based on the State's actual contributions to the plan relative to the total of all participating employers' actual contributions for the year ended June 30, 2014. The State's proportion, measured as of June 30, 2013 and 2014, was 18.16 percent. The State's proportion, as a nonemployer contributing entity, measured as of June 30, 2013 and 2014, was 19.20 percent.

Pension Expense, Grant Expense, and Deferred Outflows/Inflows of Resources—For the year ended June 30, 2015, the State recognized pension expense for EORP of \$36.1 million. In addition, the State recognized grant expense of \$38.2 million, as a result of its requirement to contribute to EORP as a nonemployer contributing entity. At June 30, 2015, the State and the State, as a result of its requirement to contribute to EORP as a nonemployer contributing entity, reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (expressed in thousands):

The State.

						as a nonemployer			
		The State			contributing entity				
	Det	ferred	Def	erred	De	ferred	Def	erred	
	Out	flows	Inf	lows	Ou	tflows	Inf	lows

experience	\$	535	\$	-	\$	566	\$	-	
Changes of assumptions or other inputs		32,961		-		34,850		-	
Net difference between projected and									
actual earnings on pension plan investments		_		2,309		_		2,442	
State contributions subsequent to the									
measurement date		3,928		-		4,066		-	
Total	\$	37,424	\$	2,309	\$	39,482	\$	2,442	
	- 1	.02 -							

The amounts reported as deferred outflows of resources related to pensions resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to EORP pensions will be recognized in pension expense as follows (expressed in thousands):

		The State, as a		
		nonemployer		
Year ending		contributing		
June 30	The State	entity		
2016	\$ 18,713	\$ 19,786		
2017	13,628	14,409		
2018	(577)	(610)		
2019	(577)	(611)		

Actuarial Assumptions—The significant actuarial assumptions used to measure the total pension liability are as follows:

Actuarial valuation date	June 30, 2014
Actuarial cost method	Entry age normal
Investment rate of return	7.85%
Projected salary increases	4.25%
Inflation	4.00%
Permanent benefit increase	Included
Mortality rates	RP-2000 mortality table projected to
	2025 with projection scale AA

Actuarial assumptions used in the June 30, 2014, valuation were based on the results of an actuarial experience study for the 5-year period ended June 30, 2011.

The long-term expected rate of return on EORP pension plan investments was determined to be 7.85 percent using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expenses and inflation) are developed for each major asset class. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

	Target	Long-Term Expected Real
Asset Class	Allocation	Rate of Return
Short term investments	2%	3.25%
Absolute return	4%	6.75%
Risk parity	4%	6.04%
Fixed income	7%	4.75%
Real assets	8%	5.96%
GTAA	10%	5.73%
Private equity	11%	9.50%
Real estate	11%	6.50%
Credit opportunities	13%	8.00%
Non-U.S. equity	14%	8.63%
U.S. equity	16%	7.60%
Total	100%	

Discount Rate—At June 30, 2014, the discount rate used to measure the EORP total pension liability was 5.67 percent, which was a decrease of 2.18 from the discount rate used as of June 30, 2013. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate, employer contributions will be made at the statutorily set rates, and non-employer contributions will be made as currently required by statute. Based on those assumptions, the pension plan's fiduciary net position was projected to be insufficient to make all projected future benefit payments of current plan members. Therefore, to determine the total pension liability for the plan, the long-term expected rate of return on pension plan investments of 7.85 percent was applied to periods of projected benefit payments through the year ended

June 30, 2030. A municipal bond rate of 4.29 percent obtained from the 20-year Bond Buyer Index, as published by the Federal Reserve as of June 26, 2014, was applied to periods of projected benefit payments after June 30, 2030.

Sensitivity of the State's Proportionate Share of the EORP Net Pension Liability to Changes in the Discount Rate—The following table presents the State's and the State's, as a result of its requirement to contribute to EORP as a nonemployer contributing entity, proportionate share of the net pension liability calculated using the discount rate of 5.67 percent, as well as what the State's and the State's, as a result of its requirement to contribute to EORP as a nonemployer contributing entity, proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (4.67 percent) or 1 percentage point higher (6.67 percent) than the current rate (expressed in thousands):

	Current				
	1% Decrease	Discount Rate	1% Increase		
	(4.67%)	(5.67%)	(6.67%)		
State's proportionate share of the					
net pension liability	\$142,188	\$121,797	\$104,580		
State's proportionate share of the					
net pension liability, as a					
nonemployer contributing entity	150,335	128,776	110,572		

Pension Plan Fiduciary Net Position—Detailed information about the pension plan's fiduciary net position is available in the separately issued EORP financial report.

NOTE 6. OTHER POST-EMPLOYMENT BENEFITS

A. PLAN DESCRIPTION

Cost-sharing plans

In addition to the pension benefits described, the ASRS provides health insurance premium supplemental benefits and disability benefits to retired members, disabled members, and eligible dependents through the Health Benefit Supplement Fund (HBS) and the Long Term Disability Fund (LTD), which are cost-sharing, multiple-employer defined benefit post-employment plans. Title 38, Chapter 5 of the A.R.S. assigns the authority to establish and amend the benefit provisions of the HBS plan and the LTD plan to the Arizona State Legislature. The ASRS issues a publicly available financial report that includes the financial information and disclosure requirements for the HBS plan and the LTD plan. Information on how to obtain this report is included in Note 1.A.

In addition to the pension benefits described, the EORP provides health insurance premium subsidy benefits to retired members, which is a cost-sharing, multiple employer defined benefit post-employment plan. Title 38, Chapter 5 of the A.R.S. assigns the authority to establish and amend the health insurance subsidy benefit provisions to the Arizona State Legislature. As of July 1, 2013, the EORP administers a separate healthcare plan as defined under IRC § 401(h). In addition, the EORP is statutorily authorized, by A.R.S. § 38-817, to maintain a separate account for the health insurance subsidy assets and benefit payments. The health insurance subsidy assets are accounted for by employer and are available to pay only the health insurance benefit. Information on how to obtain the EORP's publicly available financial report is included in Note 1.A. However, the EORP OPEB benefit is relatively insignificant to the State's financial statements and, therefore, is not further described in these notes.

Agent plans

In addition to pension benefits described, the PSPRS and the CORP each provide a health insurance premium subsidy benefit to retired members and survivors, which are agent, multiple-employer defined benefit post-employment plans. Title 38, Chapter 5 of the A.R.S. assigns the authority to establish and amend the health insurance premium subsidy benefit provisions to the Arizona State Legislature. As of July 1, 2013, the PSPRS and the CORP each administers a separate healthcare plan as defined under IRC § 401(h). In addition, the PSPRS and the CORP are statutorily authorized, by A.R.S. § 38-857 and A.R.S. § 38-906, respectively, to maintain a separate account for the health insurance premium subsidy assets and benefit payments. The health insurance premium subsidy assets are accounted for by employer and are available to pay only the health insurance premium benefit. The PSPRS and the CORP each issue publicly available financial reports that include the financial information and disclosure requirements for the health insurance subsidy benefits. Information on how to obtain these reports is included in Note 1.A.

However, the PSPRS and the CORP OPEB benefits are relatively insignificant to the State's financial statements and, therefore, are not further described in these notes.

Single-employer plan

The Arizona Department of Administration (ADOA) administers a single-employer defined benefit post-employment plan that provides medical and accident benefits to retired State employees and their dependents. Title 38, Chapter 4 of the A.R.S. assigns the authority to establish and amend the benefit provisions to the Arizona State Legislature. The ADOA pays the medical costs incurred by retired employees minus a specified premium amount, which is paid for entirely by the retiree or on behalf of the retiree. These premium rates are based on a blend of active employee and retiree experience, resulting in a contribution basis which is lower than the expected claim costs for retirees only, which results in an implicit subsidization of retirees by the State and the active population. As of June 30, 2015, the plan had 53,454 active employees and 6,951 retirees and dependents receiving benefits. ADOA does not issue a separate, publicly available financial report.

B. SUMMARY OF SIGNIFICANT ACCCOUNTING POLICIES

Cost-sharing plan

For the ASRS HBS and LTD plans, contributions are recognized as revenues when due, pursuant to statutory and contractual requirements. Benefits and refunds are recognized when due and payable and expenses are recorded when the corresponding liabilities are incurred, regardless of when contributions are received or payments is made.

Single-employer plan

The ADOA plan's implicit rate subsidy, if not fully funded, represents an obligation of the State, the net OPEB obligation. The net OPEB obligation is allocated to significant participating funds based on their proportionate share of active benefit eligible employees and recorded in the government-wide and proprietary fund financial statements.

C. FUNDING POLICY

Cost-sharing plan

The contribution requirements of plan members and the State are established by Title 38, Chapter 5 of the A.R.S. These contribution requirements are established and may be amended by the Arizona State Legislature. For the year ended June 30, 2015, active ASRS members and the State were each required by statute to contribute at the actuarially determined rate of 0.12% of the members' annual covered payroll for LTD. In addition, the State also contributed 0.59% for the HBS. The State's contributions for LTD to the ASRS for the years ended June 30, 2015, 2014, and 2013 were \$2.4 million, \$4.5 million, and \$4.3 million, respectively, for the primary government which were equal to the required contributions for these years. The State's contributions for the HBS to the ASRS for the years ended June 30, 2015, 2014, and 2013 were \$11.6 million, \$11.3 million, and \$11.8 million, respectively, for the primary government which were equal to the required contributions for these years.

Single-employer plan

The ADOA's current funding policy is pay-as-you-go for OPEB benefits. There are no dedicated assets at this time to offset the actuarial accrued liability. To the extent that the calculated annual required contribution exceeds the annual pay-as-you-go cost of providing OPEB benefits, a net OPEB obligation is created. The State's contribution for the ADOA OPEB for the years ended June 30, 2015, 2014, and 2013 were \$13.7 million, \$13.4 million and \$11.8 million, respectively, for the primary government.

D. ANNUAL OPEB COST AND NET OPEB OBLIGATION

The State's annual OPEB cost, OPEB contributions made, and changes in the State's net OPEB obligation of the ADOA single-employer defined benefit post-employment plan for the year ended June 30, 2015, are as follows (expressed in thousands):

Annual required contribution	\$	22,095
Interest on net OPEB obligation		811
Adjustment to annual required contribution		(753)
Annual OPEB cost (expense)		22,153
Contributions made	((13,721)
Increase in net OPEB obligation		8,432
Net OPEB obligation-beginning of year		20,285
Net OPEB obligation-end of year	\$	28,717

The State's annual OPEB costs, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the current and the two preceding years of the ADOA single-employer defined benefit post-employment plan, are as follows (expressed in thousands):

		Percentage of	
Fiscal Year	Annual OPEB	Annual OPEB	Net OPEB
Ended	Costs	Cost Contributed	Obligation
6/30/2015	\$ 22,153	61.9%	\$ 28,717
6/30/2014	21,247	63.1%	20,285
6/30/2013	18,136	65.1%	12,445

E. FUNDED STATUS AND FUNDING PROGESS

The State's funded status for the ADOA single-employer defined benefit post-employment plan for the most recent actuarial valuation is as follows (expressed in thousands):

						(Unfunded)
						AAL as a
Actuarial	Actuarial	Actuarial			Annual	Percentage
Valuation	Value of	Accrued	(Unfunded)	Funded	Covered	of Covered
Date	Plan Assets	Liability (AAL)	AAL	Ratio	Payroll	Payroll
6/30/2014	-	\$ 242,946	\$ (242,946)	0.0%	\$ 3,051,816	(8.0)%

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and healthcare cost trends. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The required schedule of funding progress immediately following the notes to the financial statements presents multi-year trend information about whether the actuarial value of the plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

F. ACTUARIAL METHODS AND ASSUMPTIONS

Projections of benefits for financial reporting purposes are based on the plan and include the types of benefits provided at the time of each valuation. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The State's actuarial methods and significant assumptions for the ADOA single-employer defined benefit post-employment plan for the most recent actuarial valuation are as follows:

Actuarial valuation date June 30, 2014 Actuarial cost method entry age normal, level dollar

Actuarial assumptions:

 Investment rate of return
 n/a

 Projected salary increases
 3.5%

 Discount rate
 4.0%

 Cost-of-living adjustments
 none

 Healthcare cost trend rate
 8.0% initial

4.5% ultimate
Amortization method level percent-of-pay, open

Remaining amortization period 30 years

NOTE 7. LONG-TERM OBLIGATIONS

A. REVENUE BONDS

Governmental Activities

1. Department of Administration

The State has pledged portions of its revenues towards the payment of debt service on the State Lottery Revenue Bonds Series 2010A. These bonds provide additional working capital to the State to pay appropriated expenditures of the State's General Fund. The bonds are payable solely from and secured by pledged revenues consisting of, until July 1, 2012, amounts distributable to the State's General Fund from the State Lottery pursuant to Lottery law, and from and after July 1, 2012, all Lottery revenues deposited to the Lottery Fund net of operating expenses of the Lottery. At June 30, 2015, pledged revenues totaled \$172.1 million, of which 21.8% (\$37.5 million) was required to cover debt service. Future pledged revenues required to pay all remaining debt service for the bonds through final maturity of July 1, 2029 is \$525.0 million.

2. Arizona Department of Transportation

The ADOT has issued Senior and Subordinated Lien Highway Revenue Bonds to provide funds for acquisition of right-of-way, design, and construction of federal and state highways. The balance of Highway Revenue Bonds issued in prior years and outstanding at the start of the fiscal year was \$1.7 billion.

On January 28, 2015, the ADOT issued \$377.5 million of Highway Revenue Refunding Bonds, Series 2015 (2015 Bonds). The 2015 Bonds were issued at a premium of \$75.5 million. The net proceeds were used to (i) advance refund portions of the Senior Series 2005B (\$7.3 million), Senior Series 2006 (\$18.4 million), Senior Series 2008A (\$194.0 million), and Senior Series 2008B (\$181.1 million) Highway Revenue Bonds with a combined outstanding principal balance of \$441.8 million and (ii) pay costs of issuance. The advance refunding resulted in a combined total debt service savings of \$40.8 million and a combined net present value economic gain of \$31.5 million (difference between the present values of the old debt and new debt service payments). The advance refunding also resulted in a difference between the reacquisition price and the net carrying amount of the refunded debt of \$38.6 million. This difference, reported as a deferred outflow of resources, is being amortized to interest expense on a straight-line basis through fiscal year 2033.

The Highway Revenue Bonds are secured by a prior lien on and a pledge of motor vehicle and related fuel fees and taxes. On September 21, 2006, House Bill 2206 became effective and eliminated the restriction that limited the principal amount of the Highway Revenue Bonds that could be outstanding at any time to \$1.3 billion. Also during fiscal year 2007, the ADOT received legislative authority to begin issuing Highway Revenue Bonds with maturities of up to 30 years in length, replacing the 20 year maturity requirement that had been in place since 1980.

The ADOT has pledged future motor vehicle and related fuel fees and taxes to repay \$1.6 billion in outstanding Highway Revenue Bonds issued since 2005. Proceeds from the bonds finance portions of the ADOT's Five Year Transportation Facilities Construction Program. The bonds are payable solely from motor vehicle and related fuel fees and taxes and are payable through

2038. The total principal and interest remaining to be paid on the bonds is \$2.4 billion. Principal and interest paid for the current year and total pledged revenues were \$137.6 million and \$566.4 million, respectively. The annual principal and interest payments on the bonds required 24.3% of the pledged revenues.

The Maricopa County Regional Area Road Construction Fund is used to record all payments of principal and interest for Transportation Excise Tax Revenue Bonds issued by the ADOT. These bonds are secured by a portion of transportation excise taxes collected by the Arizona Department of Revenue on behalf of Maricopa County. The balance of Transportation Excise Tax Revenue Bonds issued in prior years and outstanding at the start of the fiscal year was \$867.4 million.

On December 18, 2014, the ADOT issued \$376.8 million of Transportation Excise Tax Revenue Refunding Bonds Series 2014 (2014 Bonds). The 2014 Bonds were issued at a premium of \$74.0 million. The net proceeds were used to (i) advance refund portions of the Senior Series 2007 (\$200.5 million), Senior Series 2009 (\$174.6 million), and Senior Series 2010 (\$15.4 million) Transportation Excise Tax Revenue Bonds with a combined outstanding principal balance of \$735.6 million and (ii) pay costs of issuance. The advance refunding resulted in a combined total debt service savings of \$31.8 million and a combined net present value economic gain of \$27.6 million (difference between the present values of the old debt and new debt service payments). The advance refunding also resulted in a difference between the reacquisition price and the net carrying amount of the refunded debt of \$35.0 million. This difference, reported as a deferred outflow of resources, is being amortized to interest expense on a straightline basis through fiscal year 2025.

The ADOT has pledged future transportation excise taxes to repay \$782.8 million in outstanding Transportation Excise Tax Revenue Bonds issued since 2007. Proceeds from the bonds pay the costs of design, right-of-way purchase, or construction of certain freeways and other routes within Maricopa County, AZ. The bonds are payable solely from transportation excise taxes and are payable through 2025. The total principal and interest remaining to be paid on the bonds is \$1.0 billion. Principal and interest paid for the current year and total pledged revenues were \$103.6 million and \$254.9 million, respectively. The annual principal and interest payments on the bonds required 40.6% of the pledged revenues.

In current and prior fiscal years, the ADOT refinanced various bond issues through advance-refunding arrangements. Under the terms of the refunding bond issues, sufficient assets to pay all principal, redemption premium, if any, and interest on the refunded bond issues have been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for these legally defeased bonds are not reflected in the accompanying financial statements.

3. School Facilities Board

In prior fiscal years, the School Facilities Board (SFB) refinanced various bond issues through advance-refunding arrangements. Under the terms of the refunding bond issues, sufficient assets to pay all principal, redemption premium, if any, and interest on the refunded bond issues have been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for these legally defeased bonds are not reflected in the accompanying financial statements.

The SFB has pledged portions of its gross revenues towards payment of debt related to State school improvement revenue bonds, State school improvement revenue refunding bonds, and State school trust revenue refunding bonds outstanding at June 30, 2015. These bonds finance the correction of existing deficiencies in school facilities in the State of Arizona. These pledged revenues include Education Transaction Privilege Taxes approved by voters as part of Proposition 301 and expendable State School Trust Revenues. Expendable State School Trust Revenues include State Trust Lands' land lease revenue, interest earnings on land sales financed over time, and a formula distribution from the State's Permanent Fund prescribed by the State's Constitution. Pledged revenues do not include sales of State Trust Lands, sales of natural products derived from State Trust Lands, or royalties from minerals extracted from State Trust Lands. These revenues are held in perpetuity for the benefit of various beneficiaries of the State Land Trust and are not available to pay debt service. Expendable State School Revenues in excess of \$72.263 million are not available to pay debt service on the State school trust revenue refunding bonds per the debt documents. At June 30, 2015, pledged revenues totaled \$679.6 million, of which 12.9% (\$87.5 million) was required to cover current year debt service. Future pledged revenues required to pay all future debt service on these bonds through final maturity of July 1, 2020 are \$417.1 million.

Business-Type Activities

4. Universities

a. University of Arizona

The U of A's bonded debt consists of various issues of system revenue bonds and Stimulus Plan for Economic and Educational Development (SPEED) revenue bonds that are generally callable with interest payable semi-annually. Bond proceeds are used to pay for acquiring or constructing capital facilities and infrastructure and for refunding obligations from previously issued bonds.

For all outstanding SPEED revenue bonds, up to 80% of the debt service payments are payable from the U of A's SPEED revenue bond account monies, which are derived from certain revenues of the Lottery. To the extent SPEED revenue bond account monies are not sufficient to make debt service payments, the SPEED revenue bonds are secured by a pledge of certain gross revenues, such as student tuition and fees, but that pledge is subordinate to the pledge of those gross revenues for the U of A's system revenue bonds.

On July 10, 2014, the U of A sold System Revenue Refunding Bonds Series 2014 (2014 Bonds) for \$16.025 million dated July 17, 2014. The 2014 Bonds include serial bonds with interest rates ranging from 2.00% to 5.00% and maturity dates ranging from 2015 to 2029. The 2014 Bonds with maturity on or after June 1, 2025, are subject to optional redemption without premium. The 2014 Bonds sold at a premium of \$2.300 million. The U of A realized net proceeds of \$18.115 million, after payment of \$210 thousand for issuance costs and underwriter discounts. The net proceeds were used to finance a portion of the McKale Memorial Center Phase I improvements and to refund the following:

- Current-refund the System Revenue Bonds Series 2004B and a portion of the Series 2005A with an outstanding principal balance of \$2.025 million and \$1.685 million, respectively. The current refunding generated a net present value economic gain of \$261 thousand (difference between the present values of the old debt and the new debt service payments) for the U of A. The refunding decreases the U of A's debt service by \$25 thousand in the first year and an average of \$17 thousand in years two through fifteen.
- Advance-refund a portion of the System Revenue Bonds Series 2006A with an outstanding principal balance of \$1.650 million. The advance refunding generated a net present value economic gain of \$104 thousand (difference between the present values of the old debt and the new debt service payments) for the U of A. The advance refunding decreases the U of A's debt service by \$15 thousand in the first year and an average of \$18 thousand in years two through six. The refunded system revenue bonds will be paid by investments held in an irrevocable trust with a combined carrying value of \$1.729 million. Accordingly, the trust account assets and liability for these defeased bonds are not included in the accompanying financial statements.
- The overall refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$254 thousand. This difference, reported in the accompanying financial statements as a deferred inflow of resources, is being amortized to interest expense through the year 2029 using the straight-line method.

On December 2, 2014, the U of A sold SPEED Revenue Bonds Series 2014 for \$129.185 million dated December 17, 2014 (2014 SPEED Bonds). The 2014 SPEED Bonds include serial bonds totaling \$68.280 million with interest rates ranging from 3.00% to 5.00% and maturity dates ranging from 2016 to 2034. The 2014 SPEED Bonds also include two term bonds. The first term bond totals \$26.755 million with an interest rate of 5.00% and a maturity date of August 1, 2039. The second term bond totals \$34.150 million with an interest rate of 5.00% and a maturity date of August 1, 2044.

The serial bonds with maturity on or after August 1, 2025, are subject to optional redemption without premium. The 2014 SPEED Bonds with maturity on August 1, 2039 and August 1, 2044, are subject to mandatory sinking fund redemption without premium pursuant to the debt documents. The 2014 SPEED Bonds sold at a premium of \$17.322 million. The U of A realized net proceeds of \$145.750 million, after payment of \$757 thousand for issuance costs and underwriter discounts. The net proceeds were used to finance the Bioscience Partnership Building and a portion of the Bioscience Research Laboratories.

On March 31, 2015, the U of A sold System Revenue Refunding Bonds Series 2015A (2015A Bonds) for \$103.950 million and System Revenue Refunding Bonds Taxable Series 2015B (2015B Bonds) for \$14.660 million dated April 29, 2015. The 2015A

Bonds include serial bonds totaling \$67.490 million with interest rates of 5.00% on all maturities and maturity dates ranging from 2020 to 2036. The 2015A Bonds also include two term bonds. The first term bond totals \$14.425 million with an interest rate of 5.00% and a maturity date of June 1, 2040. The second term bond totals \$22.035 million with an interest rate of 4.00% and a maturity date of June 1, 2045. The 2015B Bonds include serial bonds totaling \$14.660 million with interest rates ranging from 0.65% to 1.93% and maturity dates ranging from 2016 to 2020.

The 2015A Bonds with maturity on or after June 1, 2026, are subject to optional redemption without premium. The 2015A Bonds sold at a premium of \$16.026 million. The U of A realized net proceeds of \$119.362 million, after payment of \$614 thousand for issuance costs and underwriter discounts. The net proceeds were used to finance a portion of the Bioscience Research Laboratories and to refund, in advance of maturity, a portion of the System Revenue Bonds Series 2007 and 2008A totaling \$14.455 million and \$13.270 million, respectively. The advance refunding generated a net present value economic gain of \$2.049 million (difference between the present values of the old debt and the new debt service payments) for the U of A. The advance refunding decreases the U of A's debt service by \$645 thousand in the first year and an average of \$78 thousand in years two through nineteen. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$2.951 million. This difference, reported in the accompanying financial statements as a deferred outflow of resources, is being amortized to interest expense through the year 2033 using the straight-line method. The refunded system revenue bonds will be paid by investments held in an irrevocable trust with a combined carrying value of \$30.353 million. Accordingly, the trust account assets and liability for these defeased bonds are not included in the accompanying financial statements.

The 2015B Bonds are subject to optional redemption at a redemption price equal to the greater of (1) par, or (2) the net present value of remaining debt service payments, discounted to the date of redemption at a rate based on U.S. Treasury Securities plus 25 basis points. The U of A realized net proceeds of \$14.552 million, after payment of \$108 thousand for issuance costs and underwriter discounts. The net proceeds were used to refund, in advance of maturity, a portion of the System Revenue Bonds Series 2006A totaling \$13.580 million. The advance refunding generated a net present value economic gain of \$854 thousand (difference between the present values of the old debt and the new debt service payments) for the U of A. The advance refunding decreases the U of A's debt service by \$339 thousand in the first year and an average of \$103 thousand in years two through six. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$695 thousand. This difference, reported in the accompanying financial statements as a deferred outflow of resources, is being amortized to interest expense through the year 2020 using the straight-line method. The refunded system revenue bonds will be paid by investments held in an irrevocable trust with a combined carrying value of \$14.197 million. Accordingly, the trust account assets and liability for these defeased bonds are not included in the accompanying financial statements.

The U of A's outstanding Series 2010 SPEED Revenue Bonds were issued as designated Build America Bonds under the provisions of the American Recovery and Reinvestment Act (ARRA). As such, the U of A is eligible to receive direct payments from the U.S. Treasury Department equal to 35% of the interest payments on such bonds on each interest payment date. In order to receive such payments, the U of A must file certain required information with the Federal government between 90 and 45 days prior to the interest payment date. The amount paid to the U of A by the Federal government may be reduced or eliminated due to such issues as failure by the U of A to submit the required information, any amounts owed by the U of A to the Federal government, or changes in the law that would reduce or eliminate such payments. Due to the federal sequestration, the U of A will receive a 7.3% reduction (totaling \$118 thousand) in the federal interest subsidy for the August 1, 2015 debt service payment and a 6.8% reduction (totaling \$220 thousand) in the federal interest subsidy for the February 1 and August 1, 2016 debt service payments.

The U of A has pledged portions of its gross revenues towards the payment of debt related to all system revenue bonds, system revenue refunding bonds, and SPEED revenue bonds outstanding at June 30, 2015. The bonds generally provide financing for various capital projects of the U of A. These pledged revenues include student tuition and fees, auxiliary enterprise revenue, sales and service revenue, and other operating revenues, such as indirect cost recovery and certain investment income. Pledged revenues do not include State appropriations, gifts, endowment income, or other restricted revenues. At June 30, 2015, pledged revenues totaled \$1.15 billion, of which 5.0% (\$59.3 million) was required to cover current year debt service. Future annual principal and interest payments on the bonds are expected to require approximately 4% of pledged revenues. Future pledged revenues required to pay all remaining debt service for the bonds through final maturity of August 1, 2048 are \$1.73 billion.

b. Northern Arizona University

The NAU's bonded debt consists of various issues that are generally callable at a prescribed date with interest payable semi-annually. All issues are at a fixed rate. Bond proceeds primarily pay for acquiring, constructing, or renovating capital facilities.

On May 19, 2015, the NAU sold \$45.4 million of Systems Revenue Refunding Bonds Series 2015 with an interest rate of 5.00%. Refunded bonds total \$47.6 million and include \$770 thousand of the 2004 Systems Revenue Refunding Bonds for maturities from June 1, 2032 to June 1, 2034; \$3.6 million from the Systems Revenue Bonds Series 2005 for maturities from June 1, 2030 to June 1, 2035; \$30.8 million from the Systems Revenue Bonds Series 2007 for maturities on June 1, 2016 and between June 1, 2019 to June 1, 2037; \$12.1 million from the Systems Revenue Bonds Series 2008 for maturities on June 1, 2016, between June 1, 2022 to June 1, 2027, and between June 1, 2029 and June 1, 2030; and \$290 thousand of the 2009B Systems Revenue Bond maturing on June 1, 2016. The refunding set aside \$52.8 million into escrow that purchased Agency, TNotes, and a TSTRIP with maturities between May 28, 2015 and June 1, 2018. The present value of refunded debt prior to May 19, 2015 was \$59.1 million and the net present value of savings was \$3.2 million. The advanced refunding decreases the NAU's debt service by \$1.2 million in year one and \$2.0 million in year two with additional debt service savings of \$57 thousand until June 1, 2035.

On August 21, 2014, the NAU entered into a lease agreement with Student and Academic Services LLC (SAS), a subsidiary of the NACFFC. During the 30 year lease term, the NAU will make lease payments on a four-story building of approximately 102,000 gross square feet that will include new classrooms, space for student support services, and office space for faculty. The SAS Lease Revenue Bonds have a par value of \$34.3 million. The Lease Revenue Bonds include serial bonds of \$16.8 million with interest rates ranging from 2.00% to 5.00%. The 2014 Lease Revenue Bonds also include two term bonds that are subject to annual sinking fund contributions. The first term bond is for \$7.7 million with an interest rate of 5.00% that matures June 1, 2039. The second term bond is for \$9.8 million with an interest rate of 5.00% that matures June 1, 2044. The average annual debt service is \$2.2 million with final maturity on June 1, 2044.

In the current and prior years, the NAU defeased certain revenue bonds by either placing the proceeds of new bonds, or cash and investments accumulated in a sinking fund, in an irrevocable trust to provide for all future debt service payments on the refunded bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the accompanying financial statements. At June 30, 2015, \$47.7 million of such bonds outstanding are considered defeased.

The Series 2009A and 2010 Bonds were issued as designated Build America Bonds under the provisions of the ARRA. As such, the NAU is eligible to receive direct payments from the U.S. Treasury Department equal to 35% of the interest payments on such bonds on each interest payment date. In order to receive such payments, the NAU must file certain required information with the Federal government between 90 and 45 days prior to the interest payment date. The amount paid to the NAU by the Federal government may be reduced or eliminated due to such issues as failure by the NAU to submit the required information, any amounts owed by the NAU to the Federal government, or changes in the law that would reduce or eliminate such payments. During fiscal year 2015, the Federal government reduced federal direct payment claims filed between December 1, 2014 and September 1, 2015 by 7.3% due to the federal budget sequestration resulting in a \$274 thousand reduction in direct payments to the NAU. For accounting purposes, any direct payments received from the U.S. Treasury Department are recorded as non-operating revenue.

For the 2010 and 2013 revenue bonds, up to 80% of the debt service payments are payable from the NAU's SPEED revenue bond account monies, which are derived from certain revenues of the Lottery. To the extent SPEED revenue bond account monies are not sufficient to make debt service payments, the SPEED revenue bonds are secured by a pledge of certain gross revenues, such as student tuition and fees, but that pledge is subordinate to the pledge of those gross revenues for the NAU's system revenue bonds.

The NAU has pledged portions of its gross revenues towards the payment of debt related to system revenue bonds, system revenue refunding bonds, and SPEED revenue bonds outstanding at June 30, 2015. The bonds generally provide financing for various capital projects of the NAU. These pledged revenues include student tuition and fees, certain auxiliary enterprises revenue, investment income, and indirect cost recovery revenue. Pledged revenues do not include State appropriations, gifts, endowment income, or other restricted revenues. Pledged revenues have averaged \$233.5 million for the prior five years. For fiscal year 2015, pledged revenues totaled \$273.0 million, of which 10.1% (\$27.6 million) was required to cover current year debt service. Future annual principal and interest payments on the bonds are expected to require approximately 10.1% of pledged

revenues. Future pledged revenues required to pay all remaining related debt service for the bonds through final maturity of June 1, 2044 are \$799.5 million.

c. Arizona State University

At June 30, 2015, the ASU had issued a combination of fixed and variable rate bonds. The ASU's long-term obligations generally are structured with level debt service, semi-annual interest, and call options at a prescribed date. Certain revenue bonds of the ASU have been defeased through advance refundings by depositing sufficient U.S. Government securities in an irrevocable trust to pay all future debt service. Accordingly, the liabilities for these defeased bonds are not included in the accompanying financial statements. The principal amount of all defeased bonds outstanding at June 30, 2015 totaled \$178.0 million.

The ASU has pledged gross revenues as defined in the bond indentures towards the payment of debt related to various senior lien system revenue bonds outstanding at June 30, 2015. These related system revenue bonds are primarily for new academic and research facilities, academic and laboratory renovations, and infrastructure improvements. The pledged revenues include student tuition and fees, certain auxiliary enterprises revenue, net investment income, and indirect cost recovery revenue. Pledged revenues do not include State appropriations, gifts, endowment income, or other restricted revenues. For the year ended June 30, 2015, pledged revenues totaled \$1.3 billion, of which 6.3% (\$82.3 million, net of federal direct payments) was required to cover current year debt service. Future pledged revenues required to pay all remaining debt service for senior and subordinate revenue bonds through final maturity of July 1, 2046 are \$1.9 billion. In addition to a senior pledge of revenues for the ASU system revenue bonds, the ASU has pledged the same revenues on a subordinated basis to secure the ASU SPEED revenue bonds and the Series 2006 Arizona State University Research Park, Inc. Development Refunding Bonds. Research Park bonds outstanding at June 30, 2015 were \$6.1 million with annual debt service payments of approximately \$1.2 million through July 1, 2021.

In June 2008, the Legislature approved the SPEED which provides the ASU with capital improvement funds for critical construction and deferred maintenance projects. SPEED projects are debt financed with revenue bonds and repaid primarily with Lottery revenues. Specifically, up to 80% of SPEED debt service is paid from Lottery revenues, with the balance being the responsibility of the ASU as evidenced by the subordinated pledge of the ASU revenues.

In April 2015, the ASU issued \$362.3 million of System Revenue and Refunding Bonds, Series 2015A, B, and C, with an average maturity of 14.8 years and an average interest rate of 3.34%. The bonds were issued to fund the new Downtown Phoenix campus Arizona Center for Law and Society facility, the Tempe campus Psychology Renovation project, Phase I of the Sun Devil Stadium Renovation project, IT Infrastructure Renewal, and to refund various outstanding bonds of the ASU and one of its component units, the ACFFC (Las Casas Student Housing). The refunded debt is considered defeased and related liabilities are not included in the accompanying financial statements. The issuance of the refunding bonds, with an average maturity of 9.6 years and an average interest rate of 2.67%, resulted in a \$23.1 million reduction in future debt service payments, with an economic gain of \$21.2 million based upon the present value savings.

The Taxable Series 2010A System Revenue Bonds and the Taxable Series 2010A SPEED Revenue Bonds were issued as Build America Bonds under the provisions of the ARRA. As such, the ASU is eligible to receive Federal Direct Payments from the U.S. Treasury equal to 35% of the interest owed on each interest payment date. The amount paid to the ASU by the Federal government may be reduced or limited due to such issues as failure by the ASU to submit the required information, offsets to reflect any amounts owed by the ASU to the Federal government, or changes in the law that would reduce or eliminate such payments. During fiscal year 2015, the ASU received Federal Direct Payments totaling \$3.7 million, net of a \$300 thousand or 7.3 percent reduction due to the federal budget sequestration. For accounting purposes, any direct payments received from the U.S. Treasury are recorded as nonoperating revenue.

The ASU has two series of variable rate demand system revenue refunding bonds outstanding, Series 2008A and Series 2008B, totaling \$91.6 million with final maturities of July 1, 2034. The interest rate in effect on June 30, 2015 was 0.08% for the Series 2008A bonds and 0.06% for the Series 2008B bonds. To provide credit and liquidity support for the bonds, the ASU extended the Irrevocable Transferable Direct-Pay Letter of Credit (LOC) with JPMorgan Chase Bank, N.A. (JPMorgan) through March 18, 2016, under which the ASU has agreed to a commitment fee for the LOC of 0.49% per annum. Should the Series 2008A/B bond rating change, the commitment fee could increase according to the fee agreement. Assuming all of the \$45.8 million Series 2008A and \$45.8 million Series 2008B bonds are not resold within 365 days, the ASU would be responsible to make quarterly installment principal payments, with the last payment being on the fourth anniversary of JPMorgan acquiring the bonds, plus interest to be calculated as established in the LOC.

Securities and cash restricted for bonds debt service held by the trustee at June 30, 2015 totaled \$69.8 million.

The ASU presently plans to issue up to \$144.0 million in system revenue bonds during the next year.

Effective January 1, 2007, the ASU entered into a \$103.0 million notional amount swap agreement (hedging derivative instrument) expiring on July 1, 2034, in conjunction with the 2008 variable rate demand system revenue refunding bonds (2008 Bonds). The outstanding \$91.1 million notional amount at June 30, 2015 is not exchanged; it is only the basis on which the interest payments are calculated and it decreases as principal payments are made on the 2008 Bonds. The intention of the swap is to effectively convert the variable rate interest on the 2008 Bonds to a synthetic fixed rate. Under the terms of the swap agreement, the ASU pays the counterparty interest calculated at a fixed rate of 3.91% and receives payments from the counterparty based on the Securities Industry and Financial Markets Association (SIFMA) Municipal Swap Index set weekly. The SIFMA rate at June 30, 2015 was 0.07%. At June 30, 2015, the synthetic fixed interest rate on the bonds was:

Interest Rate Swap	Terms	Rates (%)
Fixed payment to counterparty	Fixed	3.91
Variable payment from counterparty	SIFMA	(0.07)
Net interest rate swap payments		3.84
Variable-rate bond coupon payments	Spread to SIFMA	0.07
Synthetic fixed interest rate on bonds		3.91

The ASU continues to pay interest to the bondholders at the variable rate provided by the bonds. However, during the term of the swap agreement, the ASU effectively pays a fixed rate on the debt. If the counterparty defaults or if the swap is terminated, the ASU will revert to paying a variable rate. A termination of the swap agreement may also result in the ASU making or receiving a termination payment.

The ASU is exposed to interest rate risk based on the SIFMA indexed variable payment received from the counterparty versus the variable rate paid to bondholders. The swap exposes the ASU to basis risk should the weekly SIFMA rate paid by the counterparty fall below the weekly interest rate due on the bonds.

As of June 30, 2015, the ASU was not exposed to credit risk because the swap had a negative fair value. However, should interest rates change and the fair value of the swap become positive, the ASU would be exposed to credit risk in the amount of the derivative's fair value. The swap counterparty was rated A by Fitch, A by S&P, and A1 by Moody's as of June 30, 2015. Based on current ratings, the counterparty was not required to provide collateral. In the event a rating downgrade occurs, the counterparty may be required to provide collateral if the ASU's overall exposure exceeds predetermined levels. Collateral may be held by the ASU or a third party custodian.

As of June 30, 2015, the swap had a fair value of \$(16.8) million, which represents the cost to the ASU to terminate the swap. The June 30, 2014 fair value was \$(14.1) million. The fair value was developed by an independent third party, with no vested interest in the transaction, using the zero-coupon discounting method. This method calculates the future payments required by the swap, assuming the current forward rates implied by the yield curve are the market's best estimate of future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for a hypothetical zero-coupon rate bond due on the date of each future net settlement on the swaps. In accordance with GASB 53, as amended by GASB 63, the fair value of the ASU's hedging derivative instrument is reported on the statement of net position as a deferred outflow of resources (interest rate swap) and a liability (derivative instrument - interest rate swap).

Summary of Revenue Bonds

The following schedule summarizes revenue bonds outstanding at June 30, 2015 (expressed in thousands):

Revenue Bonds Outstanding	Dates Issued	Maturity Dates	Interest Rates	E	utstanding Balance at ne 30, 2015
Governmental Activities:					
Department of Transportation	2005-2015	2016-2038	.94-5.25%	\$	2,372,775
School Facilities Board	2002-2013	2016-2020	.14-5.00%		395,535
Department of Administration	2010	2016-2029	3.00-5.00%		372,880
Business-type Activities:					
University Revenue Bonds	1992-2015	2016-2049	.07-6.64%		2,675,430

Principal and interest debt service payments on revenue bonds outstanding at June 30, 2015 are as follows (expressed in thousands):

			Annual Debt	Service			
	Governme	ental Activities			Business-type	Activities	
Fiscal Year	Total Principal	Total Interest	Total	Total Principal	Total Interest	Net Payments (Receipts) on Swap Agreement	Total

B. GRANT ANTICIPATION NOTES

Grant Anticipation Notes (GANs) are issued by the ADOT and secured by revenues received from the Federal Highway Administration under grant agreements and certain other federal-aid revenues. The balance of GANs issued in prior years and outstanding at the start of the fiscal year was \$247.7 million.

In prior fiscal years, the ADOT refinanced various GAN issues through advance-refunding arrangements. Under the terms of the refunding GAN issues, sufficient assets to pay all principal, redemption premium, if any, and interest on the refunded GAN issues have been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for the legally defeased GANs are not reflected in the accompanying financial statements.

The ADOT has pledged federal revenues to repay \$194.7 million in outstanding GANs. Proceeds from the GANs pay the costs of design, right-of-way purchase, or construction of certain freeways and other routes within Arizona. The GANs are payable solely from federal revenues and are payable through 2026. The total principal and interest remaining to be paid on the GANs is \$248.5 million. Principal and interest paid for the current year and total pledged revenues were \$64.9 million and \$795.9 million, respectively. The annual principal and interest payments on the GANs required 8.2% of the pledged revenues.

Grant Anticipation Notes currently outstanding are as follows (expressed in thousands):

				Out	tstanding
Grant Anticipation Notes	Dates	Maturity	Interest	Ba	lance at
Outstanding	Issued	Dates	Rates	June	30, 2015
Governmental Activities:				'	
Department of Transportation	2009-2012	2016-2026	3.00-5.25%	\$	194,670

Future debt service principal and interest payments on Grant Anticipation Notes issues for fiscal years ended June 30 are summarized below (expressed in thousands):

	Governmental	Activities

Total	\$ 194,670	\$	53,875	\$ 248,545

C. CERTIFICATES OF PARTICIPATION

Governmental Activities

1. Department of Administration

The State has issued COPs to finance construction or improvements of various capital assets. Additionally, the State issued COPs Series 2010A and 2010B to finance the acquisition of certain property from the State by the trustee, with which the proceeds of were deposited to the State's General Fund to pay appropriated expenditures of the State. The COPs Series 2010A and 2010B sale-leaseback transactions are nominal sales, with the State retaining all rights of ownership and control of the properties. Accordingly, they are accounted for under the financing method since the State has such an extensive continuing involvement in the properties for the entire duration of the agreement. The State's obligation to make lease payments and any other obligations of the State under the lease are subject to, and dependent upon, annual appropriations made by the Legislature and annual allocations of such appropriations being made by the Department of Administration for such purpose. The Department of Administration agrees to use its best efforts to budget, obtain, allocate, and maintain sufficient appropriated monies to make lease payments. In the event any such appropriation and allocation is not made, the leases will terminate and there can be no assurance that the proceeds for the re-leasing or sale of the projects will be sufficient to pay principal and interest with respect to the then outstanding COPs. The scheduled payments of principal and interest with respect to the COPs are guaranteed under certificate insurance policies. The State's obligation to make lease payments does not constitute a debt or liability of the State within the meaning of any constitutional or statutory limitation. Neither the full faith and credit nor the general taxing power of the State is pledged to make payments of principal or interest due with respect to the COPs. Such payments will be made solely from amounts derived under the terms of the lease, including lease payments, and amounts from time to time on deposit under the terms of the declaration of trust.

In prior fiscal years, the State refinanced various COPs through advance-refunding arrangements. Under the terms of the refundings, sufficient assets to pay all principal, redemption premiums, if any, and interest on the refunded COPs have been placed in irrevocable trust accounts at commercial banks and invested in U.S. securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for these legally defeased COPs are not reflected in the accompanying financial statements.

2. School Facilities Board

The SFB Series 2010 COPs are not subject to mandatory sinking fund prepayment. However, as a means to provide a source of funds that will be available to pay the principal with respect to the Series 2010 COPs at maturity, the lease agreement with the trustee for the 2010 COPs will provide for mandatory sinking fund payments to be made as part of the base rent due under the lease. The SFB Series 2010 COPs are subject to extraordinary mandatory prepayment from unexpended proceeds pursuant to the debt documents. On February 6, 2014, the SFB redeemed \$9.5 million of the Series 2010 COPs pursuant to the extraordinary mandatory prepayment provisions in the debt documents. Beginning August 15, 2012, annual deposits to the sinking fund were scheduled to be made on August 15 of each year through August 15, 2027, at which time, the accumulated balance (including investment earnings and losses) in the sinking fund will be sufficient to retire the Series 2010 COPs on their stated maturity date of September 1, 2027. The sinking fund deposit requirements were adjusted to reflect the extraordinary mandatory prepayment redemption which occurred on February 6, 2014. All proceeds received from the issuance of the Series 2010 COPs have been expended as of June 30, 2015. As a result, the extraordinary mandatory prepayment discussed above no longer applies. All other prepayment provisions remain in force pursuant to the debt documents.

In current and prior fiscal years, the SFB refinanced various COPs through advance-refunding arrangements. Under the terms of the refundings, sufficient assets to pay all principal, redemption premiums, if any, and interest on the refunded COPs have been placed in irrevocable trust accounts at commercial banks and invested in U.S. securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for these legally defeased COPs are not reflected in the accompanying financial statements.

Business-Type Activities

3. Universities

a. University of Arizona

The U of A utilizes COPs and various capital leases to acquire buildings, equipment, and land. The COPs are generally callable, and the capital leases are subject to prepayment.

On April 1, 2015, the U of A issued Refunding COPs Series 2015A (2015A COPs) for \$89.5 million and Refunding COPs Taxable Series 2015B (2015B COPs) for \$13.8 million dated May 12, 2015. The 2015A COPs include \$89.5 million of serial certificates with interest rates ranging from 2.00% to 5.00% and maturity dates ranging from 2015 to 2025. The 2015B COPs include \$13.8 million of taxable serial certificates with interest rates ranging from 0.60% to 3.09% and maturity dates ranging from 2015 to 2025.

The 2015A COPs are subject to extraordinary redemption dates pursuant to the debt documents. The U of A realized net proceeds of \$102.3 million, after receipt of a premium of \$13.4 million and payment of \$568 thousand for issuance costs and underwriter discounts. The net proceeds were used to current-refund \$53.7 million and advance-refund \$44.2 million of the Series 2005A – 2005D, 2005F – 2005I, 2006A – 2006C, and 2006E COPs. The refunding generated a net present value economic gain of \$11.0 million (difference between the present values of the old debt and new debt service payments) for the U of A. The refunding decreases the U of A's debt service by \$4.5 million in the 1st year and an average of \$655 thousand in years two through eleven. The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$4.1 million. This difference, reported in the accompanying financial statements as a deferred outflow of resources, is being amortized to interest expense through the year 2025 using the straight-line method. The refunded COPs will be paid by investments held in an irrevocable trust with a combined carrying value of \$46.1 million. Accordingly, the trust account assets and liability for these defeased COPs are not included in the accompanying financial statements.

The 2015B COPs are subject to optional redemption at a redemption price equal to the greater of (1) par, or (2) the net present value of the remaining debt service payments, discounted to the date of redemption at a rate based on U.S. Treasury Securities plus 25 basis points. There are also extraordinary redemption dates pursuant to the debt documents. The U of A realized net proceeds of \$13.6 million, after deducting an issuance discount of \$79 thousand and payment of \$121 thousand for issuance costs and underwriter discounts. The net proceeds were used to current and advance refund the Series 2006C, 2006D, and 2007A COPs with an outstanding principal balance of \$12.5 million. The refunding generated a net present value economic gain of \$341 thousand (difference between the present values of the old debt and new debt service payments) for the U of A. The refunding decreases the U of A's debt service by \$45 thousand in the first year and an average of \$29 thousand in years two through eleven. The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$1.4 million. This difference, reported in the accompanying financial statements as a deferred outflow of resources, is being amortized to

interest expense through the year 2025 using the straight-line method. The refunded COPs will be paid by investments held in an irrevocable trust with a combined carrying value of \$13.3 million. Accordingly, the trust account assets and liability for these defeased COPs are not included in the accompanying financial statements.

b. Northern Arizona University

The NAU's COPs consist of various issues that are generally callable at a prescribed date with interest payable semiannually. All issues are at a fixed rate.

On May 20, 2015, the NAU issued \$18.8 million of Refunding COPs Series 2015 (2015 COPs) with interest rates ranging from 3.00% to 5.00%. The net proceeds of the 2015 COPs were used to advance-refund the Series 2005 COPs with an outstanding principal balance of \$20.5 million and maturities ranging from September 1, 2016 to September 1, 2030. The refunding set aside \$21.0 million into escrow that purchased a TSTRIP maturing on August 31, 2015. The present value of the refunded debt service prior to May 20, 2015 was \$24.2 million and the net present value savings was \$2.3 million. The advance refunding increases the NAU's debt service by an average of \$287 thousand per year between June 30, 2016 and June 30, 2020 and decreases debt service by an average of \$337 thousand per year between June 30, 2021 and June 30, 2031.

In current and prior fiscal years, the NAU defeased certain COPs by either placing the proceeds of new COPs, or cash and investments accumulated in a sinking fund, in an irrevocable trust to provide for all future debt service payments on the refunded COPs. Accordingly, the trust account assets and liability for the defeased COPs are not included in the accompanying financial statements. At June 30, 2015, \$38.4 million of such outstanding COPs are considered defeased.

c. Arizona State University

At June 30, 2015, the ASU has issued fixed rate COPs. The ASU's long-term obligations generally are structured with level debt service, semi-annual interest, and call options at a prescribed date.

In August 2014, the ASU issued \$84.5 million of refunding COPs to refund the remaining Series 2004 and 2005A COPs. The refunded debt is considered defeased and the related liabilities are not included in the accompanying financial statements. The issuance of the refunding COPs with an average maturity of 10.6 years and an average interest rate of 3.04% resulted in a \$14.3 million reduction in future debt service payments, with an economic gain of \$10.9 million based on present value savings.

Securities and cash restricted for COP debt service held by the trustee at June 30, 2015 totaled \$7.3 million.

A summary of the COPs issued as of June 30, 2015 is as follows (expressed in thousands):

D. LEASES

1. Leases

The State has entered into capital lease agreements for the acquisition of buildings and equipment. Capital lease assets and liabilities are reported on the government-wide Statement of Net Position. A lease is reported as a capital lease if one or more of the following criteria are met:

- Title to or ownership of the asset is transferred to the State at the end of the lease.
- The lease contains a bargain purchase option.

- The lease term is equal to 75% or more of the useful life of the leased asset. (This criterion does not apply if the beginning lease term falls within the last 25% of the total useful life of the asset.)
- The present value of the minimum lease payments at the inception of the lease, excluding executory costs, equals at least 90% of the fair value of the leased asset. (This criterion does not apply if the beginning lease term falls within the last 25% of the total useful life of the asset.)

The future minimum lease payments for long-term capital leases as of June 30, 2015 are summarized below (expressed in thousands):

	Annual Debt Service								
	Go	overnmental	Bus	siness-type					
Fiscal Year		Activities	A	ctivities					
2016	\$	60,101	\$	13,393					
2017		58,135		14,336					
2018		56,561		13,611					
2019		53,818		13,440					
2020		50,367		13,443					
2021-2025		241,747		67,601					
2026-2030		58,267		64,078					
2031-2035		24,139		41,277					
2036-2040		-		5,440					
2041-2072				4,470					
Total minimum lease payments		603,135		251,089					
Less: amount representing interest		(148,423)		(82,129)					
Less: amount representing executory costs		(45,928)							
Present Value of Net Minimum Lease Payments	\$	408,784	\$	168,960					

2. Capital Assets Financed through Capital Leases

The following table summarizes the historical costs of assets acquired under capital leases (expressed in thousands):

	ernmental activities	Business-type Activities				
Land	\$ 445	\$	8,241			
Buildings	463,650		196,833			
Equipment	 57,634		2,192			
	521,729		207,266			
Less: accumulated depreciation	 (90,991)	-	(42,467)			
Carrying Value	\$ 430,738	\$	164,799			

E. COMPENSATED ABSENCES

Compensated absences are paid from various funds in the same proportion that those funds pay payroll costs. The compensated absence liability attributable to governmental activities will be liquidated primarily by the General Fund. During fiscal year 2015, the State paid for compensated absences as follows: 73.46% from the General Fund, 18.31% from other funds, and 8.23% from other major funds.

F. CHANGES IN LONG-TERM OBLIGATIONS

The following is a summary of changes in Long-term Obligations (expressed in thousands):

	Ju	Balance ly 1, 2014, s restated]	Increases	Decreases	Balance ne 30, 2015	ne Within ne Year	7	Due hereafter
Governmental Activities:

Premiums and discounts on debt		130,315		118,959	(18,096)	231,178	17,543		213,635
Total Long-term Debt		3,245,750		1,073,100	(602,491)	3,716,359	140,677		3,575,682
Other Long-term Liabilities:									
Compensated absences		83,477		101,566	(86,899)	98,144	22,004		76,140
U of A capital commitments		-		25,924	-	25,924	3,500		22,424
Total Other Long-term Liabilities		83,477		127,490	(86,899)	124,068	25,504		98,564
Total Long-term Obligations	\$	3,329,227	\$	1,200,590	\$ (689,390)	\$ 3,840,427	\$ 166,181	\$	3,674,246

The above long-term obligations relating to governmental activities include internal service funds. Amounts for capital leases and compensated absences differ from those in the Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position because \$5.943 million of capital leases and \$160.710 million of compensated absences are attributable to internal service funds. These amounts are included in the reconciliation as part of internal service fund net position.

For beginning balance restatement detail, see Note 9.B.

NOTE 8. INTERFUND TRANSACTIONS

INTERFUND BALANCES AND TRANSFERS

Interfund Receivables/Payables

Interfund balances as of June 30, 2015 are as follows (expressed in thousands):

							Du	е То)

Interfund balances represent (1) amounts due to and from the internal service funds for goods and services rendered, and (2) cash transferred between funds for various interfund activities subsequent to the balance sheet date. The cash is recorded in the fund which initiated the transfer, and a corresponding liability is recorded. The receiving fund records an interfund receivable.

Interfund Transfers

Transfers for the year ended June 30, 2015 are as follows (expressed in thousands):

					Transferi	red	То				
			Land	N	lon-Major			Non-Major		Total

Interfund transfers represent legally authorized non-exchange transfers of funds. These transfers include: (1) legislative appropriations from the General Fund, (2) other legislative transfers, (3) statutorily required transfers, (4) transfers related to the elimination of funds, and (5) transfers for debt service.

NOTE 9. ACCOUNTING CHANGES

A. FUND FINANCIAL STATEMENTS

Net Position has been restated as follows (expressed in thousands):

		Proprietary Funds		Fiduciary Funds
	Universities	Non-Major Enterprise Fund	Internal s Service Funds	Pension and Other Employee Benefit Trust Funds
Net Position, as previously reported	\$ 3,156,634	\$ 207,793	\$ (189,888)	\$ 43,697,530
Prior period adjustment Implementation of GASB 68: Net pension liability (measurement date as of June 30, 2013)	(1,317,760)	(43,969)	(45,301)	(6,734)
Deferred outflows – contributions made during fiscal year 2014	80,105	2,805	2,805	380
Fund reclassification	-	63,110	-	-
Non-major fund change		43,721		
Net Position, as restated	\$ 1,918,979	\$ 273,460	\$ (232,384)	\$ 43,691,176

B. GOVERNMENT-WIDE FINANCIAL STATEMENTS

Government-wide Net Position has been restated as follows (expressed in thousands):

	Governmental Activities	Business-type Activities
Net Position, as previously reported	\$ 22,194,124	\$ 3,469,149
Prior period adjustment		
Implementation of GASB 68:		
Net pension liability (measurement		
date as of June 30, 2013)	(3,394,933)	(1,361,729)
Deferred outflows – contributions		
made during fiscal year 2014	216,846	82,910
Correction of error	25,696	-
Fund reclassification		63,110
Net Position, as restated	\$ 19,041,733	\$ 2,253,440

Prior Period Adjustment and Fund Reclassification

Beginning net position has been restated for the implementation of GASB Statement No. 68, Accounting and Financial Reporting for Pensions, as amended by GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date.

Capital lease liabilities related to private prisons were overstated in fiscal year 2014 by \$25.7 million.

The Insurance Department Guaranty Funds, previously reported as agency funds, have been reclassified to enterprise funds upon further review of administrative responsibilities and policy for recovery of costs. Beginning net position in other enterprise funds and business-type activities was restated by \$63.1 million to show the change for this reclassification.

The Industrial Commission Special Fund reported as a major enterprise fund in fiscal year 2014 did not meet the GASB major fund criteria in fiscal year 2015 and, as a result, is reported as a non-major enterprise fund. The effect on beginning net position was \$43.7 million.

NOTE 10. GOVERNMENTAL FUND BALANCES

Details of the fund balance categories and classifications shown in the aggregate on the governmental funds balance sheet for the year ended June 30, 2015 are as follows (expressed in thousands):

			Т	Transportation &

Total Fund Balances	\$	43,481	\$	1,028,712	\$	5,145,254	\$	1,376,822	\$	7,594,269

NOTE 11. DEFICIT NET POSITION

The Risk Management Fund (RMF), an internal service fund, reported a deficit net position of \$398.2 million primarily due to the RMF receiving annual funding only for expected paid insurance losses (including loss adjustment expenditures) within the State's self-insured retention for the specific fiscal year. Accrued insurance losses of the RMF are not considered when determining funding for each fiscal year.

The Retire Accumulated Sick Leave Fund (RASL), an internal service fund, pays retirees for their accumulated sick leave upon retirement from State service when they meet certain criteria. Beginning with fiscal year 2008, the State applied the provisions of GASB Statement No. 16, *Accounting for Compensated Absences* to the RASL. This results in a liability in the RASL which is significantly greater than the actual funding of the RASL, because the liability is based upon an estimate of the total RASL benefit earned by existing employees at the balance sheet date; however, State agencies pay for only one year based on a 0.40% charge on gross payroll. The \$154.3 million deficit net position is primarily due to the above funding mechanism.

A deficit net position is reported in certain funds as a result of implementing the new GASB Statement No. 68 requirement for recognition of net pension liability. These funds were: the Telecommunication Fund, an internal service fund, which reported a deficit of \$440 thousand; the Lottery Fund, an enterprise fund, which reported a deficit of \$1.3 million; and the Other Non-Major Enterprise Fund, which reported a deficit of \$1.6 million.

NOTE 12. JOINT VENTURES

A. LARGE BINOCULAR TELESCOPE CORPORATION

The U of A is a participant in the Large Binocular Telescope Corporation (LBT). The LBT was formally incorporated as a nonprofit corporation in August 1992 pursuant to a Memorandum of Understanding, as amended, executed on February 24, 1989, between the U of A and the Arcetri Astrophysical Observatory in Florence, Italy. The purpose of the joint venture is to design, develop, construct, own, operate, and maintain a binocular telescope located in Arizona. The current members of the LBT are the U of A, INAF Astrophysical Observatory, Research Corporation, Ohio State University, and LBT Beteiligungsgesellschaft.

The U of A has committed resources equivalent to 25% of the LBT's construction costs and annual operating costs. As of June 30, 2015, the U of A has made cash contributions of \$18.2 million toward the project's construction costs, which were recorded as non-current investments on the Statement of Net Position. The U of A's financial interest represents its future viewing/observation rights. As of December 31, 2007, the assets had been substantially completed and the telescope entered the commissioning phase. During calendar year 2007, the telescope became operational for research purposes; thus, depreciation of the property and equipment has commenced. The U of A recorded its proportionate share of the use of the viewing/observation rights, \$896 thousand in calendar year 2015, as a reduction in its investment. At June 30, 2015, the investment totaled \$11.9 million. According to the most recent draft financial statements of the LBT for the year ended December 31, 2014, assets, liabilities, revenues, and expenses totaled \$125.0 million, \$3.0 million, \$16.0 million, and \$16.0 million, respectively.

Information regarding the LBT's financial statements can be obtained from the University of Arizona Comptroller at the University of Arizona, Financial Services, 1303 E. University Blvd., Box 4, Tucson, AZ 85719-0521.

B. GIANT MAGELLAN TELESCOPE ORGANIZATION

The Giant Magellan Telescope Organization (GMTO) is a non-stock, nonprofit, jointly governed corporation founded to own and administer the planning, design, construction, and operation of the 25-meter Giant Magellan Telescope, a proposed astronomical telescope and its associated buildings, equipment and instrumentation, to be located in northern Chile. The GMTO is jointly governed by several leading educational and research institutions from the United States, South Korea, and Australia, including the U of A. The U of A comprises two of the fifteen members of the GMTO Board of Directors, and is one of eleven founders and participants. The GMTO will hold all rights, title and interest to and in the telescope. Although the U of A does not have a defined equity interest, as a founder the U of A will receive viewing rights to the telescope in proportion to their voluntary contributions to the project. The U of A has recognized an intangible asset related to the costs incurred during the design, development, and construction/commissioning phases. The U of A has also signed an agreement outlining future capital commitments to the GMTO between June 2016 and June 2022. Capital commitments in the amount of \$25.9 million related to the GMTO as of June 30, 2015 are reported in Note 7.F.

In the current fiscal year, the U of A contributed \$20.0 million to the GMTO and has contributed a total of \$34.1 million as of June 30, 2015. The U of A has been and will be responsible for manufacturing the telescope's mirrors and will receive compensation from other GMTO founders and participants based on individual contractual agreements. As of June 30, 2015, the U of A has received contractual payments related to the project from the GMTO and related partners totaling \$57.1 million. Contractual payments were for projects related to mirror construction and process development and include the acquisition of glass and mold materials, the development of mirror testing systems, design study, and engineering support.

NOTE 13. COMMITMENTS, CONTINGENCIES, AND COMPLIANCE

A. INSURANCE LOSSES

The Department of Administration – Risk Management Division manages the State's property, environmental, general liability, and workers' compensation losses. The State has determined that the management of these losses can be performed effectively and efficiently through the Risk Management Division. Consequently, all agencies are required to participate in this program. The State's Risk Management Division evaluates the proper mix of purchased commercial insurance and self-insurance annually.

The Special Fund provides payment of workers' compensation benefits in the following areas: claims against uninsured employers; continuing benefits in claims against insolvent workers compensation insurance carriers and bankrupt self-insured

employers; payment for vocational rehabilitation; continuing medical benefits for pre-1973 workers compensation claims; and, partial coverage of benefits for second injury claims (apportionment claims).

During fiscal year 2014, the Legislature passed Senate Bill 1181 (S. B. 1181), which transfers all insolvent workers' compensation insurance carrier administration from the Special Fund to the Insurance Department Guaranty Fund (Guaranty Fund) effective July 1, 2015. The cash and investments and liabilities related to the insolvent workers' compensation insurance carrier activity were transferred to the Guaranty Fund in fiscal year 2015. A transfer in the amount of \$222.8 million and a Special Item in the amount of \$241.5 million are recorded on the Combining Statement of Revenues, Expenses, and Changes in Fund Net Position for this transaction. The liability for bankrupt self-insured employers will remain a liability of the Special Fund.

The Guaranty Fund provides payment for settlement of covered claims and return of unearned premiums under certain property and casualty insurance contracts of insolvent insurance companies in accordance with A.R.S. Title 20, Chapter 3, Article 6, and contractual obligations under certain life, annuity and disability insurance contracts of insolvent insurance companies in accordance with A.R.S. Title 20, Chapter 3, Article 7. The Guaranty Fund records claims liability when the reported loss is probable and reasonably estimated based on reserves established by adjusters handling the claim files. To provide funding for the payments of claims, the Guaranty Fund may direct the payment of assessments by member insurers under A.R.S. § 20-666 and A.R.S. § 20-686. Assessments under A.R.S. § 20-666 may not exceed 1% of net direct written premiums by member insurers. Under A.R.S. § 20-686, there are two classes of assessments: Class A assessments that are paid by each member insurer to cover administrative costs and other general expenses; and Class B assessments levied by account and paid by member insurers licensed to write insurance covered by the account, that pay the costs related to an impaired insurer or insolvent insurer pursuant to A.R.S. § 20-685. The total assessments under A.R.S. § 20-686 on a member insurer for each account may not exceed 2% of that member insurer's average annual premium received in the State during the three calendar years preceding the year in which an insurer becomes impaired or insolvent.

The Risk Management Fund and the Special Fund record claims liability when the reported loss is probable and reasonably estimated. On an annual basis, independent actuarial firms are engaged to estimate the Risk Management Fund's and the Special Fund's total year-end outstanding claims liability, which takes into account recorded claims and related allocated claims adjustment expenditures, loss development factors, and an estimate for incurred but not reported claims. There were no non-incremental claims adjustment expenses included in the liability for claims and adjustments.

The management and payment of these losses is accomplished through the funding mechanism of the Risk Management Fund and the Special Fund. As discussed in the above paragraph, an independent annual actuarial analysis is performed to evaluate the needed funding. The Risk Management Division will assess each agency an annual portion of the necessary funding for the Risk Management Fund based on their exposures and prior loss experience. Assessments on gross premium revenues and settlement income primarily fund the Special Fund. To provide funding for the payment of these workers' compensation benefits, the Special Fund may direct the payment of assessments into the State Treasury under A.R.S. § 23-1065(A) (general liability assessment – not to exceed 1.5%), A.R.S. § 23-1065(F) (apportionment assessment - not to exceed .5%), and A.R.S. § 23-966(D) (insolvency assessment – not to exceed .5%), in a total amount not to exceed 2.5% of all premiums received by private insurance carriers and what would have been paid by self-insured employers if they had been fully insured by an insurance carrier authorized to transact workers compensation insurance during the immediately preceding calendar year. The Special Fund levied the following assessment taxes for calendar year 2015: 0.58% assessment under A.R.S. § 23-1065(A) and .17% assessment under A.R.S. § 23-1065(F).

Additionally, as a result of the passage of S. B. 1181, the assessment authority for the Special Fund liability was reduced by 1%. Effective July 1, 2015, the Special Fund assessment that can be levied may not exceed 1.5%, which is allocated as follows: 1% under A.R.S. § 23-1065(A) (reduced from 1.5%) and .5% percent under A.R.S. § 23-1065(F). The A.R.S. § 23-966(D) assessment was eliminated.

AMI Risk Consultants, Inc. was retained to evaluate the medical and compensation related liabilities of the Special Fund as of June 30, 2015. The total estimated loss reserve of \$219.0 million decreased by 54.8%, or \$265.1 million, over the prior year estimated loss reserve of \$484.1 million. The primary reason for this significant decrease is directly related to the transfer of insolvent carrier liabilities to the Guaranty Fund. Other than the aforementioned insolvent carrier reserve, there were no major shifts in any award categories. A confidence level of 80% was used in calculating medical and compensation related liabilities. A confidence level of 80% indicates a confidence that the estimated liability will be adequate to cover actual costs 80 out of 100

years. The reserves were discounted at an assumed rate of .6% for the compensation benefits and zero percent for the medical benefits. For medical benefits, it was assumed that the inflation in medical costs will equal the investment return earned by the Special Fund on those reserves.

The Special Fund has filed proofs of claim with ancillary receivers and liquidators regarding the recovery of statutory deposits and other monies for insolvencies. Since the actual amount that will ultimately be received cannot be determined, the Special Fund will continue to recognize receipt of insolvent carrier deposits as revenue at the time received rather than recording a receivable.

Occasionally, the Risk Management Division agrees with claimants to purchase an annuity contract to settle specific claims when it is determined that it is in the best interest of the State to do so. In these instances, the State obtains a release agreement from the claimant and transfers its obligation to make future periodic payments to an assignment company. The State requires a secondary guarantor which is obtained when the assignment company transfers the obligation to make the payments through the use of a qualified assignment (typically a life insurance company with an approved rating). As a result of these requirements, the likelihood that the State will be required to make future payments on these claims is remote.

There have been no significant reductions in the current fiscal year insurance coverage. There have been no settlements that have exceeded insurance premium coverage in the last three fiscal years.

The following table presents the changes in claims liabilities balances (short- and long-term combined) during fiscal years ended June 30, 2014 and June 30, 2015 (expressed in thousands):

Fiscal Year		eginning Balance	Space	ial Item	Cla Ch	rent Year aims and anges in stimates		Claims Payments		Ending Balance
Risk Management Fund:		Daranec	Spec	iai ittiii		stillates		ayments		Darance
2014	\$	395,615	\$	_	\$	92,284	\$	(58,570)	\$	429,329
2015	·	429,329	•	-		79,340	·	(51,280)	·	457,389
Industrial Commission Special Fund:										
2014		477,847		-		31,177		(24,880)		484,144
2015		484,144	(2	41,491)		577		(24,199)		219,031
Insurance Department Guaranty Funds: 2015		-	,	241,491		23,007		(12,926)		251,572

B. LITIGATION

In Cave Creek Unified School District vs. State of Arizona, plaintiffs claimed that A.R.S. § 15-901.01, which the voters had enacted by referendum and required the Legislature to appropriate funds to adjust school equalization assistance funding for inflation by increasing both the base level and the transportation components of the revenue control limit each fiscal year by a statutorily defined growth rate, had been violated with the Legislature's fiscal year 2010-2011 K-12 education budget reconciliation bill because only the transportation component of the revenue control limit was increased. The plaintiffs further asserted that because the voters enacted A.R.S. § 15-901.01 by referendum, the bill also violated the Arizona Constitution's Voter Protection Act (VPA) provisions, which prohibit the Legislature from eliminating voter-enacted measures and from altering them except as the VPA allows. The Trial Court denied the plaintiff's application for declaratory judgment and injunctive relief and granted the State's motion to dismiss the amended complaint for failure to state a claim for which relief could be granted. The Court of Appeals reversed the Trial Court's decision. The State petitioned the Supreme Court for review, which it granted. The Supreme Court considered whether the voters could constitutionally impose a mandate on the Legislature to increase appropriations. The Supreme Court has found that the voters could impose restrictions on the Legislature's discretion through voter-protected statutes and that the Legislature must fund, on a go-forward basis, all components of the base level A.R.S. § 15-901.01. The Supreme Court remanded the case to Superior Court for further proceedings. The Superior Court then bi-furcated the post-judgment proceedings and has determined that the base level should be recalculated as though the Legislature had never stopped funding the inflation adjustments. This decision is on appeal by the State. The second part of the case seeking retroactive payment for the inflationary increases not made since fiscal year 2009-2010 is pending in the Superior Court. A new judge was appointed in the Superior Court to hear the claims and defenses relating to the potential recovery of past due monies.

However, the parties subsequently renewed negotiations in an effort to settle both cases. A settlement was announced by Governor Ducey on October 30, 2015, after he signed several bills intended to settle these two lawsuits. The settlement, which requires voter approval, involves a plan to provide \$3.5 billion to public schools over the next decade by: 1) raising the base level amount of per student funding; 2) requiring that base level amount to be adjusted annually for inflation, with built-in 'out-clauses' to temporarily pause those inflation payments during economic downturns; and 3) adding an extra \$625.0 million from the State's General Fund. Voters approved Proposition 123, Arizona Education Finance Amendment, in the May 17, 2016 special election. As a result, the parties have agreed to the dismissal of both lawsuits.

The State has a variety of claims pending against it that arose during the normal course of its activities. Management believes, based on advice of legal counsel, losses, if any, resulting from settlement of these claims will not have a material effect on the financial position of the State. All losses for any unsettled litigation or contingencies involving workers' compensation, medical malpractice, construction and design, highway operations, employment practices, criminal justice, fidelity and surety, environmental property damage, general liability, environmental liability, building and contracts, auto liability, or auto physical damage are determined on an actuarial basis and included in the Accrued Insurance Losses of the internal service funds and the Industrial Commission Special Fund.

C. ACCUMULATED SICK LEAVE

Sick leave includes any approved period of paid absence granted an employee due to illness, injury, or disability. Most State employees accrue sick leave at the rate of eight hours per month without an accumulation limit. State employees are eligible to receive payment for an accumulated sick leave balance of at least 500 hours, with a maximum of 1,500 hours, upon retirement directly from State service. The benefit value is calculated by taking the State employee's hourly rate of pay at the retirement date, multiplied by the number of sick hours at the retirement date times the eligibility percentage. The eligibility percentage varies based upon the number of accumulated sick hours from 25% for 500 hours to a maximum of 50% for 1,500 hours. The maximum benefit value is \$30 thousand. The benefit shall be paid either in a lump sum or in installments over a three-year period. The RASL Fund is accounted for in the financial statements as an internal service fund and accounts for the retiree accumulated sick leave liability of \$158.5 million at June 30, 2015.

D. UNCLAIMED PROPERTY

The State of Arizona's Uniform Unclaimed Property Act requires the deposit of certain unclaimed assets into a managed agency fund. A total of approximately \$1.2 billion (net of refunds issued) has been collected since the inception of the fund. The State is also holding securities valued at \$49.4 million and mutual funds valued at \$11.0 million. In accordance with A.R.S. § 44-313 and A.R.S. § 44-314, for fiscal year 2015, \$24.5 million was deposited in the Department of Revenue Administrative Fund, \$2.5 million was deposited in the Housing Trust Fund, \$2.0 million was deposited in the Seriously Mentally Ill Housing Trust Fund, \$54.0 million was deposited in other funds as required by State statute. The remittances to the General Fund and the holdings by the State represent contingencies, as claims for refunds can be made by the owners of the property. The GASB requires that a liability be reported to the extent that it is probable that escheat property will be reclaimed and paid to claimants. This liability is also reported as a reduction of revenue. At June 30, 2015, \$397.7 million of this liability is reported in the General Fund because it is the fund to which the property ultimately escheats in Arizona.

E. CONSTRUCTION COMMITMENTS

The ADOT had outstanding commitments under construction contracts of \$145.7 million at June 30, 2015.

	(in thousands)									
	E	xpenditures	Remaining							
		to Date	Commitments							
Construction contracts:										
Rural roadways	\$	9,489	\$	2,408						
Small urban roadways		20,152		-						
Urban roadways		322,102		18,573						
Large urban roadways		458,584		107,940						
Sub-total		810,327		128,921						
Design contracts		118,042		2,036						
Other commitments		142,039		14,751						
Total	\$	1,070,408	\$	145,708						

F. ARIZONA STATE LOTTERY

Annuities are purchased for all prizes over \$400 thousand for which winners will receive the jackpot in annual installments for The Pick on-line game. The annuities are purchased from qualifying insurance companies which have the highest ratings from among A.M. Best Company, S & P, Moody's, Duff & Phelps, or Weiss. Purchases of annuities transfer liabilities for prizes to the insurance company. However, the Lottery may incur liabilities for prizes in the event of a default of an insurance company. Aggregate future payments to prize winners on existing annuities totaled \$46.2 million at June 30, 2015. Approximately \$43.8 million of the total aggregate future payments at June 30, 2015 relate to annuities purchased from five separate insurance companies, of which approximately \$19.9 million relates to a single insurance company.

NOTE 14. TOBACCO SETTLEMENT

The State is one of many states participating in the settlement of litigation with the tobacco industry over the reimbursement of healthcare costs. The settlement money is intended to compensate the State for costs it has incurred in providing health and other services to its citizens that were necessitated by the use of tobacco products. The State expects to receive settlement payments through 2025.

The State recorded tobacco settlement revenue of \$100.0 million in the fund statements and the government-wide statements in fiscal year 2015. Future settlement payments are subject to several adjustments, but the amounts are not presently determinable. These adjustments include a volume adjustment, which could reflect any decreasing cigarette production under a formula that also takes into account increased operating income from sales. Other factors that might affect the amounts of future payments include ongoing and future litigation against the tobacco industry and the future financial health of the tobacco manufacturers. Because the net realizable value of the future settlement payments is not measurable and there is no obligation for the tobacco companies to make settlement payments until cigarettes are shipped, the State did not record a receivable for the future payments related to cigarette sales after June 30, 2015.

NOTE 15. SUBSEQUENT EVENTS

In July 2015, the State issued \$164.0 million in Refunding Certificates of Participation, Series 2015 (Series 2015 Certificates), to: (1) refund, prior to maturity, all outstanding Government Office Lease Revenue Refunding Bonds (Capitol Mall L.L.C. Project), Series 2005, dated October 12, 2005, issued by The Industrial Development Authority of the City of Phoenix, Arizona in the initial principal amount of \$87.6 million and currently outstanding in the amount of \$64.5 million, (2) refund prior to maturity certain outstanding Certificates of Participation, Series 2008A, dated April 30, 2008, originally executed and delivered in the initial principal amount of \$239.0 million and currently outstanding in the amount of \$179.3 million, and (3) pay costs of issuance. The Series 2015 Certificates include serial certificates with interest rates ranging from 1.00% to 5.00% and maturity

dates ranging from 2016 to 2028. The Series 2015 Certificates are subject to optional and extraordinary redemption prior to their stated maturity dates pursuant to the debt documents.

In July 2015, the SFB issued \$263.5 million in Refunding Certificates of Participation, Series 2015A (Series 2015A Certificates), to: (1) refund, in advance of maturity, portions of the outstanding Series 2008 COPs and (2) pay costs of issuance. The Series 2015A Certificates include serial and term certificates with interest rates ranging from 2.00% to 5.00% and maturity dates ranging from 2016 to 2024. The Series 2015A Certificates are not subject to optional redemption prior to maturity; however, they are subject to defeasance pursuant to the debt documents.

In December 2015, the ASU issued \$102.7 million in System Revenue Bonds, Series 2015D (Series 2015D Bonds), for the following projects: (1) renovations to research laboratories, classrooms, buildings, and infrastructure on all of the University's campuses, (2) renovations to the Sun Devil Stadium, and (3) pay costs of issuance. The Series 2015D Bonds include both serial and term bonds with interest rates ranging from 3.00% to 5.00% and maturity dates ranging from 2018 to 2047. The Series 2015D Bonds are subject to optional and mandatory redemption prior to their stated maturity dates pursuant to the debt documents.

In March 2016, the U of A issued \$175.4 million in System Revenue Refunding Bonds, Series 2016 (Series 2016 Bonds), to: (1) refund, prior to maturity, portions of the outstanding 2007 Bonds, 2008A Bonds, and 2009A Bonds and (2) pay costs of issuance. The Series 2016 Bonds include serial bonds with interest rates ranging from 3.00% to 5.00% and maturity dates ranging from 2019 to 2039. The Series 2016 Bonds maturing on or after June 1, 2027 are subject to optional redemption, without premium, pursuant to the debt documents.

NOTE 16. DISCRETELY PRESENTED COMPONENT UNIT DISCLOSURES

The accounting policies of the State's component units conform to U.S. GAAP applicable to governmental units adopted by the GASB, except for those component units affiliated with the State's Universities. Because the component units affiliated with the Universities are not governmental entities, they follow FASB standards for not-for-profit organizations for financial reporting purposes. Each component unit has a June 30 year-end.

A. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Measurement Focus and Basis of Accounting

The State's component units and component units affiliated with the Universities are presented using the economic resources measurement focus and the accrual basis of accounting.

2. Net Assets

Component units affiliated with the Universities classify net assets, revenues, expenses, gains and losses based on the existence or absence of donor-imposed restrictions. Accordingly, the net assets of the component units affiliated with the Universities and changes therein are classified and reported as follows:

- *Unrestricted net assets* include assets and contributions that are not restricted by donors or for which such restrictions have expired.
- Temporarily restricted net assets include contributions for which donor imposed restrictions have not been met (either by the passage of time or by actions of the Foundations), charitable remainder unitrusts, pooled income funds, gift annuities, and pledges receivable for which the ultimate purpose of the proceeds is not permanently restricted. Donor-restricted contributions are classified as temporarily restricted even if the restrictions are satisfied in the same reporting period in which the contributions are received.
- Permanently restricted net assets include contributions, charitable remainder unitrusts, pooled income funds, gift
 annuities, and pledges receivable which require by donor restriction that the corpus be invested in perpetuity.

3. Cash and Cash Equivalents

Cash and cash equivalents includes monies held in certificates of deposit, overnight money market accounts, and U.S. Government or U.S. Treasury money market funds with original maturities of three months or less. Cash equivalents are stated at cost, which approximates fair value.

4. Investments

The fair values of publicly traded securities are based on quoted market prices and exchange rates, if applicable. Absolute return limited partnership interests are recorded at fair value based on quoted market prices (where the underlying investment is a mutual fund) or as determined by the fund manager. Purchases and sales of investment securities are reflected on a trade-date basis. Realized gains and losses are calculated using the average cost for securities sold. Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Investment income or loss comprises the sum of realized and unrealized gains and losses on investments and interest and dividends, less an investment management fee.

In addition, investments include Universities' endowment funds totaling \$334.5 million managed by the Foundations. These funds are primarily held in pooled endowment funds managed for the Universities under service contracts with the Foundations and invested in the Foundations' endowment pools.

5. Income Taxes

The Universities-affiliated component units qualify as tax-exempt organizations under Section 501(c)(3) of the Internal Revenue Code, except for the ACFFC and, accordingly, there is no provision for income taxes in the accompanying financial statements. In addition, they qualify for the charitable contribution deduction and have been classified as organizations that are not private foundations. Any unrelated business income would be taxable. The ACFFC is exempt from taxes under the provisions of Section 501(c)(4) of the Internal Revenue Code. The ACFFC does not qualify for the charitable contribution deduction.

6. Contributions

Contributions received are recorded as unrestricted, temporarily restricted, or permanently restricted support, depending on the existence and/or nature of any donor restrictions. All donor-restricted support is reported as an increase in temporarily or permanently restricted net assets depending on the nature of the restriction.

7. Net Assets Released from Restriction

The Universities-affiliated component units' expenses are not incurred in the temporarily restricted or permanently restricted net asset categories. As the restrictions on these net assets are met, the net assets are reclassified to unrestricted net assets. The total net assets reclassified are reported as net assets released from restriction in the accompanying Statement of Activities.

8. Deferred Outflows of Resources

Deferred outflows of resources represent a consumption of net position by the component units that applies to a future period and so will not be recognized as an outflow of resources (expense) until then. Deferred outflows of resources increase net position, similar to assets.

9. Endowments

The management of the ASU Foundation and the U of A Foundation endowments is governed by laws in the State of Arizona created under the Arizona Management of Charitable Funds Act.

The ASU Foundation has interpreted State statute as requiring the preservation of the fair value of the original gifts at the gift date of the donor restricted endowment funds. As a result of this interpretation, the ASU Foundation classifies as permanently restricted net assets: (a) the original value of gifts donated to the permanent endowment; (b) the original value of subsequent gifts to the permanent endowment; and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The ASU Foundation's investment policies are

reviewed periodically. The long-term financial objectives are to produce a relatively predictable and stable payout stream that increases over time at least as fast as the general rate of inflation and to preserve intergenerational equity by achieving growth of the investments at a rate that at least keeps pace with the general rate of inflation, net of spending.

The U of A Foundation endowment payout rate is a percentage (4% of the average fair value at the three previous calendar year-ends) of the fair value of each endowment account, as determined from time to time by the U of A Foundation's Board. The U of A Foundation considers the following factors in making a determination to appropriate donor-restricted endowment funds: the net rate of return earned by each endowment account in each of the five most recent fiscal years; the net real rate of return (as measured by the Higher Education Price Index) earned by the endowment in each of the five most recent fiscal years (i.e., the duration and preservation of the endowment fund); payout rates established by other university endowments as published in the Commonfund and National Association of College and University Business Officers survey; any unusual or extraordinary circumstances impacting the U of A flow of funds from other sources (i.e., tuition revenues, State appropriations, etc.); the extent to which programs benefiting from the payout rate rely on these funds to achieve their goals and objectives; general economic conditions; the possible effect of inflation or deflation; and the expected total return from income and appreciation of investments per the most recent asset allocation study.

The U of A Foundation's goal is to manage endowment assets such that the annual nominal return exceeds the annual "hurdle rate" (the sum of the payout and the endowment fee) so the endowment principal is able to grow and continue to fund in perpetuity the set of activities envisioned by the donor at the time of the gift. The U of A Foundation expects its endowment funds to provide an annual average rate of return of 8.7% with a standard deviation of 8.6%.

10. Use of Estimates

The preparation of the Universities-affiliated component units' financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

B. DEPOSITS AND INVESTMENTS

1. Component Units

a. Deposits and Investment Policies

The investments of the WIFA are stated at fair value, except guaranteed investment contracts, which are stated at cost since they are non-participating contracts.

b. Custodial Credit Risk - Deposits and Investments

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the deposits or collateral securities may not be recovered from the outside party. The WIFA does not have a formal policy regarding custodial credit risk for deposits.

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the value of the investment or collateral securities that are in the possession of an outside party may not be recovered. The WIFA does not have a formal policy regarding custodial credit risk for investments.

c. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The WIFA does not have a formal policy regarding interest rate risk. The following table presents the interest rate risk for the WIFA utilizing the segmented time distribution method as of June 30, 2015 (expressed in thousands):

					In	vestment M	atur	rities (in y	ears)		
Investment Type	Fa	Fair Value		Less than 1		1-5		6-10	More than 10		
Guaranteed investment contracts	\$	61,692	\$	2,109	\$	38,477	\$		- \$	21,106	
Money market mutual funds		18,937		18,937		-			-	-	
U.S. agency securities		22,877		22,877		-			-	-	
U.S. Treasury securities		10,078		9,876		202			-		
Total	\$	113,584	\$	53,799	\$	38,679	\$		- \$	21,106	

d. Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the holder of the investment. The WIFA does not have a formal policy regarding credit risk but their investments are in accordance with the master bond indenture. The following table presents the WIFA's investments which were rated by S & P and/or an equivalent national rating organization. The ratings are presented using S & P's rating scale as of June 30, 2015 (expressed in thousands):

Investment Type	Fa	air Value	AAA	AA	A
Guaranteed investment contracts	\$	61,692	\$ -	\$ -	\$ 61,692
Money market mutual funds		18,937	18,937	-	-
U.S. agency securities		22,877	-	22,877	_
Total	\$	103,506	\$ 18,937	\$ 22,877	\$ 61,692

e. Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The WIFA's investment policy contains no limitations on the amount that can be invested in any one issuer. At June 30, 2015, investments in any one issuer, that were more than 5% of the WIFA's total investments, are as follows: (i) Bayerische Landesbank (fair value of \$40.6 million, or 15.6%) and (ii) Federal Home Loan (fair value of \$22.9 million, or 8.8%).

2. Universities-Affiliated Component Units

Investments of the Universities-affiliated component units include the following amounts at June 30, 2015. Investments are stated at fair value (expressed in thousands):

II of A

		ASU	O OI A	
	Fo	undation	Foundatio	n
Money market funds and cash equivalents	\$	30,305	\$	-
Domestic/international equity securities and mutual funds		549,354	229,36	0
U.S. fixed income obligations and mutual funds		115,370	118,85	3
Absolute return limited partnerships and funds		-	236,62	0
Other investments		91,612	163,58	4
Total Investments	\$	786,641	\$ 748,41	7

C. PROGRAM LOANS

The WIFA has made loans to local governments and others in Arizona to finance various projects pursuant to the requirements of the Clean Water and Safe Drinking Water Acts. The loans are generally payable in semi-annual installments due January 1 and July 1 of each year, including interest. However, several loans are payable monthly or quarterly. Changes in the program loans during fiscal year 2015 are as follows (expressed in thousands):

	В	eginning							Ending		
		Balance	e		Increases		Increases		Decreases	1	Balance
Clean Water Fund	\$	747,609		\$	22,610		\$ (47,390)	\$	722,829		
Drinking Water Fund		346,697			26,530		(21,548)		351,679		
Total	\$	1,094,306		\$	49,140		\$ (68,938)	\$	1,074,508		

Repayment of these loans will be made from pledged property taxes, net revenues from the systems, transaction privilege taxes, or from special assessments. Most loans have a .30% to 3.00% annual administrative fee. When loans have been repaid, the principal and interest for the pledged loans are placed in restricted accounts used to make bond payments. For loans that are not pledged, the money is placed in a fund from which additional loans are made.

Some program loans require a monthly or quarterly payment into a debt service reserve to assure payments of the loans. The debt service reserve is a liability of the WIFA to the borrowers and interest on the reserve accrues to the borrowers. As of June 30, 2015, the debt service reserve was \$69 thousand and \$2.1 million for the Clean Water and Drinking Water Funds, respectively, and no allowance for loan loss was recorded.

D. PLEDGES RECEIVABLE

Pledges receivable (unconditional promises to give) are recorded at their net realizable value, which is net of a discount and loss allowance. The ASU Foundation's pledges are discounted using the applicable risk free rate at the date the pledge was recognized. The discount rates range from 1.20% to 10.90%. An allowance for uncollectible pledges is estimated based on the ASU Foundation's collection history and is recorded as a reduction to contribution support and revenue and an increase in the allowance for uncollectible pledges.

Pledges receivable, as of June 30, 2015, include the following (expressed in thousands):

		ASU
	Fo	oundation
Gross pledges receivable	\$	163,949
Present value discount		(11,548)
Allowance for uncollectible pledges		(39,409)
Net Pledges Receivable	\$	112,992

E. DIRECT FINANCING LEASE AGREEMENTS

1. ASU Foundation

The ASU Foundation leases a portion of the Fulton Center building (the ASU Foundation's headquarters) to the ASU under a direct financing lease. At the end of lease, the ASU Foundation and affiliates will gift their portion of the building to the ASU and the ASU will receive title to the building. The ASU Foundation's net investment in this direct financing lease at June 30, 2015 is \$23.7 million.

2. ACFFC

Pursuant to a Sublease Agreement, dated April 7, 2004 and amended on April 1, 2009 (the Sublease), Nanotechnology Research, LLC, a wholly-owned subsidiary of the ACFFC, leases its interest in the Research Park to the ASU. The ASU will make lease payments at times in amounts sufficient to pay all principal and interest on the Series 2009A and 2009B Bonds. The Sublease has successive annual renewals without action from either party through the period ending March 31, 2034. The Sublease is subject to early termination by Nanotechnology or the ASU upon the payment in full of the Series 2009A and 2009B Bonds. Upon

termination or expiration of the Sublease, the ACFFC's interest in the premises, including all buildings and improvements on the leased premises, transfers to the ASU without further consideration. The ACFFC's net investment in the Nanotechnology facility direct financing lease is \$30.1 million at June 30, 2015.

Pursuant to the ASU Lease Agreement, dated July 1, 2005, McAllister Academic Village, LLC, a wholly-owned subsidiary of the ACFFC, leases its interest in the non-residential portion of Hassayampa Academic Village (Hassayampa, HAV) to the ASU which consists of the academic, tutorial, retail, and food service facilities. The lease was amended effective September 1, 2008 to change the annual renewal period through June 30, 2039 to correspond with the maturity of the Hassayampa 2008 Bonds. Any right, title, or interest of Hassayampa in and to the academic portions of the Hassayampa project will pass to the ASU without further cost upon payment in full of the Hassayampa 2008 Bonds. Lease payments are based on the fixed interest rates determined by the Hassayampa 2008 Bonds maturity schedule. The ACFFC's net investment in the McAllister (HAV) direct financing lease is \$12.0 million at June 30, 2015.

F. CAPITAL ASSETS

Capital assets for the Universities-affiliated component units for the fiscal year ended June 30, 2015 include the following (expressed in thousands):

	ACFFC	A Campus n Corporation	ntown Phoenix dent Housing
Buildings and improvements	\$ 174,045	\$ 24,041	\$ 114,129
Furniture, fixtures, and equipment	 79,027	6,778	10,501
Total cost or donated value	253,072	30,819	124,630
Less: Accumulated Depreciation	 (97,065)	(10,431)	(30,760)
Total Property and Equipment, Net	\$ 156,007	\$ 20,388	\$ 93,870

G. LONG-TERM OBLIGATIONS

1. Component Units

a. Water Infrastructure Finance Authority

The WIFA's bonds are callable and interest is payable semiannually. The bonds are special obligations of the WIFA payable solely from and secured by the WIFA's assets. The obligations are not obligations, general, specific, or otherwise, of the State or any other political subdivision, thereof, other than the WIFA.

In prior fiscal years, the WIFA refinanced various bond issues through advance-refunding arrangements. Under the terms of the refunding bond issues, sufficient assets to pay all principal, redemption premium, if any, and interest on the refunded bond issues have been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the liability for the defeased bonds are not reflected in the accompanying financial statements. The amount outstanding on the refunded bonds for the WIFA at June 30, 2015 totaled \$115.4 million.

On December 4, 2014, the WIFA issued \$342.6 million of Water Quality Revenue Refunding Bond series 2014A for the purpose of advance refunding or defeasing a portion of the 2006 Water Quality Revenue Bonds, 2008 Water Quality Revenue Bonds, 2009 Water Quality Revenue Bonds, 2010 Water Quality Revenue Bonds and the 2012 Water Quality Refunding Bonds. The advanced refunding was done in order to reduce debt payments and take advantage of the low interest rates. The refunding decreased the WIFA's total debt payments by approximately \$38.8 million. The transaction resulted in an economic gain of approximately \$22.3 million. Under the terms of the refunding issue, sufficient assets to pay all principal and interest in the refunded bonds issues had been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. Two different bank escrow accounts were established, a 2014 account and a 2014/2012 escrow account. The amount outstanding of the defeased bonds as of June 30, 2015 was \$390.3 million. In addition to the refunding, the 2004 Series bonds were prepaid.

The security for the bonds includes a pledge of monies and investments in the accounts held by the Trustee and the Financial Assistance accounts held for the WIFA by the State Treasurer and all pledged loans.

At the end of fiscal year 2015, the amount of money and investments held by the Trustee and the monies held by the State Treasurer was \$260.8 million. The principal and interest repayments received on pledged loans in fiscal year 2015 were \$91.5 million. The principal and interest paid on the outstanding bonds in fiscal year 2015 was \$480.5 million.

Summary of Revenue Bonds

The following schedule summarizes revenue bonds outstanding at June 30, 2015 (expressed in thousands):

Revenue Bonds Outstanding	Dates Issued	Maturity Dates	Interest Rates	В	utstanding Salance at ne 30, 2015
Component Units:		•			
Water Infrastructure Finance Authority	2006-2015	2016-2031	0.20-5.00%	\$	712,305

Principal and interest debt service payments on revenue bonds outstanding at June 30, 2015 are as follows (expressed in thousands):

	Annual Debt Service										
	Water Infrastructure Finance Authority										
Fiscal Year	P	rincipal		Total							
2016	\$	47,540	\$ 31,408	\$	78,948

Thereafter		88,190		211,303		132,922
Total	\$	105,690	\$	263,288	\$	139,217

H. CONDUIT DEBT

The purpose of the GADA is to provide cost-effective capital for local communities, certain special districts, and tribal governments for public infrastructure projects. The GADA's bond structure allows it to lower borrowing costs for Arizona's communities by issuing and selling bonds tax-exempt and by sharing financing costs among several borrowers. Principal and interest are payable semi-annually. Loans are secured by the Pledged Collateral Reserve Fund, a requirement that is calculated and deposited by the GADA from the GADA Fund, which is held by the State Treasurer. Some borrowers also have separate, additional reserve funds, which are held by the Trustee. An intercept mechanism of state-shared revenues for political subdivisions enhances the security of the GADA bonds.

In previous years, the State appropriated a total of \$20.0 million to the GADA for the express purpose of securing bonds issued by the GADA. Although issued in the name of the GADA, loans funded through the GADA bonds are solely the obligation of the underlying borrowers and are documented by loan repayment agreements. Pursuant to A.R.S. § 41-2259, the GADA's bonds

do not constitute nor create a general, special, or other obligation or other indebtedness of the State or any governmental unit within the meaning of any constitutional or statutory debt limitation. The bonds do not constitute a legal debt of the State and are not enforceable against the State. The only exposure to the State is related to the *restricted* net position of \$12.0 million in the Pledged Collateral Reserve Fund. At June 30, 2015, the total outstanding face value of all bonds issued by the GADA was \$389.2 million.

I. ACCOUNTING RESTATEMENT

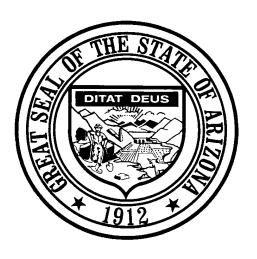

Net Position has been restated as follows (expressed in thousands):

	Component Units	
Net Position, as previously reported	\$	1,053,534
Prior period adjustment		
Implementation of GASB 68:		
Net pension liability (measurement		
date as of June 30, 2013)		(3,253)
Deferred outflows – contributions		
made during fiscal year 2014		179
Change in reporting entity		(337,714)
Net Position, as restated	\$	712,746

Prior Period Adjustment and Change in Reporting Entity

Beginning net position has been restated for the implementation of GASB Statement No. 68, Accounting and Financial Reporting for Pensions, as amended by GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date.

The University of Arizona Health Network (UAHN), previously reported as a discretely presented component unit, no longer meets the GASB requirements for inclusion in the State's financial reporting entity after its merger agreement with Banner Health that closed on February 28, 2015. The component units' beginning net position has been restated by \$337.7 million as a result of removing the UAHN.

A. RECONCILIATION OF BUDGETARY TO GAAP EXPENDITURES

The accompanying Budgetary Comparison Schedules for the General Fund and the Transportation and Aviation Planning, Highway Maintenance and Safety Fund present comparisons of the legally adopted budget with actual expenditure data on the budgetary basis. The original budget represents any appropriation bills passed by June 30, 2014 that affect available appropriations during fiscal year 2015. The final budget represents any appropriation bills passed during fiscal year 2015 for fiscal year 2015 plus the original budget. Appropriation bills passed after the end of fiscal year 2015 for fiscal year 2015 would also be included in the final budget.

The Budgetary Comparison Schedules present actual amounts on the State's budgetary basis for expenditures only. The Schedules include appropriations authorized in one fund and transferred, by legislation, to another fund. The State does not have a legally adopted budget for revenues; therefore, only expenditures are presented on the Budgetary Comparison Schedule, Expenditures for the General Fund and the Transportation and Aviation Planning, Highway Maintenance and Safety Fund. As the budgetary and GAAP presentations of actual data differ, a reconciliation of the two follows (amounts expressed in thousands):

	General Fund	Aviat l Mai	sportation & ion Planning, Highway ntenance & fety Fund
Uses/outflows of resources	 1 0110		iog i uiu
Actual expenditure amounts (budgetary basis) "total charges to appropriations" from the budgetary comparison schedule	\$ 17,781,392	\$	625,659
Differences – budget to GAAP:			
Increase in unpaid incurred expenditures from fiscal year end 2014 to fiscal year end 2015.	38,065		459,722
Increase in unpaid payroll expenditures from fiscal year end 2014 to fiscal year end 2015. For budgetary reporting, final June 2014 payroll expenditures were charged to fiscal year 2015 budget and final June 2015 payroll expenditures were charged to fiscal year 2016 budget.	5,368		-
Distributions to counties and cities of sales taxes are recognized as expenditures on the modified accrual basis, but have no effect on budgetary expenditures.	1,170,313		-
Distribution to counties and cities for Urban Revenue Sharing, derived from the State's income tax collections, is recognized as an expenditure on the modified accrual basis, but has no effect on budgetary expenditures.	640,436		-
Capital leases and installment purchase contracts initiated during the fiscal year, which are not reported in budgetary expenditures.	1,025		-
Programs which are not controlled by legislative appropriations but have disbursed cash or incurred obligations during fiscal year 2015.	4,243,718		1,688,964
Transfers to other funds are outflows of budgetary resources but are not expenditures for financial reporting purposes.	 (952,780)		(305,410)
Total expenditures, as reported on the Statement of Revenues, Expenditures and Changes in Fund Balances	\$ 22,927,537	\$	2,468,935

There were no expenditures in excess of appropriations or allotments in the individual budget accounts for the year.

STATE OF ARIZONA
REQUIRED SUPPLEMENTARY INFORMATION
NOTES TO REQUIRED SUPPLEMENTARY INFORMATION – BUDGETARY COMPARISON SCHEDULES
JUNE 30, 2015

B. BUDGETARY BASIS OF ACCOUNTING

Formulation of the budget begins with the preparation of estimates of expenditure requirements by the head of each budgeted agency and institution. These estimates are submitted no later than September 1 of each year to the Governor's Office of Strategic Planning and Budgeting (OSPB), unless an extension is granted for up to an additional 30 days by the OSPB Director. The budget is prepared by line item and/or program elements for each agency.

The budget document, as finally developed by the Governor, must be submitted to the Legislature no later than five days after the regular session convenes. The Legislature must approve the budget by passing a general and a capital outlay appropriation bill and various omnibus reconciliation bills, which are used for statutory adjustments that must be implemented to carry out the budget. The Governor may veto any item in an appropriation bill. Such vetoes are subject to legislative overrides. The budget can be amended throughout the year by special legislative appropriations and/or budget transfers. The State's Constitution prohibits the appropriation of certain state revenues (primarily tax and fee collections) from exceeding 7.41% of Arizona personal income as estimated by the Economic Estimates Commission.

The State prepares its operating budget on the cash basis of accounting. At the time of the appropriation bill's passage, estimates prepared by legislative and executive branch professional staff assure the State Legislature that adequate revenues will be available to meet the level of appropriations approved. Anticipated revenue is estimated on the cash basis but is not part of the legally adopted budget. Consequently, the accompanying Budgetary Comparison Schedules only present budget to actual expenditure comparisons.

The Budgetary Comparison Schedules present all appropriation line items as passed by the State Legislature in order to demonstrate compliance with the legal level of budgetary control.

The State budgets on an annual basis. The budget format used by the State Legislature determines how an agency's appropriation appears in the General Appropriation Act. A less detailed format provides an agency with more discretion in implementing the budget. Conversely, a more detailed format may require an agency to use formal processes for redirecting appropriated funds. Among the choices are the following:

Lump Sum – The appropriation of an agency for each fiscal year consists of a single dollar amount, thereby allowing the agency to shift funds among line items, programs, and subprograms without further Legislative or Executive Branch review.

Lump Sum with Special Line Items – The appropriation of an agency for each fiscal year consists of a dollar amount for an operating budget and dollar amounts for individual special line items. Special line items are particular programs for which the Legislature has a specific policy interest. These line items may or may not include Full Time Equivalent positions. Agencies are permitted to shift funds among line items, programs, and subprograms without further Legislative or Executive Branch review, though footnotes may place additional restrictions or notifications upon the agency prior to or associated with transfers between special line items or to or from the operating budget.

During the fiscal year, \$2.1 billion in supplemental appropriations, net of mid-year reversions and adjustments, were provided to the General Fund. The Transportation and Aviation Planning, Highway Maintenance and Safety Fund appropriations increased by \$27.7 million. These amounts are included in the Budgetary Comparison Schedules.

State agencies are responsible for exercising budgetary control and ensuring that expenditures do not exceed appropriations. The ADOA's General Accounting Office exercises oversight and does not disburse funds in excess of appropriations.

The Governor shall have in continuous process of preparation and revision a tentative budget report for the next fiscal year for which a budget report is required to be prepared.

Whenever the expenses of any fiscal year shall exceed the income, the Legislature *may* provide for levying a tax for the ensuing fiscal year sufficient, with other sources of income, to pay the deficiency, as well as the estimated expenses of the ensuing fiscal year.

STATE OF ARIZONA REQUIRED SUPPLEMENTARY INFORMATION NOTES TO REQUIRED SUPPLEMENTARY INFORMATION – BUDGETARY COMPARISON SCHEDULES JUNE 30, 2015

All expenditures of the State's money must be authorized by law. Authorization can be granted directly by law or contingent upon appropriation from the State Legislature. Periodically, the State Legislature may appropriate monies for program expenditures already authorized by law, resulting in duplicate spending authority. In appropriating monies, the State Legislature has, in some cases, included external funding sources as a portion of an agency's total program expenditure authorization (budget) and has identified the external funding sources as an offset against the program appropriations total in order to reflect the State funding amount. An example of this is found in the final budget amount of \$813.2 million for the Department of Health Services' Medicaid Behavioral Health - Traditional on page 146, which includes \$582.8 million of duplicate expenditure authorizations. Accordingly, sometimes program expenditures may not exhaust specific legislative appropriations. To properly present the total budget (appropriation) information, in relationship to "actual" expenditure amounts, duplicate expenditure authorizations have been eliminated from the General Fund's budget (appropriation) totals on page 151.

STATE OF ARIZONA REQUIRED SUPPLEMENTARY INFORMATION INFRASTRUCTURE ASSETS JUNE 30, 2015

Information About Infrastructure Assets Reported Using the Modified Approach

As allowed by Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements* – and Management's Discussion and Analysis – for State and Local Governments (GASB 34), as amended, the State of Arizona reports its roads and bridges using the modified approach. Assets accounted for under the modified approach include 6,800 center lane miles (21,390 travel lane miles) of roads and 4,798 bridges that the State is responsible to maintain.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up to date inventory of eligible infrastructure assets
- Perform condition assessments of eligible assets and summarize the results using a measurement scale
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the State
- Document that the assets are being preserved approximately at or above the established condition level

As adopted by the State Transportation Board on an annual basis, the Five-Year Transportation Facilities Construction Program (Program) contains estimated expenditures for highway system improvements and the preservation of existing roadways and bridges. Both of these factors impact the condition assessment of the roads and bridges as described in the following sections. The Program in effect for fiscal year 2015 and beyond was adopted by the Transportation Board on June 13, 2014.

This Program is a dynamic instrument and adjustments are made to the annual plans based on the needs of the State to maintain the condition level of the roads and bridges at a level equal to, or greater than, the goals established by the State. In addition, not only are adjustments made during the life of the Program, circumstances may require that refinements to the individual components of the Program be made during the fiscal year.

In comparing Estimated to Actual Expenditures in the tables that follow, significant variances can occur. These variances are primarily due to the methodology used in the preparation of the Program. In this Program, the Estimated Expenditures for the current year are based on "programmed" projects which may or may not be spent in the current year of the Program. Programmed expenditures consist of those items that are planned for the future, with contracts that have not yet been awarded. Furthermore, the Actual Expenditures will include projects that were programmed for a prior year's Estimated Expenditures but which did not occur, or were not completed, in the prior year.

The following information pertains to the condition assessment and maintenance of infrastructure assets and reflects the State's success in achieving condition levels that exceed the established levels.

Roads

The mission of the Arizona Department of Transportation's (ADOT) Pavement Management Section (PMS) is to develop and provide a cost effective pavement rehabilitation construction program that preserves the State's investment in its highway system and enhances public transportation and safety. The requirements of GASB 34 and the PMS both work toward the same basic goal, the efficient, effective management of the State's assets to produce long-term benefits, while minimizing expenditures.

The PMS has developed performance goals for the condition level of the pavement in the State's highway system. These goals require periodic assessment of pavement conditions and the budget level needed to meet that goal. The goal is expressed as a measure called "Serviceability", which can be defined as the ability of a pavement to serve the traveling public (as documented in 1961 after the American Association of State Highway and Transportation Officials (AASHTO) Road Test, 1956-1961). Serviceability is based on detailed measurements of objective features of the pavement. Many surveys since the original road test have shown that these measurements closely track the subjective opinion of the traveling public. Most commonly, this number is called the "Present Serviceability Rating" (PSR). PSR is a five-point scale (5 excellent, 0 impassable), similar to the Weaver/AASHTO Scale shown as follows:

JUNE 30, 2015

Numerical Rating	PSR	Weaver/AASHTO Scale
5	Excellent	Perfect
4	Good	Very Good
3	Fair	Good
2	Poor	Fair
1	Very Poor	Poor
0	Impassable	Very Poor

The goal of the State is to maintain a condition level (PSR) rating of 3.23 or better for all roads in the State's highway system. Annually, Transportation Material Technicians drive over the system with inertial profiling equipment and measure the roughness of the pavement. This process is continuous throughout the year in order to assess the condition level of all pavement on an annual basis. As of the end of fiscal year 2015, an overall rating of 3.68 was achieved, as shown in the following graph:

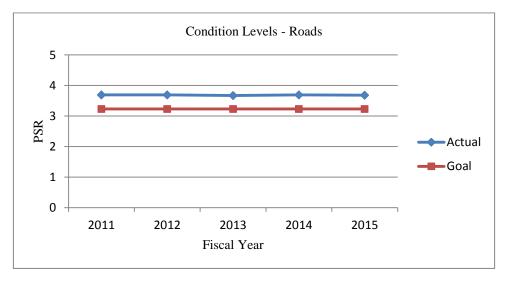

Figure 1

Preservation of the roads is accomplished through programs managed primarily by the ADOT's PMS, as well as other units within the ADOT. The estimated (as specified in the Program as programmed amounts) and actual expenditures for fiscal years 2011 through 2015 were as follows:

	Estimated Expenditures	Actual Expenditures
Fiscal Year	(in millions)	(in millions)
2011	\$265.7	\$373.4
2012	\$261.9	\$373.6
2013	\$276.3	\$291.3
2014	\$271.2	\$287.2
2015	\$249.5	\$300.6

Bridges

The State's bridge assets constitute a significant portion of all infrastructure assets in Arizona. As of June 30, 2015, the State owned and maintained 4,798 bridges with an approximate total deck area of 49,753,220 square feet. Bridges, for purposes of this report, include all structures erected over an opening or depression with a centerline of 20 feet or more. Information related to these bridges is stored and updated in the Arizona Bridge Information and Storage System (ABISS). This system is used to efficiently manage the bridge inventory through storing all bridge related data and assisting bridge engineers in arriving at appropriate bridge preservation decisions. Also, ABISS is used for reporting bridge inventory and condition, on a biennial basis, to the Federal Highway Administration (FHWA).

A Condition Rating Index (CRI) is used to track the condition of the bridge network. The CRI is based on four selected bridge inspection condition ratings, which in turn are based on standards established in the FHWA's "Recording and Coding Guide for the Structural Inventory of the Nation's Bridges." The four selected condition ratings that are included in the CRI computation are: the bridge joints condition, the deck condition, the superstructure condition, and the sub-structure condition. The bridge joints condition rating is an Arizona specific rating item not included in the FHWA condition rating guidelines, whereas the other three condition ratings are federally mandated condition ratings. The CRI is computed by subtracting from one, the ratio of the sum of the deck areas of all bridges with a condition rating of four or less, which indicates that the rated element is at best in a poor condition, to the total sum of the deck areas. The rating system in this guide is as follows:

Numerical Rating	Condition Rating
9	Excellent
8	Very Good
7	Good
6	Satisfactory
5	Fair
4	Poor
3	Serious
2	Critical
1	Imminent Failure

Management of the bridge inventory is a major function of the ADOT's Bridge Group and regularly scheduled biennial inspections are made of all bridges. A civil or structural engineer, licensed to practice in Arizona, performs these inspections. It is the policy of the State to maintain State highway bridges so that the CRI exceeds 92.5%. In fiscal year 2015, the CRI was computed at 93.5%.

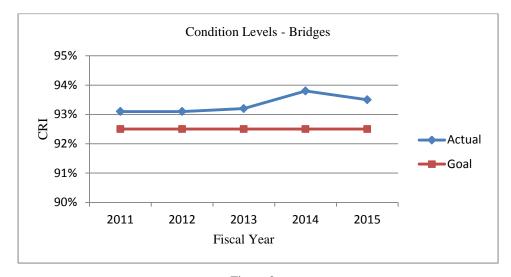

Figure 2

JUNE 30, 2015

Bridges represent a major public investment, and their inspection and maintenance is an essential function of the State in its mission of providing products and services for a safe, efficient, and cost effective transportation system. Figure 3 indicates that approximately 56% of the bridges in the State were constructed prior to the 1970s while only 15% have been constructed since 2000.

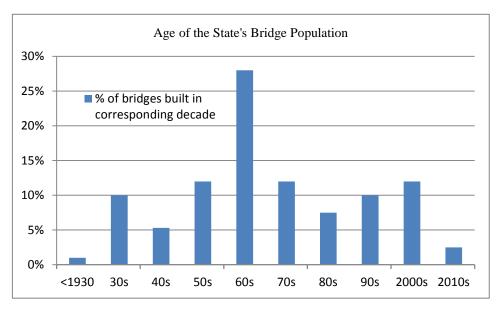

Figure 3

Preservation of the bridges is accomplished through programs managed by the Bridge Group. The estimated (as specified in the Program as programmed amounts) and actual expenditures for fiscal years 2011 through 2015 were as follows:

	Estimated Expenditures	Actual Expenditures
Fiscal Year	(in millions)	(in millions)
2011	\$11.8	\$26.0
2012	\$12.5	\$20.6
2013	\$14.7	\$10.7
2014	\$21.2	\$20.5
2015	\$13.7	\$21.9

ACTUARIALLY DETERMINED CONTRIBUTION RATES

Actuarially determined contribution rates for PSPRS and CORP are calculated as of June 30 two years prior to the end of the fiscal year in which contributions are made. The actuarial methods and assumptions used to establish the contribution requirements are as follows:

Actuarial cost method Entry age normal

Amortization method Level percent closed for unfunded actuarial accrued liability,

open for excess

Remaining amortization period,

as of the 2013 actuarial valuation 23 years for unfunded actuarial liability, 20 years for excess

Asset valuation method 7-year smoothed market value, 20% corridor

Actuarial assumptions:

Investment rate of return In the 2013 actuarial valuation, the investment rate of return was

decreased from 8.0% to 7.85%

Projected salary increases In the 2013 actuarial valuation, projected salary increases were

decreased from 5.0%-9.0% to 4.5%-8.5% for PSPRS and from

5.0%-8.25% to 4.5%-7.75% for CORP

Wage growth In the 2013 actuarial valuation, wage growth was decreased from

5.0% to 4.5% for PSPRS and CORP

Retirement age Experience-based table of rates that is specific to the type of

eligibility condition. Last updated for the 2012 valuation pursuant to an experience study of the period July 1, 2006 - June 30, 2011

Mortality RP-2000 mortality table (adjusted by 105% for both males and

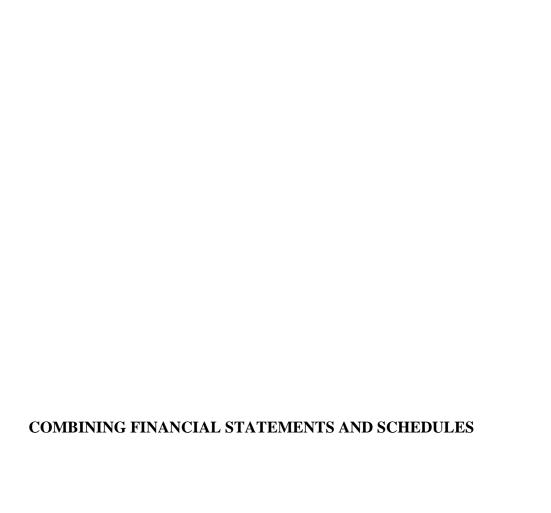

females)

COMBINING FINANCIAL STATEMENTS AND SCHEDULES

NON-MAJOR GOVERNMENTAL FUNDS

Special Revenue Funds

Special Revenue Funds account for the proceeds of specific revenue sources (other than major capital projects) that are legally restricted to expenditures for specified purposes.

Debt Service Funds

The Debt Service Funds account for the accumulation of resources for, and the payment of, long-term debt principal, interest, and related costs.

Capital Projects Funds

Capital Projects Funds account for financial resources used to acquire or construct major capital facilities (other than those financed by Proprietary Funds, Pension Trust Funds or Component Units).

NON-MAJOR GOVERNMENTAL FUNDS SPECIAL REVENUE FUNDS

The Public Safety and Correctional Programs Fund accounts for law enforcement, military, custody, and related services provided to the general public.

The Environmental Protection Fund accounts for the protection of the State's public health by administering the State's environmental quality laws and delegating federal programs to prevent, control, and abate pollution of our air, water, and land resources.

The Healthcare and Social Services Fund accounts for health and welfare services provided to the general public.

The Tobacco Tax and Healthcare Fund accounts for the receipt of monies levied on tobacco products. The monies are used for health education programs; research, prevention and treatment of tobacco related diseases; to increase the quality of, and access to, the early childhood development and health system that ensures a child entering school comes healthy and ready to succeed; and for medically needy healthcare programs.

The Judicial and Legal Services Fund accounts for the anti-racketeering, consumer protection, consumer fraud, anti-trust, and collections enforcement programs of the Attorney General's Office and statewide court improvement functions supervised by the Arizona Supreme Court.

The Regulating and Licensing Fund accounts for inspection and regulatory services provided to the general public.

The Game and Fish Fund accounts for the receipt of monies collected by the Department of Game and Fish for various hunting and fishing licenses, for the purpose of conserving, enhancing, and restoring Arizona's diverse wildlife resources and habitats, as well as providing safe watercraft and off-highway vehicle recreation.

The State Parks Development Fund accounts for the receipt of monies collected by the State Parks Fund for the purpose of acquiring and developing State park lands, sites and facilities.

The Business Development Fund accounts for the promotion of statewide economic and community development, which supports a globally competitive Arizona.

The Educational Programs Fund accounts for supplemental building needs and instructional improvement programs specifically identified in a voter initiative that enacted a six-tenth of one percent statewide sales tax dedicated to education functions. The Educational Programs Fund supports programs from the kindergarten through university educational levels.

The Groundwater Protection and Conservation Fund accounts for strategic water resources planning, Colorado River water management, drought management planning, dam safety, flood mitigation, administration of the Arizona Groundwater Management Code, and administration of water rights. These programs are the responsibility of the Department of Water Resources.

The Clean Elections System Fund accounts for fines and fees collected to pay for campaign expenses of statewide candidates and State legislative candidates who choose not to accept private source campaign funds. The fund was established as a result of a voter initiative.

NON-MAJOR ENTERPRISE FUNDS

Enterprise Funds account for operations (a) financed and operated in a manner similar to private business enterprises, where the State intends that the cost of providing goods or services to the general public be financed or recovered primarily through service charges, or (b) where the State decides that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

The Insurance Department Guaranty Funds pay for claims against insolvent insurance companies under certain property and casualty insurance contracts (also includes return of unearned premiums) and contractual obligations under certain life, annuity and disability insurance contracts.

The Arizona Industries for the Blind Fund accounts for the manufacturing, sale, distribution, and marketing of products manufactured by employees at training centers, workshops, business enterprises and home industries programs for the training and employment of adaptable visually impaired persons.

The Lottery Fund accounts for the revenues received from the sale of lottery tickets, the receipt of license fees, prize payments, operational expenses, including consulting, promotional, and advertising expenses, and transfers of monies to other state funds.

The Arizona Correctional Industries Fund employs prison inmates in its manufacturing, service, and agricultural operations for the sale of goods and services primarily to other State agencies (including the Arizona Department of Corrections) and political subdivisions.

The Arizona Highways Magazine Fund publishes and markets the Arizona Highways Magazine and various other products that promote the State of Arizona.

The Coliseum & Exposition Center Fund provides rental space to a variety of entertainment and promotional lessees, and sponsors the annual State Fair.

The Industrial Commission Special Fund accounts for the payment of workers' compensation claims that are not covered by the Risk Management Division of the Department of Administration, private insurance carriers, and self-insured employers.

The Unemployment Compensation Fund pays claims for unemployment to eligible recipients from employer contributions and reimbursements.

The Highway Expansion & Extension Loan Program provides the State and communities in Arizona a new financing mechanism to stretch limited transportation dollars and bridge the gap between needs and available revenues.

The Healthcare Group of Arizona administers prepaid medical coverage primarily to small, uninsured businesses with 50 or fewer employees and employees of political subdivisions. The Healthcare Group of Arizona processes premium billing, collections and fund disbursements, performs data analysis, and is responsible for the regulatory oversight of the health plans.

The Other Enterprise Funds consist of the Veterans Administration Reimbursement Fund, the State Home for Veterans Trust Fund, and the Tonto Natural Bridge Publications and Souvenirs Revolving Fund.

INTERNAL SERVICE FUNDS

Internal Service Funds account for the financing of goods and services provided by one State department or agency to other State departments or agencies on a cost-reimbursement basis.

The Risk Management Fund provides insurance coverage to all State agencies using an optimal combination of self-insurance and private excess insurance. It includes the Workers' Compensation section that receives monies from State agencies and uses these monies to pay for insurance and risk management services including loss control services and self-insured liability losses.

The Transportation Equipment Fund administers the purchase, storage and distribution of supplies, equipment and furniture for other Department of Transportation Funds.

The Employee Benefits Fund (HITF) administers the State's benefits program available to State employees and retirees.

The Telecommunication Fund receives monies from State agencies for services related to administering the State's contracts for the installation and maintenance of telecommunications equipment through the Telecommunications Program Office.

The Automation Operations Fund receives monies from State agencies for services related to the implementation and operation of automation programs throughout the State.

The Retiree Accumulated Sick Leave Fund accounts for monies paid out to retirees for their accumulated sick leave.

The Motor Pool Fund receives monies from State agencies for the use of State vehicles and uses these monies for operation of the State Motor Pool.

PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS

Pension Trust Funds account for transactions of the four public employee retirement systems for which the State acts as trustee.

The Arizona State Retirement System (ASRS) is a cost-sharing, multiple-employer pension system that benefits employees of public schools, the State and its political subdivisions.

The Public Safety Personnel Retirement System (PSPRS) is an agent multiple-employer pension system that benefits fire fighters and police officers employed by the State and its political subdivisions.

The Elected Officials' Retirement Plan (EORP) is a cost-sharing, multiple-employer pension plan that benefits all elected State and county officials and judges and certain elected city officials.

The Corrections Officer Retirement Plan (CORP) is an agent multiple-employer pension plan that benefits town, city and county detention officers and certain employees of the State's Department of Corrections and Department of Juvenile Corrections.

The Administrative Office of the Courts Probation Officers (AOC) is a cost-sharing, multiple-employer pension plan within CORP that benefits county probation officers.

Other Employee Benefit Trust Funds account for health insurance premium subsidies paid by the ASRS, PSPRS, EORP, CORP, and AOC, as well as long-term disability benefits paid by the ASRS to State employees and employees of other governmental entities participating in the plans.

The ASRS Health Benefit Supplement Fund is a benefit cost-sharing, multiple-employer postemployment benefit plan that provides for health insurance premium subsidies to eligible retired and disabled members.

The ASRS Long-Term Disability Fund is a benefit cost-sharing, multiple-employer post-employment benefit plan that provides for long term disability benefits to eligible participants.

The PSPRS Health Benefit Supplement Fund is a benefit agent multiple-employer post-employment benefit plan that provides for health insurance premium subsidies to eligible retired and disabled members.

The EORP Health Benefit Supplement Fund is a benefit cost-sharing, multiple-employer post-employment benefit plan that provides for health insurance premium subsidies to eligible retired and disabled members.

The CORP Health Benefit Supplement Fund is a benefit agent multiple-employer post-employment benefit plan that provides for health insurance premium subsidies to eligible retired and disabled members.

The AOC Health Benefit Supplement Fund is a benefit cost-sharing, multiple-employer post-employment benefit plan that provides for health insurance premium subsidies to eligible retired and disabled members.

INVESTMENT TRUST FUNDS

Investment Trust Funds account for assets held by the State Treasurer in a trustee capacity for local governments and political subdivisions of the State of Arizona which have elected to invest cash with the State Treasurer's Office.

Central Arizona Water Conservation District is an Investment Trust Account composed of corporate debt, money market mutual funds, and United States Government securities. The Central Arizona Water Conservation District is the only participant in the account.

Local Government Investment Pool is an Investment Trust Account composed of corporate debt, money market mutual funds, certificates of deposit, repurchase agreements, and United States Government securities.

Local Government Investment Pool – **Medium-Term** is an Investment Trust Account for participants who want to invest their monies for a longer time period composed of corporate notes, money market mutual funds, certificates of deposit, repurchase agreements, and United States Government securities.

Local Government Investment Pool – FF&C is an Investment Trust Account composed of corporate notes, repurchase agreements, and United States Government securities. All investments of the fund are backed by the full faith and credit of the United States Government.

Local Government Investment Pool – **Medium-Term FF&C** is an Investment Trust Account for participants who want to invest their monies for a longer time period composed of corporate notes, money market mutual funds, certificates of deposit, repurchase agreements, and United States Government securities. All investments of the fund are backed by the full faith and credit of the United States Government.

Lehman Brothers Pool is an Investment Trust Account composed of the Local Government Investment Pool's share of the Lehman Brothers bond value that was transferred to this pool due to Lehman Brothers filing for Chapter 11 bankruptcy. The transfer was made to provide for the decline in fair value of the Lehman Brothers securities held by the Local Government Investment Pool.

NON-MAJOR COMPONENT UNITS

Component units are legally separate entities for which the State is considered to be financially accountable. GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

The Arizona Power Authority purchases the State's allocation of power produced at the federally owned Boulder Canyon Project hydropower plant and resells it to Arizona entities that are eligible purchasers under federal and state laws.

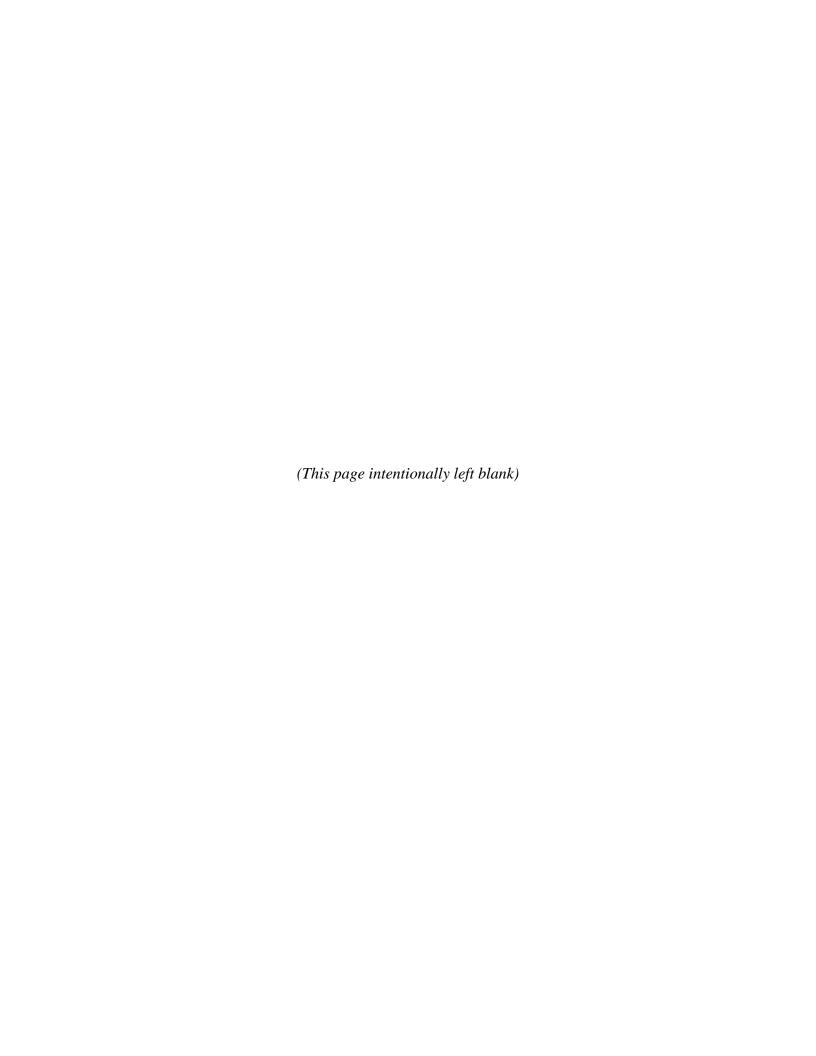

The Rio Nuevo Multipurpose Facilities District (Rio Nuevo) utilizes tax incremental financing to help develop multipurpose facilities in the downtown Tucson area.

The Greater Arizona Development Authority provides cost-effective access to capital for local communities, certain special districts, and tribal governments for public infrastructure projects.

The Arizona Commerce Authority is charged with the following responsibilities: job creation and expansion of capital investment through business attraction, expansion and retention, including business incubation and entrepreneurship; creation, monitoring, and execution of a comprehensive economic and workforce strategy; management and administration of economic development and workforce programs; providing statewide marketing leadership; utilization of all means necessary, prudent and practical to integrate private sector-based innovation, flexibility, focus and responsiveness; and advancement of public policy to meet the State's economic development objectives.

NON-MAJOR UNIVERSITIES – AFFILIATED COMPONENT UNITS

Component units of the State affiliated with the Universities are legally separate, tax-exempt organizations controlled by separate boards of directors that meet the criteria established in GASB, with the exception of Downtown Phoenix Student Housing, LLC, the ASU Preparatory Academy, Inc. (ASU Prep), and Campus Research Corporation (CRC). The Downtown Phoenix Student Housing, LLC is included due to the nature and significance of the financial arrangement that it has with the State and that the State believes would be misleading to exclude. The ASU Prep is included because of its close affiliation to the State and that the State believes it would be misleading to exclude. The CRC is included because the U of A approves the budget and can access its resources.

The Northern Arizona University Foundation receives gifts and bequests, administers and invests securities and property, and disburses payments to and on behalf of the NAU for advancement of its mission. The NAREH is a wholly owned subsidiary of the NAU Foundation and was established to construct, develop, equip, operate, maintain, lease, and hold real estate investments on behalf of the NAU Foundation. The NAUV is a wholly owned subsidiary of the NAU Foundation and was established to license, or otherwise commercialize the intellectual property owned or controlled by the Arizona Board of Regents, the NAU, or the NAU Foundation.

Sun Angel Foundation receives funds primarily through donations, and contributes funds to the ASU for support of various athletic programs.

Sun Angel Endowment receives funds primarily through donations, with the annual earnings being used for support of various athletic programs at the ASU.

Thunderbird School of Global Management offers non-degree programs focused on global business across cultural, ethical, and multi-lingual curriculum.

Arizona State University Research Park, Inc. manages a research park to promote and support research activities in coordination with the ASU.

The Arizona State University Alumni Association receives funds primarily through donations, dues, and affinity partners and contributes funds to the ASU for support of various programs.

Downtown Phoenix Student Housing, LLC provides facilities for use by students of the ASU.

The Arizona State University Preparatory Academy, Inc. prepares Arizona K-12 students for success with a university-embedded academic program that empowers them to complete college, compete globally, and contribute to their communities.

The University of Arizona Law College Association (Law Association) was established to provide support and financial assistance to the College of Law at the U of A. The Law Association funds provide support to the College on many levels, from endowed student scholarships to named faculty professorships.

The University of Arizona Campus Research Corporation was established to assist the U of A in the acquisition, improvement, and operation of the U of A Science and Technology Park and related properties.

The University of Arizona Alumni Association was established to serve the U of A and its graduates, former students, and friends by attracting, organizing and encouraging them to advance the U of A's missions - teaching, research, and public service.

The University of Arizona Eller Executive Education was established to advance the missions of the Eller College of Management and the U of A through noncredit, non-degree programs for business, government, and nonprofit leaders.

STATISTICAL SECTION

(Not Covered by the Independent Auditors' Report)

STATISTICAL SECTION

This part of the State of Arizona's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State's overall financial health.

Financial Trends – *Schedules 1 thru 4* contain trend information to help the reader understand how the State's financial performance and well-being have changed over time.

Revenue Capacity – *Schedules 5 thru 9* contain information to help the reader assess the State's most significant own-source revenues, the sales tax, and personal income tax.

Debt Capacity – *Schedules 10 thru 22* present information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future.

Demographic and Economic Information – *Schedules 23 and 24* offer demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place and to help make comparisons over time and among other governments.

Operating Information – *Schedules 25 thru 27* contain service and infrastructure data to help the reader understand how the information in the State's financial report relates to the services the State provides and the activities it performs.

⁽¹⁾ This schedule reports using the accrual basis of accounting.

⁽²⁾ Fiscal year 2012 unrestricted net position was restated as a result of GASB Statement No. 61 in which Northern Arizona Capital Facilities Corporation was reclassified from a discretely presented non-major university component unit to a blended university component unit.

⁽³⁾ Fiscal year 2012 restricted net position was restated as a result of an agency fund being reclassified to a special revenue fund.

⁽⁴⁾ Fiscal year 2013 unrestricted net position for the Universities was restated as a result of GASB Statement No. 65 to expense debt issuance costs.

⁽⁵⁾ Fiscal year 2014 net investment in capital assets was restated due to a correction of an error related to the private prisons' capital leases.

⁽⁶⁾ Fiscal year 2014 unrestricted net position has been restated due to the implementation of GASB Statement No. 68.

⁽⁷⁾ Fiscal year 2014 restricted net position was restated due to the fund reclassification of the Insurance Department Guaranty Funds.

- (1) This schedule reports using the accrual basis of accounting.
- (2) For fiscal year 2006, net position for governmental activities were increased by the capitalization of \$302,375 of capital assets that were previously recorded as transportation expenses.
- (3) The Industrial Commission Special Fund's cost of sales and benefits expense decreased \$125,828 during fiscal year 2006, primarily due to a decrease in insolvent carrier liabilities.
- (4) Fiscal year 2007 unrestricted investment earnings were reduced by \$17,771 due to reclassifying the Greater Arizona Development Authority from the primary government to a component unit.
- (5) For fiscal year 2013, Unemployment Compensation and Lottery changed from major to non-major funds.
- (6) Fiscal year 2012 miscellaneous general revenues was restated as a result of an agency fund being reclassified to a special revenue fund.
- (7) Fiscal year 2013 expenses for the Universities were restated as a result of GASB Statement No. 65 to expense debt issuance costs.
- (8) For fiscal year 2015, Health and Welfare expenses continue to climb as a result of enrollment increases.
- (9) For fiscal year 2015, Industrial Commission Special Fund changed from a major to a non-major fund.
- (10) Historical data has not been restated for footnote items (5) (7) in Schedule 1.

⁽¹⁾ This schedule reports using the modified accrual basis of accounting.

⁽²⁾ Beginning in fiscal year 2011, the fund balance categories were reclassified as a result of implementing GASB Statement No. 54. Additionally, as a result of the reclassification, fund balance for fiscal year 2010 was restated.

⁽³⁾ Fiscal year 2012 restricted fund balance was restated as a result of an agency fund being reclassified to a special revenue fund.

NONCAPITAL EXPENDITURES

- (2) Increase in tobacco tax revenue from fiscal year 2006 to fiscal year 2007 primarily due to Proposition 203, implemented December 2006.
- (3) Increase from fiscal year 2006 to fiscal year 2007 primarily due to increase in Land Endowment fair market value of investments, larger cash balances available to invest, and market interest rates.

3.0%

3.2%

3.1%

3.1%

3.0%

- (4) For fiscal year 2006, transportation expenditures were reduced and capital outlay was increased by \$302,375 for addition of capital assets that were previously recorded as transportation expenditures.
- (5) In fiscal year 2008, the Greater Arizona Development Authority Fund was reclassified from a special revenue fund to a component unit. Fiscal year 2007 earnings on investments has been restated to reflect this change.
- (6) In fiscal year 2009, "Proceeds from sale of trust land" was moved from "Other financing sources (uses)" to "Revenues."
- (7) In fiscal year 2010, amounts were restated as a result of implementing GASB Statement No. 54.
- (8) Fiscal year 2012 other revenues was restated as a result of an agency fund being reclassified to a special revenue fund.

- (1) Net taxable sales are based upon tax receipts.
- (2) The transporting/towing and railroads/aircraft business classifications have been combined into one category and renamed "transporting."
- (3) Commercial lease rate dropped to 0% effective July 1, 1997.
- (4) A significant portion of the revenue base was subject to a sales tax rate of 5.6% for fiscal years 2006 through 2010, 2014 and 2015. The sales tax rate was 6.6% for fiscal years 2011 through 2013. For fiscal years 2006 through 2015, the tax rate for non-metal mining, oil and gas was 3.125%, the mining severance was 2.5%, and the jet fuel and jet fuel use tax was \$.0305 per gallon. The hotel/motel tax rate was 5.5% for fiscal years 2006 through 2010, 2014 and 2015. The hotel/motel tax rate was 6.5% for fiscal years 2011 through 2013. Per the Arizona Constitution, Article 9, Section 22, the Legislature can raise tax rates with an affirmative vote of two-thirds of the members of each house. The 1.00% rate increase approved under Proposition 100 on May 18, 2010 increased the state transaction privilege and use rate by one percentage point beginning June 1, 2010 and ending May 31, 2013, which is reflected in this table.
- (5) The names of the ten largest revenue payers are not available. Therefore, the categories are intended to provide alternative information regarding the sources of the State's revenue.
- (6) Use tax-utilities was not reported prior to fiscal year 2008. Fiscal years 2006 through 2008 were reported beginning in fiscal year 2008.
- (7) Effective November 1, 2006, membership camping and rental occupancy were repealed.
- (8) MRRA Maintenance, Repair, Replacement or Alteration projects.

⁽¹⁾ Effective November 1, 2006 these rates were repealed.

Source: Arizona Department of Revenue Annual Reports for fiscal years 2015 and 2006.

⁽²⁾ Commercial lease rate dropped to 0% effective July 1, 1997.

⁽³⁾ The education tax is .6% of net taxable sales for most classifications. The ones that do not collect the education tax are non-metal mining, oil and gas, mining and timbering severances, hotel/motel, rental occupancy, and jet fuel taxes. The Arizona Department of Revenue's annual report does not include the amount of education tax collected from each classification; rather it reports the total collected from all classifications. The education tax became effective June 1, 2001.

⁽⁴⁾ MRRA - Maintenance, Repair, Replacement or Alteration projects

- (1) Personal income tax revenue includes income tax collections and refunds, on a cash basis, for the fiscal year ending the following June 30.
- (2) Personal income is reported on a calendar basis. Years 2005 through 2013 have been revised to reflect revisions made by the U.S. Bureau of Economic Analysis.
- (3) The total direct rate for personal income is not available. Average effective rate equals tax collections for the fiscal year, ending the following June 30, divided by personal income.
- (4) Amounts shown are for single and married filing separate returns. For all other filing status returns, double the amounts for the income tax ranges. Per the Arizona Constitution, Article 9, Section 22, the Legislature can raise tax rates with a vote of two-thirds of the members of each house.

Note: Details regarding the State's outstanding debt can be found in the notes to the financial statements.

⁽¹⁾ See Schedule 23 for personal income and population data. These ratios are calculated using personal income and population data for the calendar year that ends during that fiscal year. For example, fiscal year 2014 contains data for the calendar year ending December 31, 2013.

⁽²⁾ Implementation of GASB Statement No. 65 in fiscal year 2014 required the amortization of deferred amount on refundings to be reported as deferred outflow of resources.

⁽³⁾ For fiscal year 2014, capital leases related to private prisons were restated due to a correction of an error.

(1) As stated in House Bill 2206 of the Second Regular Session of the Forty-seventh Legislature, the \$1.3 billion debt limit is eliminated from ARS \$28-7510. The general effective date of this change was September 21, 2006. Prior to September 21, 2006, Arizona Revised Statutes restricted the total principal amount of Arizona Highway Revenue Bonds that could be outstanding at any time, excluding refunded bonds, from exceeding \$1.3 billion.

⁽¹⁾ Full-time equivalent employees are categorized by the function of government that their respective agency generally serves. Information is not available to distinguish between governmental, business-type, or fiduciary activities.

Source: The Appropriations Report. Includes only those positions funded by appropriated funds approved in the Executive Budget.

⁽²⁾ The change in fiscal year 2015 full-time equivalent employees was primarily the result of a division within the Department of Economic Security being established as the Department of Child Safety.

Healthcare Group membership (10)			6,370	7,080	8,260	10,760	14,560
				*	,	*	*

N/A = Not available

- (1) Some figures may represent time periods other than a fiscal year (such as an academic or calendar year), as indicated in the notes below.
- (2) Approximate number of members enrolled as of June 1. Excludes membership in the Healthcare Group, which is listed separately as other business-type activities, beginning in fiscal year 2002.
- (3) Numbers represent total recordable cases and incident rates for the calendar year ended December 31. The fiscal years above contain data for the calendar year that ends during that fiscal year. For example, fiscal year 2015 contains data for the calendar year ending December 31, 2014. One hundred full-time workers represent 200,000 hours worked (100 times 40 hours per week times 50 weeks per year).
- (4) These enrollment counts represent a head count of all active enrollments on October 1st of each school year. The fiscal years above contain data for the academic year that occurs during that fiscal year. For example, fiscal year 2015 contains data from the October 1, 2014 enrollment figures. Starting with the 2008-09 school year, due to federal requirements, new business rules were used to calculate enrollment, so that counts are unduplicated. Prior to this, the counts are not unduplicated counts; concurrently enrolled students are counted as having an active membership in each school. Also, there was a change in data collection in 2003. From 2003 to 2008, concurrent enrollments in technology schools are included, which may additionally overstate aggregated enrollment figures.
- (5) Beginning in 2007, the state prison inmate population on the 2 Year Prison Population Trend Report excludes the inmate count from the county jail. For fiscal years 2006 and prior, the number includes both the county jail and the outside count of inmates. Fiscal year 2015 total is as of June 30.
- (6) Count represents the total number of vehicles registered as of the end of the fiscal year.
- (7) Count represents the number of driver licenses issued during that fiscal year, beginning July 1 and ending June 30.
- (8) Numbers represent sales for licenses, stamps, and tags for the calendar year ended December 31. The fiscal years above contain data for the calendar year that ends during that fiscal year. For example, fiscal year 2015 contains data for the calendar year ending December 31, 2014.
- (9) Enrollment figures represent the number of full-time equivalent students for the fall semester. The fiscal years above contain data for the fall semester that occurs during that fiscal year. For example, fiscal year 2015 contains data for the fall 2014 semester. These figures are generated by calculating one full-time equivalent student for each 15 student credit hours produced in lower-division undergraduate courses, each 12 student credit hours produced in upper-division undergraduate courses, and each 10 student credit hours produced in graduate courses.
- (10) Approximate number of members enrolled as of June 1. Healthcare Group ceased operations on December 31, 2013.

Note: No capital asset indicators are available for the general government, health and welfare, inspection and regulation, education, and business-type activity functions.

- (1) These are the number of center lane miles and bridges that the Arizona Department of Transportation accounts for under the modified approach, which is discussed in the Required Supplementary Information portion of this report.
- (2) The Arizona Department of Corrections also contracts with private prison facilities to provide custody and treatment.
- (3) In addition to academic/support facilities, auxiliary enterprise facilities are also reported. These would include essentially self-supporting entities, such as residence halls and parking structures.
